## **CSG Free Shoalhaven, Basin View NSW, made the following submission on the project:**

### **[Narrabri Gas Project](#)**

---

#### **Objects to this project**

To whom it may concern,

Our Group CSG Free Shoalhaven, Object to this proposal on the following grounds

- \*The is no independent assessment of Santos's Data
- \*This project does not comply with New South Wales Guidelines
- \*The is no water damage costing
- \*No health Damage Costing
- \*It underestimates the greenhouse gas cost
- \*It shows very optimistic Gas Prices
- \*It has wildly low production costs stated
- \*There is no pipeline costing
- \*This industry has no social license
- \* These wells will all leak at some stage and further add to the climates change

In this day and age of climate change and with it water and food scarcity we believe that it is negligent to put our future water and food supplies at risk.

We ask that you reject this proposal using the precautionary principal in favor of renewable energy sources as we have already witnessed the environmental damage by Santos to our natural environment with its toxic spills and feel that enough is enough

Patricia Kahler  
Secretary of CSG Free Shoalhaven
