RE: MLC Burwood Electrical Supply

Dear Juha

WSP has calculated electrical demand estimate for proposed development at Methodist Ladies College Burwood. This estimate is based on architectural drawings supplied by BVN Donovan Hill Architects and the expected building services associated with this development.

WSP has notified Ausgrid 16/01/2014 of the proposed electrical demand increase. Ausgrid has responded to this notification indicating that the required power can be provided from the existing kiosk substation in Grantham Street. Some internal modifications to the kiosk may be required. See Ausgrid correspondence attached.

Patrick Riakos

Subject: Preliminary Enquiry for MLC school in Burwood

Dear Patrick,

It would be best to take supply from S47466. The LV configuration is 400/400/800 amps. The board can be uprated to 400/400/1200 Amps and the existing transformer uprated if necessary. The consumer mains will also have to be upgraded. According to the plan you have provided there are two supplies to MLC western side of Park Road. This indicates a supply from S35694. Please note that the establishment should have only one supply connection. Please contact me on 0408968133 regarding your proposal

You may also want to complete an application form (NECF03) with loading details so that we can formally advise the connection details.

Regards,

Cedric
