Title:	SSD6519 Dolwendee Quarry Post Approval Matter: Construction Traffic Management Plan
Relevant Condition/s:	Schedule 3, Condition 18
Purpose:	Endorsement of process for staging of CTMP

Dear Jarrod,

Upper Hunter Holdings (UHH) is the Applicant and operator for the approved Dolwendee Quarry (SSD6519). We write to seek DPHI endorsement of our planned approach to updating the CTMP following approval of MOD1 on 27 March 2026.

With MOD1 now approved Upper Hunter Holdings (UHH) is addressing post approval consent matters and preparing to commence construction. UHH proposes to commence construction of the haul road from the inside out, ahead of works on the Golden Highway intersection.

As such we are proposing to stage the CTMP to match the proposed construction staging as follows:

- Stage 1 CTMP – internal haul road from quarry to property boundary (internal works)
- Stage 2 CTMP – the intersection with Golden Highway (under a WAD).

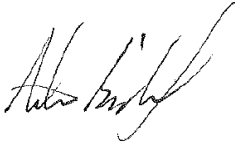

Stage 1 is relatively simple as the internal haul road works have only minor interaction with the Golden Highway so traffic management issues are limited.

Stage 2 involves establishment of the WAD, detailing the design, and likely considerable engagement with TfNSW not only on design but also on the approach to construction traffic management for the intersection. This would all be addressed in the Stage 2 CTMP. We have now notified TfNSW to commence the WAD process but this will take time.

We are therefore seeking the Department's endorsement of this staged approach to the CTMP. Our intention is to submit Stage 1 CTMP first for endorsement, likely within the next week or so.

I note that with agreement of the Secretary, the Consent permits staging of management plans (refer Schedule 5, Condition 4).

Regards,

Adam Bishop
