Dear Sally,

Subject: SSD-65529236 SEAR's Extension Request

On behalf of EMKC³, we are formally requesting an extension to the SEARs in relation to SSD-65529236.

Noting we are working through various complexities associated with the proposal to resolve DPHI's ToA comments coupled with ongoing engagement / co-design coordination with Sydney Water, we are seeking an extension of 4-months (from the date of the SEARs lapsing) to ensure that the proposal addresses all feedback and therefore can proceed through to exhibition.

Whilst we should have a package with your Team by the end of December, the 4-months will account for any extended timing to coordinate the exhibition package once submitted and reviewed by your Team.

We trust the above is suffice; however, can provide more definitive timing of deliverables if need be.

Thanks and we look forward to hearing from you.

Regards,

Pawan Lala
