AMENDMENTS

1. The proposed local road is designed to connect with existing local roads, ensuring a continuous through connection without any dead-ends.
2. The streets aligned with a single landowner, ensuring consistency in street edge and streamlining construction timing and delivery.
3. Consolidating irregular lots under individual landowners creates opportunities and usable developable area.
4. Absence of indicative layout plan roads owned by private landowners creates opportunities for pedestrian through-site connections and flexibility in designing pedestrian-friendly streets linking to Thompson Creek.
5. Reduction of roads provide additional developable area for development and creates opportunity for building orientation, varying scales and public open space.

LEGEND

- As per Bradfield City Center Master Plan
- As per Fig.10 of the Amendment Discussion Paper
- Proposed Amendment
- Removed ILP Roads

MASTER PLAN

The suggested amendments have reviewed by a traffic engineer and takes into consideration: Intersetion distances, intersection priority, possible slip lanes and avoidance of rat runs whilst maintaining through site access.
