APPENDIX A – CONSULTATION DOCUMENTS

AUSTRAL ARCHAEOLOGY

BERRIMA GAOL

2-4 ARGYLE STREET, BERRIMA

VOLUME 2: CONSULTATION APPENDICIES

Prepared for Blue Sox Investments Pty Ltd

17 February 2025

Final

Acknowledgement of Country

We respect and acknowledge the First Nations Peoples of the lands and waterways on which we live and work, their rich cultural heritage, and their deep connection to Country, and we acknowledge their Elders past and present.

Cultural warning

Aboriginal and Torres Strait Islander readers are advised that this report may contain images or names of First Nations people who have passed away.

The logo for Austral Archaeology features a stylized white icon of a person standing on a rock, with a circular element above their head. To the right of this icon, the word "AUSTRAL" is written in a large, bold, white sans-serif font. Below "AUSTRAL", the word "ARCHAEOLOGY" is written in a smaller, white sans-serif font.

11 June 2024

To whom it may concern,

**RE: STAGE 1: REQUEST FOR INFORMATION FOR BERRIMA GAOL
ADAPTIVE REUSE DEVELOPMENT, 2-4 ARGYLE STREET, BERRIMA NSW**

You are receiving this letter due to your organisation being named as a reasonable source of information that must be contacted as under Stage 1 (section 4.1.2) of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (Department of Environment, Climate Change and Water NSW 2010) (Consultation Requirements). Section 4.1.2 of the Consultation Requirements makes it the proponent's responsibility to ascertain, from reasonable sources of information such as your organisation, the names of Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects and / or places.

Austral Archaeology Pty Ltd (Austral) has been engaged by Blue Sox Investments Pty Ltd to undertake an Aboriginal Cultural Heritage Assessment (ACHA) in the development of a new boutique hotel, multi-level carpark, function centre, restaurant, café, and other tourism related facilities and amenities on the site of the Berrima Gaol. The proposed ACHA is being undertaken to determine the impact the development will have on Aboriginal cultural material, as part of a State Significance Development (SSD) under Part 5 of the *Environmental Planning and Assessment Act 1979*. The study area is situated within the Wingecarribee Shire Local Government Area (LGA) and is located within the boundaries of the Illawarra Local Aboriginal Land Council (ILALC).

Austral Archaeology will actively seek to involve stakeholders in decisions regarding Aboriginal cultural heritage issues arising from this project. Additional information will be made available to all registered Aboriginal stakeholders as the project progresses. The purpose of consultation is to assist the proposed applicant in the preparation of an Aboriginal Heritage Impact Permit and to assist the Director General of the Department of Premier and Cabinet (DPC) in his or her consideration and determination of the application. The project will be undertaken in accordance with the *National Parks and Wildlife Act 1974*.

In accordance with the consultation requirements, please note that the relevant client contact for this project is:

Jonathan Thompson
Blue Sox Investments Pty Ltd
27 Australia St
Camperdown NSW 2050
Email: jthompson@bluesox.com.au

All correspondence regarding provision of names and contact details of Aboriginal people who may hold cultural knowledge relevant to the project should be provided in writing to:

Lindsay Costigan
Senior Archaeologist
Austral Archaeology
601 Princes Highway
Yallah, NSW 2530
Phone: 0402 745 058

Email: lindsayc@australarch.com.au

Austral requests that your organisation supplies the requested information by 25 June 2024. Please note that under Section 4.1.6 of the Consultation Requirements, Austral is required to supply details of all registered Aboriginal stakeholders to Heritage NSW and ILALC.

Please do not hesitate to contact me for further information at the contact details provided below.

Cc: Consultation <consultation@australarch.com.au>; Lindsay Costigan <lindsayc@australarch.com.au>

OFFICIAL

Your ref: 24039 Our ref: SR24/979

Dear Zoe Bosevski

Thank you for your search request, please find your results below.

Search Results

The results provided are based on the information you supplied and are derived from a search of the following Tribunal databases:

- 0. Schedule of Native Title Determination Applications
 - 1. Register of Native Title Claims
 - 2. Native Title Determinations
 - 3. Indigenous Land Use Agreements (Registered and notified)

Results for overlapping native title matters in NSW:

Feature ID	Tenure	Cadastral Data As At	Feature Area SqKm	Overlapping Native Title Feature				
				NNTT File Number	Name	Category	Overlap Area SqKm	% Selected Feature
102/DP1283819	NSW GOVERNMENT	8/03/2024	0.0190	NI2014/001	Gundungurra Area Agreement	ILUAs	0.0190	100.00%

For more information about the Tribunal's registers or to search the registers yourself and obtain copies of relevant register extracts, please visit our [website](#).

Information on native title claims and freehold land can also be found on the Tribunal's website here: [Native title claims and freehold land](#).

Please note: There may be a delay between a native title determination application being lodged in the Federal Court and its transfer to the Tribunal. As a result, some native title determination applications recently filed with the Federal Court may not appear on the Tribunal's databases.

The search results are based on analysis against external boundaries of applications only. Native title applications commonly contain exclusions clauses which remove areas from within the external boundary. To determine whether the areas described are in fact subject to claim, you need to refer to the "Area covered by claim" section of the relevant Register Extract or Schedule Extract and any maps attached.

Search results and the existence of native title

Please note that the enclosed information from the Register of Native Title Claims and/or the Schedule of Applications is **not** confirmation of the existence of native title in this area. This cannot be confirmed until the Federal Court makes a determination that native title does or does not exist in relation to the area. Such determinations are registered on the National Native Title Register.

The Tribunal accepts no liability for reliance placed on enclosed information

The enclosed information has been provided in good faith. Use of this information is at your sole risk. The National Native Title Tribunal makes no representation, either express or implied, as to the accuracy or suitability of the information enclosed for any particular purpose and accepts no liability for use of the information or reliance placed on it.

If you have any further queries, please do not hesitate to contact us via GeospatialSearch@NNTT.gov.au

Regards,

To Whom It May Concern,

Catchment Management Authorities are listed in Section 4.1.2 (g) of the Aboriginal cultural heritage consultation requirements for proponents 2010, under Part 6, National Parks and Wildlife Act 1974 as a source of information to obtain the “names of Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects and/or places”. We understand that with the loss of Catchment Management Authorities in NSW such requests are likely to be forwarded to Local Land Services.

South East Local Land Services is a partner with many Aboriginal communities in the region on natural resource management (NRM) projects. We are not, however, the primary source for contacting or managing contact lists for Aboriginal communities or persons that may inform or provide comment on planning issues. Currently we do not coordinate or administer any Aboriginal reference group for our region.

Please direct your enquiry to Heritage NSW via the central mailbox heritagemailbox@environment.nsw.gov.au.

Kind regards,

per Rebecca Bradley

Dear Lindsay,

RE: STAGE 1: REQUEST FOR INFORMATION FOR BERRIMA GAOL ADAPTIVE REUSE DEVELOPMENT, 2-4 ARGYLE STREET, BERRIMA NSW (Ref: 24039)

We refer to your email dated 11 June 2024 seeking the identification of Aboriginal organisations and people who may have an interest in the proposed development of a new boutique hotel, multi-level carpark, function centre, restaurant, café, and other tourism related facilities and amenities on the site of the Berrima Gaol, NSW.

Under Section 170 of the Aboriginal Land Rights Act 1983 (NSW), the Office of the Registrar is required to maintain the Register of Aboriginal Owners (RAO) for New South Wales. A search of the RAO has shown that there are currently no Registered Aboriginal Owners in the project area.

We suggest you contact the Illawarra Local Aboriginal Land Council on (02) 4226 3338 or via email admin@ilalc.org.au as they may wish to participate.

Yours sincerely

Rachel Rewiri
Project Officer
Office of the Registrar, Aboriginal Land Rights Act 1983

3 July 2024

**RE: STAGE 1: NOTIFICATION OF BERRIMA GAOL ADAPTIVE REUSE
DEVELOPMENT, 2-4 ARGYLE STREET, BERRIMA, NEW SOUTH WALES**

To whom it may concern,

Austral Archaeology Pty Ltd (Austral) has been engaged by Blue Sox Investments Pty Ltd to undertake an Aboriginal Cultural Heritage Assessment (ACHA) in regard to the development of a new boutique hotel, multi-level carpark, function centre, restaurant, café, and other tourism related facilities and amenities on the site of the Berrima Gaol at 2-4 Argyle Street, Berrima, New South Wales (NSW), Lot 102 DP1283819 (the study area).

Austral has been made aware that you or your organisation may hold cultural knowledge relevant to determining the significance of Aboriginal objects and / or places. As part of Stage 1 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (Department of Environment, Climate Change and Water NSW 2010) [the Consultation Requirements], you are invited to register your interest to participate in the ACHA and consultation process for the project.

The proposed ACHA is being undertaken to determine the impact the development will have on Aboriginal cultural material, as part of a State Significance Development (SSD) under Part 5 of the *Environmental Planning and Assessment Act 1979*. The study area is situated within the Wingecarribee Shire Local Government Area (LGA) and is located within the boundaries of the Illawarra Local Aboriginal Land Council (ILALC).

Austral will actively seek to involve stakeholders in decisions regarding Aboriginal cultural heritage issues arising from this project. Additional information will be made available to all registered Aboriginal stakeholders as the project progresses. The purpose of consultation is to assist the proposed applicant in the preparation of an Aboriginal Heritage Impact Permit (AHIP) and to assist the Director General of the Department of Premier and Cabinet in his or her consideration and determination of the application. The project will be undertaken in accordance with the *National Parks and Wildlife Act 1974*.

In accordance with the consultation requirements, please note that the relevant client contact for this project is:

Jonathan Thompson
Blue Sox Investments Pty Ltd
27 Australia Street
Camperdown, NSW 2050
Email: jthompson@bluesox.com.au

All correspondence regarding provision of names and contact details of Aboriginal people who may hold cultural knowledge relevant to the project should be provided in writing to:

Lindsay Costigan
Senior Archaeologist
Austral Archaeology
601 Princes Highway
Yallah, NSW 2530
Phone: 0402 745 058

Email: lindsayc@australarch.com.au

As a person or organisation who may hold cultural knowledge relevant to determining the significance of Aboriginal objects and / or places associated with the proposed project, you are invited to register your interest to be consulted for this project. The closing date for registrations of interest is 17 July 2024.

Please note that under Section 4.1.6 of the Consultation Requirements, Austral is required, unless you state otherwise, to supply details of all registered Aboriginal stakeholders to Heritage NSW and ILALC as part of this process.

Please do not hesitate to contact me for further information at the contact details provided below.

Yours sincerely,

Zoe Bosevski
Archaeologist
Austral Archaeology Pty Ltd
ABN: 55 629 860 975
M: 0421 454 355

APPENDIX A3 – INCOMING

Berrimah goal

Glenda <kgchalker@bigpond.com>

Fri 16-Aug-24 2:33 PM

To: Zoe Bosevski <zoeb@australarch.com.au>

Zoe,

I have only received the registered letter from you yesterday in regards to this project.

I would still like to register Cubbitch Barta for this project despite it being late.

I not only have traditional connection but historical as well. My 2greats grandfather was a stone mason in Berrima, and quite likely had a hand in building the goal

Thanking you

Glenda Chalker

Delivery has failed to these recipients or groups:

goobahchts@gmail.com

Your message couldn't be delivered. Despite repeated attempts to contact the recipient's email system it didn't respond.

Contact the recipient by some other means (by phone, for example) and ask them to tell their email admin that it appears that their email system isn't accepting connection requests from your email system. Give them the error details shown below. It's likely that the recipient's email admin is the only one who can fix this problem.

For more information and tips to fix this issue see this article: <https://go.microsoft.com/fwlink/?LinkId=389361>.

Diagnostic information for administrators:

RE: 24039 Berrima Gaol ACHA Stage 1.2

Phil Khan <philipkhan.acn@live.com.au>

Thu 11-Jul-24 11:39 AM

To: Zoe Bosevski <zoeb@australarch.com.au>

Hi Zoe,

Could you please remove our group from this project.

Thank you

Kind Regards

Phil Khan – Director

P 0451068480

Action Required

Policy violation or system
error

How to Fix It

Check the "Reported Error" from the "Error Details" section shown below for more information about the problem. The error might tell you what went wrong and how to fix it. For example, if the error states that the message was blocked due to a potential virus or because the message was too large, try sending the message again without attachments.

If you're not able to fix the problem, it's likely that only the recipient's email admin can fix it. Contact the recipient by some other means (by phone, for example) and ask them to tell their email admin about the problem. Give them the "Reported Error" from the "Error Details" section below.

Was this helpful? [Send feedback to Microsoft.](#)

More Info for Email Admins

Status code: 550 5.0.350

The error reported by the receiving server wasn't specific enough to determine the exact nature of the problem. These errors often indicate the message violates a security or policy setting configured on the recipient's email servers.

If the sender is unable to fix the problem by modifying their message, then it's likely a problem that only the recipient's email admin can fix. Try the following:

Check the error for information about the problem - The "Reported Error" returned by the external email server can be found in the "Error Details" section below. This error might tell you what went wrong and provide clues for how to fix it. For example, if the error states the message was rejected due a Sender Policy Framework (SPF) issue, then you'll have to work with your domain registrar to correctly configure your domain's SPF records.

Check the error for information about where the problem is happening - For example, look for a domain name like contoso.com. A domain name in the error might suggest who is responsible for the error. It could be the recipient's email server, or it could be a third-party service that your organization or the recipient's organization is using to process or filter email messages.

If you can't fix the problem, contact the responsible party's email admin - Give them the error code and error message from this non-delivery report (NDR) to help them troubleshoot the issue. For security or policy violation issues, it might be sufficient for them to just add your sending IP addresses or domain to their allowed senders list.

It's likely that only the recipient's email admin can fix the problem. Unfortunately, it's unlikely Office 365 Support will be able to help with these kinds of externally reported errors.

APPENDIX A6 – STAGE 2: PRESENTATION OF PROJECT INFORMATION

To whom it may concern,

**RE: STAGE 2 – PROJECT INFORMATION FOR ABORIGINAL
CULTURAL HERITAGE ASSESSMENT OF BERRIMA GAOL
ADAPTIVE REUSE DEVELOPMENT, 2-4 ARGYLE STREET,
BERRIMA, NEW SOUTH WALES**

You are receiving this letter as a registered Aboriginal party (RAP) for the Berrima Gaol Adaptive Reuse Development project.

The following information is being provided to comply with Stage 2 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (DECCW 2010a) [the Consultation Requirements]. This letter relates explicitly to sections 4.2.1 to 4.2.4 of the Consultation Requirements.

PROJECT DETAILS

Austral Archaeology Pty Ltd (Austral) is undertaking an Aboriginal Cultural Heritage Assessment (ACHA) on behalf of Blue Sox Investments Pty Ltd (the proponent) at 2-4 Argyle Street, Berrima, New South Wales (NSW) [the study area], within the Wingecarribee Shire Local Government Area. The development will include a new boutique hotel, multi-level carpark, function centre, café, and other tourism related facilities and amenities on the site of the Berrima Gaol.

This ACHA is being conducted to fulfill Requirement 19 of an SSD-SSI Planning Secretary's Environmental Assessment Requirements (SEARs) for the Berrima Hotel and Tourist Facility (SSD-66876472).

Based upon these requirements, Austral Archaeology Pty Ltd (Austral) has been engaged by Blue Sox Investments Pty Ltd to conduct an ACHA; this process may result in an application for an Aboriginal Heritage Impact Permit (AHIP) being made.

This letter presents the proposed project information and initiates arrangements for the dissemination of further details to RAPs during the assessment process.

The location of the study area is outlined in Figure 1 and Figure 2, with proposed works shown on Figure 3.

IMPACT ASSESSMENT PROCESS

The following impact assessment process will be completed in accordance with the following guidelines:

- Consultation Requirements.
- *Code of Practice for Archaeological Investigations of Aboriginal Objects in NSW* (DECCW 2010b) [the Code of Practice]; and,
- Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (Office of Environment and Heritage 2011).

BACKGROUND RESEARCH

In addition to contacting the relevant Aboriginal and non-Aboriginal stakeholders, background research will include searches of public statutory and non-statutory heritage databases and research into relevant archives as an essential aid to determining the significance of the study area to local Aboriginal people.

The following database and register searches will be undertaken:

- A search of the Aboriginal Heritage Information Management System (AHIMS) database. This database lists known sites of archaeological and cultural significance to Aboriginal people. This will confirm the nature of any Aboriginal cultural values which may be present within the study area. This search will also highlight sites and places of significance in the immediate vicinity. This search may also provide previously produced reports or studies of relevance to this study.
- A search for items or places of Aboriginal significance on non-statutory heritage databases. These include the Register of the National Estate and the National Trust.
- A search of the Local Environmental Plan for Aboriginal heritage places or issues.
- A search for items or places of Aboriginal significance on statutory heritage databases. These include the National Heritage List and the State Heritage Register.

In addition to these database searches, research into the ethnographic, environmental, archaeological and Aboriginal historical context will also be undertaken. The results of this research will assist in determining the potential for Aboriginal archaeological and cultural material and places to be located within the study area.

The background research will need to be collated and précised into a succinct yet thorough literature review. This written work will form a vital part of subsequent methodological development and production of the final cultural heritage assessment report.

CONSULTATION WITH ABORIGINAL STAKEHOLDERS

The Aboriginal people of Australia are part of the oldest and continuous-living cultures in human history. Aboriginal people's cultural heritage is recognised and valued as a unique and essential component of the identity of all Australian people.

Aboriginal cultural heritage provides the essential links between the past and the present – it is a crucial part of Aboriginal people's cultural identity, connection and sense of belonging to Country.

The objective of community consultation is to ensure Aboriginal people have the opportunity to improve assessment outcomes by:

- Providing relevant information about the cultural significance and values of the Aboriginal objects and/or place.
- Influencing the design of the methodology to assess the cultural and scientific significance of Aboriginal objects and places.
- Actively contributing to the development of cultural heritage management options and recommendations for any Aboriginal objects and/or places within the proposed project area; and,
- Providing feedback and commenting on draft assessment reports before the proponent submits them to Heritage NSW.

This information pack forms part of the ongoing consultation with Aboriginal stakeholders, being Stage 2 of the Consultation Requirements, which requires consultants to present information about the

proposed project to stakeholders. This will also be accompanied by a Stage 3 methodology document, which will thoroughly detail the proposed testing methodology.

Based on this project's size and complexity, information about the project will be disseminated in writing only.

INVESTIGATION OF ABORIGINAL OBJECTS AND / OR PLACES

The field survey was conducted on 11 July 2024 by Lindsay Costigan (Senior Archaeologist) and Zoe Bosevski (Archaeologist), and Aboriginal Representative Duncan Falk of Duncan Falk Consultancy. The archaeological survey of the study area was undertaken in accordance with requirements 5 to 10 of the Code of Practice to identify any previously unknown Aboriginal objects, sites, or places.

An archaeological testing program will need to be completed in accordance with requirements 14 to 17 of the Code of Practice; this program will aim to collect information about the nature and extent of sub-surface Aboriginal objects. The testing program will contribute to an understanding of site characteristics and local and regional prehistory that can be used to inform mitigation measures for the project.

Further information on the methodology to be used for the archaeological survey and test excavation program will be presented as part of the Stage 3 documentation.

REPORTING

Austral will produce an ACHA that will include but not be limited to:

- Introduction
- Planning Framework
- Aboriginal Background
- Site Analysis
- Maps and Site Plans etc.
- Aboriginal Stakeholder Consultation
- Assessment of Archaeological Potential
- Archaeological Testing Analysis and Results
- Impact Assessment
- Conclusions and Management Recommendations

As part of Stage 4 of the Consultation Requirements, Aboriginal stakeholders will be provided with the draft ACHA for review and comment. Any comments and responses received by Austral, or the proponent, will be documented in the final ACHA. Austral will respond to all comments received and will outline how these have been considered and/or implemented as part of the final ACHA (DECCW 2010a, p. 6).

PROJECT SCHEDULE

To meet these objectives Heritage NSW has developed four stages of consultation which must be met for each cultural heritage assessment. There are several mandatory timeframes associated with the Consultation Requirements; these are summarised in Table 1 and Table 2.

Table 1 Statutory timeframes for consultation

Stage	Timeframe
Stage 1: Notification of project proposal and registration of interest	14 days
Stage 2: Presentation of information about the proposed project	-
Stage 3: Gathering information about cultural significance.	28 days
Stage 4: Review of the draft cultural heritage assessment report.	28 days

Table 2 Project Milestones, estimated completion dates and status

Stage	Statutory Timeframe (days)	Completion dates	Status
Background research	-	TBD	In progress
Aboriginal consultation			
<i>Stage 1 - Notification of project proposal and registration of interest</i>	14	17 July 2024	Completed
Archaeological Survey	-	11 July 2024	Completed
<i>Stage 2 - Presentation of information about the proposed project</i>	28	29 July 2024	In progress
<i>Stage 3 - Gathering information about cultural significance</i>	28	29 July 2024	In progress
Archaeological testing	-	-	To be completed
ACHA draft report	-	-	To be completed
<i>Stage 4 - Review of ACHA by stakeholders</i>	28	-	To be completed
ACHA finalisation	-	-	To be completed
Approval of AHIP	60	-	To be completed

ROLES, FUNCTIONS AND RESPONSIBILITIES

Section 5 of the Consultation Requirements outlines the roles and responsibilities of the parties that are typically involved in the consultation process. The roles, functions and responsibilities for this project are summarised in Table 3.

Table 3 Roles, responsibilities and functions of parties involved in the project

Party	Roles, Responsibilities and Functions
RAPs	To provide cultural information and feedback on draft methodologies and the ACHA. To participate in meetings and workshops, and fieldwork, when invited.
Austral, on behalf of the proponent	Will consult with RAPs by supplying suitable project information and providing the opportunity for RAPs to provide input into the heritage management process.

As per the Consultation Requirements, Section 3.4 on page 9 states that “[c]onsultation should not be confused with employment”. In line with this, while Austral will ensure that consultation with all RAPs is

undertaken in accordance with the Consultation Guidelines, the proponent is not obliged employ all registered stakeholders for the fieldwork component of this project.

Table 4 outlines the feedback and input process offered to Aboriginal people for each stage of the consultation process.

Table 4 Feedback and input process for stages of the consultation process to be completed

Stage	Expected Feedback
2	Feedback on the project proposal including nature, scope and methodology. Raise any concerns about cultural perspectives or assessment requirements.
3	Contribute to culturally appropriate information-gathering and the research methodology. Provide information that will enable the cultural significance of Aboriginal objects and/or places within the proposed project area. Have input into the development of any cultural heritage management options.
4	Provide feedback on any aspect of the draft ACHA report.

Should you have any questions or queries regarding the design or methods of construction relating to these works, contact information for the proponent is listed below:

To whom it may concern,

**RE: STAGE 2 – PROJECT INFORMATION FOR ABORIGINAL
CULTURAL HERITAGE ASSESSMENT OF BERRIMA GAOL
ADAPTIVE REUSE DEVELOPMENT, 2-4 ARGYLE STREET,
BERRIMA, NEW SOUTH WALES**

You are receiving this letter as a registered Aboriginal party (RAP) for the Berrima Gaol Adaptive Reuse Development project.

The following information is being provided to comply with Stage 2 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (DECCW 2010a) [the Consultation Requirements]. This letter relates explicitly to sections 4.2.1 to 4.2.4 of the Consultation Requirements.

PROJECT DETAILS

Austral Archaeology Pty Ltd (Austral) is undertaking an Aboriginal Cultural Heritage Assessment (ACHA) on behalf of Blue Sox Investments Pty Ltd (the proponent) at 2-4 Argyle Street, Berrima, New South Wales (NSW) [the study area], within the Wingecarribee Shire Local Government Area. The development will include a new boutique hotel, multi-level carpark, function centre, café, and other tourism related facilities and amenities on the site of the Berrima Gaol.

This ACHA is being conducted to fulfill Requirement 19 of an SSD-SSI Planning Secretary's Environmental Assessment Requirements (SEARs) for the Berrima Hotel and Tourist Facility (SSD-66876472).

Based upon these requirements, Austral Archaeology Pty Ltd (Austral) has been engaged by Blue Sox Investments Pty Ltd to conduct an ACHA; this process may result in an application for an Aboriginal Heritage Impact Permit (AHIP) being made.

This letter presents the proposed project information and initiates arrangements for the dissemination of further details to RAPs during the assessment process.

The location of the study area is outlined in Figure 1 and Figure 2, with proposed works shown on Figure 3.

IMPACT ASSESSMENT PROCESS

The following impact assessment process will be completed in accordance with the following guidelines:

- Consultation Requirements.
- *Code of Practice for Archaeological Investigations of Aboriginal Objects in NSW* (DECCW 2010b) [the Code of Practice]; and,
- Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (Office of Environment and Heritage 2011).

BACKGROUND RESEARCH

In addition to contacting the relevant Aboriginal and non-Aboriginal stakeholders, background research will include searches of public statutory and non-statutory heritage databases and research into relevant archives as an essential aid to determining the significance of the study area to local Aboriginal people.

The following database and register searches will be undertaken:

- A search of the Aboriginal Heritage Information Management System (AHIMS) database. This database lists known sites of archaeological and cultural significance to Aboriginal people. This will confirm the nature of any Aboriginal cultural values which may be present within the study area. This search will also highlight sites and places of significance in the immediate vicinity. This search may also provide previously produced reports or studies of relevance to this study.
- A search for items or places of Aboriginal significance on non-statutory heritage databases. These include the Register of the National Estate and the National Trust.
- A search of the Local Environmental Plan for Aboriginal heritage places or issues.
- A search for items or places of Aboriginal significance on statutory heritage databases. These include the National Heritage List and the State Heritage Register.

In addition to these database searches, research into the ethnographic, environmental, archaeological and Aboriginal historical context will also be undertaken. The results of this research will assist in determining the potential for Aboriginal archaeological and cultural material and places to be located within the study area.

The background research will need to be collated and précised into a succinct yet thorough literature review. This written work will form a vital part of subsequent methodological development and production of the final cultural heritage assessment report.

CONSULTATION WITH ABORIGINAL STAKEHOLDERS

The Aboriginal people of Australia are part of the oldest and continuous-living cultures in human history. Aboriginal people's cultural heritage is recognised and valued as a unique and essential component of the identity of all Australian people.

Aboriginal cultural heritage provides the essential links between the past and the present – it is a crucial part of Aboriginal people's cultural identity, connection and sense of belonging to Country.

The objective of community consultation is to ensure Aboriginal people have the opportunity to improve assessment outcomes by:

- Providing relevant information about the cultural significance and values of the Aboriginal objects and/or place.
- Influencing the design of the methodology to assess the cultural and scientific significance of Aboriginal objects and places.
- Actively contributing to the development of cultural heritage management options and recommendations for any Aboriginal objects and/or places within the proposed project area; and,
- Providing feedback and commenting on draft assessment reports before the proponent submits them to Heritage NSW.

This information pack forms part of the ongoing consultation with Aboriginal stakeholders, being Stage 2 of the Consultation Requirements, which requires consultants to present information about the

proposed project to stakeholders. This will also be accompanied by a Stage 3 methodology document, which will thoroughly detail the proposed testing methodology.

Based on this project's size and complexity, information about the project will be disseminated in writing only.

INVESTIGATION OF ABORIGINAL OBJECTS AND / OR PLACES

The field survey was conducted on 11 July 2024 by Lindsay Costigan (Senior Archaeologist) and Zoe Bosevski (Archaeologist), and Aboriginal Representative Duncan Falk of Duncan Falk Consultancy. The archaeological survey of the study area was undertaken in accordance with requirements 5 to 10 of the Code of Practice to identify any previously unknown Aboriginal objects, sites, or places.

An archaeological testing program will need to be completed in accordance with requirements 14 to 17 of the Code of Practice; this program will aim to collect information about the nature and extent of sub-surface Aboriginal objects. The testing program will contribute to an understanding of site characteristics and local and regional prehistory that can be used to inform mitigation measures for the project.

Further information on the methodology to be used for the archaeological survey and test excavation program will be presented as part of the Stage 3 documentation.

REPORTING

Austral will produce an ACHA that will include but not be limited to:

- Introduction
- Planning Framework
- Aboriginal Background
- Site Analysis
- Maps and Site Plans etc.
- Aboriginal Stakeholder Consultation
- Assessment of Archaeological Potential
- Archaeological Testing Analysis and Results
- Impact Assessment
- Conclusions and Management Recommendations

As part of Stage 4 of the Consultation Requirements, Aboriginal stakeholders will be provided with the draft ACHA for review and comment. Any comments and responses received by Austral, or the proponent, will be documented in the final ACHA. Austral will respond to all comments received and will outline how these have been considered and/or implemented as part of the final ACHA (DECCW 2010a, p. 6).

PROJECT SCHEDULE

To meet these objectives Heritage NSW has developed four stages of consultation which must be met for each cultural heritage assessment. There are several mandatory timeframes associated with the Consultation Requirements; these are summarised in Table 1 and Table 2.

Table 1 Statutory timeframes for consultation

Stage	Timeframe
Stage 1: Notification of project proposal and registration of interest	14 days
Stage 2: Presentation of information about the proposed project	-
Stage 3: Gathering information about cultural significance.	28 days
Stage 4: Review of the draft cultural heritage assessment report.	28 days

Table 2 Project Milestones, estimated completion dates and status

Stage	Statutory Timeframe (days)	Completion dates	Status
Background research	-	TBD	In progress
Aboriginal consultation			
<i>Stage 1 - Notification of project proposal and registration of interest</i>	14	17 July 2024	Completed
Archaeological Survey	-	11 July 2024	Completed
<i>Stage 2 - Presentation of information about the proposed project</i>	28	29 July 2024	In progress
<i>Stage 3 - Gathering information about cultural significance</i>	28	29 July 2024	In progress
Archaeological testing	-	-	To be completed
ACHA draft report	-	-	To be completed
<i>Stage 4 - Review of ACHA by stakeholders</i>	28	-	To be completed
ACHA finalisation	-	-	To be completed
Approval of AHIP	60	-	To be completed

ROLES, FUNCTIONS AND RESPONSIBILITIES

Section 5 of the Consultation Requirements outlines the roles and responsibilities of the parties that are typically involved in the consultation process. The roles, functions and responsibilities for this project are summarised in Table 3.

Table 3 Roles, responsibilities and functions of parties involved in the project

Party	Roles, Responsibilities and Functions
RAPs	To provide cultural information and feedback on draft methodologies and the ACHA. To participate in meetings and workshops, and fieldwork, when invited.
Austral, on behalf of the proponent	Will consult with RAPs by supplying suitable project information and providing the opportunity for RAPs to provide input into the heritage management process.

As per the Consultation Requirements, Section 3.4 on page 9 states that “[c]onsultation should not be confused with employment”. In line with this, while Austral will ensure that consultation with all RAPs is

undertaken in accordance with the Consultation Guidelines, the proponent is not obliged employ all registered stakeholders for the fieldwork component of this project.

Table 4 outlines the feedback and input process offered to Aboriginal people for each stage of the consultation process.

Table 4 Feedback and input process for stages of the consultation process to be completed

Stage	Expected Feedback
2	Feedback on the project proposal including nature, scope and methodology. Raise any concerns about cultural perspectives or assessment requirements.
3	Contribute to culturally appropriate information-gathering and the research methodology. Provide information that will enable the cultural significance of Aboriginal objects and/or places within the proposed project area. Have input into the development of any cultural heritage management options.
4	Provide feedback on any aspect of the draft ACHA report.

Should you have any questions or queries regarding the design or methods of construction relating to these works, contact information for the proponent is listed below:

To whom it may concern,

**RE: STAGE 3 – PROJECT METHODOLOGY FOR ABORIGINAL
CULTURAL HERITAGE ASSESSMENT OF BERRIMA GAOL
ADAPTIVE REUSE DEVELOPMENT, 2-4 ARGYLE STREET,
BERRIMA, NEW SOUTH WALES**

You are receiving this letter as a registered Aboriginal party (RAP) for the Berrima Gaol Adaptive Reuse Development project.

The following information is being provided to comply with Stage 3 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (DECCW 2010a) [the Consultation Requirements]. This letter relates explicitly to sections 4.3.1 to 4.3.7 of the Consultation Requirements.

The purpose of this letter is to present the proposed methodology to the RAPs for the preparation of an Aboriginal Cultural Heritage Assessment (ACHA) for the project. You are also requested to supply any cultural information you wish to provide that can assist in the identification of Aboriginal objects or places as part of the assessment process. In accordance with Section 4.3.2 of the Consultation Requirements, RAPs are provided with the opportunity to review and provide feedback on the proposed methodology outlined in this letter. Please supply this feedback to:

Jonathan Thompson

Blue Sox Investments

27 Australia St 1

Camperdown NSW 2050

Email: jthompson@bluesox.com.au

Please provide your feedback, including additional protocols that you wish to be adopted into the information gathering process and assessment methodology by **5pm on 26 August 2024**.

PROPOSED WORKS

The proposed works for this project include a new boutique hotel, multi-level carpark, function centre, café, and other tourism related facilities and amenities on the site of the Berrima Gaol. The location of proposed works is shown on Figure 1.

PRELIMINARY ASSESSMENT

Austral has undertaken a review of documentary sources to understand the Aboriginal heritage values that are likely to occur within the study area.

BACKGROUND

An extensive search of Heritage NSW's Aboriginal Heritage Information Management System (AHIMS) database was conducted on 20 June 2024 (Client service ID: 902654). The search identified

57 Aboriginal archaeological sites within a 5-kilometre search area, centred on the proposed study area (Table 1).

Table 1 AHIMS sites identified within 5 kilometres of the study area

Site Type	Occurrence	Frequency (%)
Artefact	42	73.68%
Potential Archaeological Deposit (PAD)	6	10.53%
Grinding Groove	4	7.02%
Modified Tree	3	5.26%
Artefact, Grinding Groove	1	1.75%
Artefact, Potential Archaeological Deposit (PAD)	1	1.75%
TOTAL	57	100%

The AHIMS search has identified that there are sites located within proximity to the study area; these are identified in Table 2. The location of AHIMS sites in proximity to the study area are outlined in Figure 2.

Table 2 AHIMS sites identified within of in close proximity to the study area

Site Name (AHIMS No.)	Site Features	Site Type	Distance from study area
B 1; (AHIMS No. 52-2-1216)	Artefact	Open Site	165 metres
Wingecarribee Iso Glass; (AHIMS No. 52-1-0389)	Artefact	Open Site	178 metres
WR PAD; (AHIMS No. 52-2-1309)	Artefact	Shelter with Deposit	224 metres
WR 3; (AHIMS No. 52-2-1301)	Artefact	Open Site	498 metres
WR 9; (AHIMS No. 52-2-1307)	Artefact	Open Site	495 metres
WR 4; (AHIMS No. 52-2-1302)	Artefact	Shelter with Deposit	697 metres
WR 8; (AHIMS No. 52-2-1306)	Modified Tree	Open Site	775 metres
WR 5; (AHIMS No. 52-2-1303)	Artefact	Shelter with Deposit	943 metres

PREDICTIVE STATEMENTS

Based upon the AHIMS search results and a preliminary review of ethnographic, soils, geology, landform, disturbance and resource information pertinent to the study area, Austral has prepared a series of site prediction statements that have been used to inform the project methodology, these are outlined in Table 3.

Table 3 **Aboriginal site prediction statements**

Site Type	Predictive Statement
Aboriginal ceremony and dreaming sites	Ceremony and dreaming sites can only be identified by Aboriginal people with the knowledge of such areas. None are currently recorded within the study area.
Aboriginal places	While there are no currently recorded Aboriginal places within the study area, the nature of this site type being in close proximity to water and gently undulating landforms, means Aboriginal places may occur in the area's immediate vicinity. Based on prior studies located in surrounding areas close to the study area, there have been many recorded Aboriginal camp sites in the area, which may increase the potential of the study area to contain locations of Aboriginal places from the prior use of the land by Aboriginal people for their semi/and or permanent camps.
Artefact sites	Many artefact sites have been recorded in proximity to the study area, both being in prior camp sites and shelters of nearby locations. The study area is however largely disturbed, so much of the artefact sites that remained within the grounds may have already been lost/damaged/removed. However, the potential of Aboriginal artefact sites and contact archaeology potentially remain in high levels within the grounds given the initial buildings were erected in 1844. Accessibility of Archaeology may however reduce the likelihood of finding such Archaeological remains before the current proposed works.
Axe grinding grooves	Rock outcrops are common in the gorges throughout the region. Grinding groove sites have been identified in proximity to the study area. They may be present if suitable sandstone outcrops or boulders are present. Several grinding grooves have been recorded in proximity to the study area.
Burials	There are no recorded burials within or near the study area, therefore there is a low chance of this site type being located during works. However, given that executions were carried out very early on within this site, there may be remnants of these executions still located within the grounds of the site. However, this has not been recorded.
Modified trees	Scarred trees have been recorded within proximity to the study area, although during the survey, no remaining trees within the study area were identified as being modified trees.
Potential archaeological deposits (PADs)	The study area is in the immediate vicinity of Wingecarribee River. The area within the study area that is adjacent to the river is an elevated terrace. Due to terraces being understood as high potential landforms, it was determined to have moderate potential and archaeological testing is suggested in this area. Furthermore, close proximity to water also increases the given archaeological potential of a site or study area. Therefore, potential PADs are likely to be present within the study area. Many PADs have been recorded in proximity to the study area.
Rock Shelters with art and/or deposit	Rock outcrops are common in the gorges throughout the region. Rock shelters may be present if suitable sandstone outcrops or boulders are present. However highly unlikely in the study area given it is inland within the flat, cleared land of the Berrima township.
Shell middens	Shell middens may be present due to the proximity of the Wingecarribee River which is a tributary of the larger Nepean and Hawkesbury rivers of the region. No shell middens are currently recorded within the study area.

Site Type	Predictive Statement
Stone quarries	Rock outcrops are common in the escarpment bordering the Wingecarribee shire. The historic Mount Gibraltar Quarries are located within 10 km of the study area. However, no stone quarry is in or within close proximity to the Berrima Gaol site.

ASSESSMENT FRAMEWORK

The following section outlined the assessment methodology to be employed in the preparation of the ACHA.

SURVEY METHODOLOGY

An archaeological survey was conducted on 10 July 2024 by Lindsay Costigan (Senior Archaeologist), Zoe Bosevski (Archaeologist), and one RAP, Duncan Falk of Duncan Falk Consultancy, in attendance.

The survey conformed with requirements 5 to 10 of the *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW 2010b) [the Code of Practice]. The method employed during the survey was aimed at recording all (or a representative sample of all) evidence of Aboriginal land use that was visible on the surface. An assessment of the likelihood of material traces of Aboriginal land use being present under the ground surface (potential archaeological deposits) was also completed. The survey was completed in accordance with a sampling strategy that ensured all landforms that may be impacted by the project were inspected.

Recording during the survey consisted of both photographic and written recording techniques. Representative photographs of survey units and landforms were taken, and all photographs included a graded metric scale. Where Aboriginal objects were identified during the survey, their diagnostic attributes were recorded, and each object was photographed (as per requirements 6 and 7 of the Code of Practice). No Aboriginal objects were recorded during the survey.

Survey units were inspected using pedestrian transects following the methodology set out in Burke and Smith (2004, pp. 74–80). The survey documented the conditions present to assess the effectiveness of the survey. The following aspects of the survey were recorded:

- Visibility and exposure for each survey unit.
- Landform and general soil location for each survey unit.
- Land surface and vegetation conditions encountered during the survey.
- Survey coverage in accordance with Requirement 9 of the Code of Practice.
- Where Aboriginal objects are / were identified, the spatial extent of direct evidence and the physical boundaries of each site were / will be determined.
- The extent of disturbances and an assessment of the integrity of known or likely Aboriginal sites.

All survey data was collected using Global Positioning System (GPS) enabled devices and the Map Grid of Australia (94) coordinate system.

SURVEY RESULTS

The pedestrian survey identified three landforms are present within the study area, these consist of a flat which Berrima Gaol is built upon, adjacent terrace, and southern slope. The flat and its immediate surrounds are considered low potential and are not recommended for archaeological testing. The small terrace located on the western border of the site and the southern garden area slope, however, are recommended for testing due to their undisturbed nature and proximity to the Wingecarribee River.

Areas of archaeological potential are shown on Figure 3.

The site inspection acted to ground-truth the results of a desktop analysis of landforms and disturbance present within the study area and serve as the basis for the differentiation of areas of archaeological potential marked by the low, moderate and high archaeological potential. Areas of PAD identified during the site survey will therefore be the focus for testing in accordance with the Code of Practice for either parts of the PAD that have no visibility or to determine the extent of identified sites.

TEST EXCAVATION SAMPLING STRATEGY

The objectives of the test excavations are to characterise the nature, extent and archaeological significance of Aboriginal objects which may associated with areas of PAD present within the study area.

In accordance with Requirement 15b and based on the methodology outlined in the preceding section for the differentiation of PADs, Austral has developed a sampling strategy that will be utilised for the investigation of those areas identified to have archaeological potential within the study area.

FRAMEWORK FOR SAMPLING

The test excavations will consist of the excavation of 11 test pits, which will be placed in areas identified as moderate potential in order to sample all parts of identified PADs which are at risk of harm from proposed works. As required, the test excavation program may also provide additional information relating to the nature, extent and distribution of sub-surface Aboriginal objects within the study area. The location of the proposed test pits is shown on Figure 4.

Our test excavation methodology is based on the Code of Practice which states that all “test excavations must be excavated using hand tools only” and “the first excavation [pit] must be excavated in 5 [centimetre] spits at each area – either PAD or site – being investigated. Based on the evidence of the first excavation [pit], 10 [centimetre] spits or sediment profile/stratigraphic excavation (whichever is smaller) may then be implemented” (DECCW 2010b, p. 26). The Code of Practice is also clear on how many test pits should be excavated and their placement.

The test excavation will conform with Requirement 16 of the Code of Practice. This will include:

- The hand excavation of 500-millimetre by 500-millimetre test pits in areas considered to have high or moderate archaeological sensitivity. These pits have been placed on an approximate 20-metre grid across landforms with moderate archaeological potential confirmed during site survey.
- All excavation will be conducted by hand, and the excavation of initial test pits will proceed in 50-millimetres spits. Based on the results of the initial test pits, subsequent test pits will be excavated either in 100-millimetre spits or by stratigraphic unit, depending on which unit is smaller.
- Recording of each test pit will be conducted during excavation using either printed pro forma or digital pro forma stored on an electronic tablet.
- 100% of excavated potential artefact bearing deposit will be sieved using 5-millimetre screens. Austral has allowed for dry sieving as part of the excavation program. Dependant on the soils encountered and site conditions, material may need to be wet sieved. Water for the sieving station would be provided by a water tanker and pump.
- A pit will be expanded by excavation of an additional 500-millimetre by 500-millimetre pit at 5- or 10-metre interval in a cardinal direction of, or immediately adjacent to the original pit if a high density of artefacts and/or unique artefact(s) and/or cultural feature is identified. The

direction and distance of expansion will be guided by the location of artefact(s) and/or feature(s) identified in the original pit and based on discussion between archaeologists and Aboriginal stakeholders in the field. The total volume of expansion pits is not to exceed 2 metres², and additional expansion pits are not to be excavated outward once the nature of the site has been clearly demonstrated.

- In the event that modern disturbance or contamination is identified to a degree whereby it has likely displaced or wholly removed Aboriginal objects which may have been present, a discussion will be held with Aboriginal stakeholders on site to determine whether the test pit should be moved or abandoned. The overall sampling strategy may be adjusted to remove any such test pits as long as the testing program is able to demonstrate that it has confirmed the nature and extent of the archaeological deposit associated with the relevant PAD.
- Artefacts will be collected from the sieves and bagged according to excavation pit provenance. Each test pit will be backfilled to the best of our ability with the sieved material excavated from the pits at the conclusion of the testing program.

ARTEFACT COLLECTION AND STORAGE

Collection and salvage of all artefacts will be undertaken according to the following methodology.

- Each artefact identified during the subsurface testing will be relocated and temporarily stored at Austral's Yallah office located at 601 Princes Highway, Yallah, NSW 2530. After the submission of the final subsurface testing report, the collected Aboriginal material will be taken to a location within or near to the study area previously agreed upon by the proponent and all registered Aboriginal stakeholders for reburial in accordance with requirements of the Code of Practice.
- The landowner on whose property this area may be located is to be approached for consent to return the Aboriginal archaeological material to site. If the site where the artefacts are to be returned is situated upon Crown Land, then the appropriate authority managing the Local Government Area is to be approached and informed.
- A representative of Austral, all RAPs and Blue Sox Investments Pty Ltd are to be invited to attend/participate in the return of artefacts to Country.
- A GPS recording of the location is to be made and recorded as a new Aboriginal site. A site card will be completed, and the resulting site registered on Heritage NSW's AHIMS database.

Should it be necessary to move these artefacts at a later date, it is a requirement that a Care and Control agreement be completed as part of any AHIP application. This will require the identified Aboriginal stakeholders and Heritage NSW to be consulted over a suitable relocation site. This new site will also require GPS coordinates and all necessary details to be recorded with Heritage NSW's AHIMS database.

CONSULTATION

As part of Stage 3 of the Consultation Requirements, Aboriginal stakeholders are to be provided with a 28-day period to have the opportunity to review and provide feedback on the proposed methodology.

As a registered stakeholder, we ask that you review the above methodology and provide feedback regarding:

- Any known Aboriginal objects or areas of cultural significance that are present within the study area.
- Any information regarding nearby places of cultural significance. This includes places of social, spiritual and cultural value.

- Any culturally relevant information that may affect the archaeological interpretation of the site.
- Any protocols that you wish to be implemented or changed regarding the excavation strategy.
- Any protocols that you wish to be implemented or changed regarding the collection and reburial or conservation of any identified cultural heritage.
- Any management recommendations, such as ways to avoid or mitigate harm to the Aboriginal cultural heritage on site.

The information provided will be used to understand the context and values of Aboriginal objects and / or places located within the study area. The information will be used as the basis of assessment for heritage values and to better inform the archaeological assessment of significance.

CULTURALLY SENSITIVE INFORMATION

Austral would like to take this opportunity to invite RAPs to provide culturally appropriate information. All cultural information that is provided as part of the consultation process will be recorded in the consultation log and will be discussed in the ACHA. RAPs must advise Austral if the information they are providing is to be considered confidential.

When providing this information, RAPs must detail the nature of the sensitivity and how this knowledge is to be restricted. Based on this information, Austral will formulate a methodology to record this information that is consistent with the values communicated. Where culturally sensitive information has been disclosed, the ACHA will identify this on the front cover. Alternatively, the ACHA may be finalised in a restricted and unrestricted format for private and public dissemination. All documentation and recordings will be stored securely.

CARE AND CONTROL OF ABORIGINAL OBJECTS

As stated previously, all cultural material will be temporarily stored at Austral's Yallah office. Once this has been analysed, all cultural material will be subject to one of the following processes:

- The Care and Control of Aboriginal objects will be negotiated with RAPs as part of the consultation process included in the ACHA. This will be enacted into a Care and Control Agreement.
- Aboriginal objects may also be returned to Country and reburied as soon as practicable in accordance with requirements 16b and 26 of Code of Practice.

Austral requests that RAPs provide any preferences they have for the care and control of Aboriginal objects as part of the review of this document.

REPORTING

Austral will complete an ACHA that includes the results of the Aboriginal community consultation undertaken. The ACHA will consist of:

- Introduction
- Planning Framework
- Aboriginal Background
- Site Analysis
- Maps and Site Plans etc.

- Aboriginal Stakeholder Consultation including all submissions received from RAPs and responses to the issues raised.
- Assessment of Archaeological Potential
- Archaeological Testing Analysis and Results
- Impact Assessment
- Conclusions and Management Recommendations

Please take the time to read this letter and feel free to contact me on the number provided below should you wish to raise any concerns or if you require additional information.

Should you have any cultural concerns, perspectives or assessment requirements, please do not hesitate to contact me for further information at the contact details provided below.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Z. Bosevski".

24039 Berrima Gaol Stage 2 UPDATED Letter ZB 20240805.pdf; 24039 Berrima Gaol Stage 3 UPDATED Letter ZB 20240710.pdf;

Good afternoon,

Please find attached the updated Stage 2: Project Information and Stage 3: Project Methodology letters for the Aboriginal Cultural Heritage Assessment (ACHA) being conducted at 2-4 Argyle Street, Berrima, NSW, the site of Berrima Gaol. During testing of the site, asbestos was detected in areas for the proposed archaeological excavation. To avoid the contamination, the proposed test pit locations have been altered. To provide adequate time for your review, please note that the deadline for any feedback has been amended to **COB (5 pm) 4 September 2024**.

Kind regards,

Zoe Bosevski

Archaeologist

Subject: Berrimah goal

Zoe,

I have only received the registered letter from you yesterday in regards to this project.

I would still like to register Cubbitch Barta for this project despite it being late.

I not only have traditional connection but historical as well. My 2greats grandfather was a stone mason in Berrima, and quite likely had a hand in building the goal

Thanking you

Glenda Chalker

To whom it may concern,

**RE: STAGE 2 – PROJECT INFORMATION FOR ABORIGINAL
CULTURAL HERITAGE ASSESSMENT OF BERRIMA GAOL
ADAPTIVE REUSE DEVELOPMENT, 2-4 ARGYLE STREET,
BERRIMA, NEW SOUTH WALES**

You are receiving this letter as a registered Aboriginal party (RAP) for the Berrima Gaol Adaptive Reuse Development project.

The following information is being provided to comply with Stage 2 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (DECCW 2010a) [the Consultation Requirements]. This letter relates explicitly to sections 4.2.1 to 4.2.4 of the Consultation Requirements.

PROJECT DETAILS

Austral Archaeology Pty Ltd (Austral) is undertaking an Aboriginal Cultural Heritage Assessment (ACHA) on behalf of Blue Sox Investments Pty Ltd (the proponent) at 2-4 Argyle Street, Berrima, New South Wales (NSW) [the study area], within the Wingecarribee Shire Local Government Area. The development will include a new boutique hotel, multi-level carpark, function centre, café, and other tourism related facilities and amenities on the site of the Berrima Gaol.

This ACHA is being conducted to fulfill Requirement 19 of an SSD-SSI Planning Secretary's Environmental Assessment Requirements (SEARs) for the Berrima Hotel and Tourist Facility (SSD-66876472).

Based upon these requirements, Austral Archaeology Pty Ltd (Austral) has been engaged by Blue Sox Investments Pty Ltd to conduct an ACHA; this process may result in an application for an Aboriginal Heritage Impact Permit (AHIP) being made.

This letter presents the proposed project information and initiates arrangements for the dissemination of further details to RAPs during the assessment process.

The location of the study area is outlined in Figure 1 and Figure 2, with proposed works shown on Figure 3.

IMPACT ASSESSMENT PROCESS

The following impact assessment process will be completed in accordance with the following guidelines:

- Consultation Requirements.
- *Code of Practice for Archaeological Investigations of Aboriginal Objects in NSW* (DECCW 2010b) [the Code of Practice]; and,
- Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (Office of Environment and Heritage 2011).

BACKGROUND RESEARCH

In addition to contacting the relevant Aboriginal and non-Aboriginal stakeholders, background research will include searches of public statutory and non-statutory heritage databases and research into relevant archives as an essential aid to determining the significance of the study area to local Aboriginal people.

The following database and register searches will be undertaken:

- A search of the Aboriginal Heritage Information Management System (AHIMS) database. This database lists known sites of archaeological and cultural significance to Aboriginal people. This will confirm the nature of any Aboriginal cultural values which may be present within the study area. This search will also highlight sites and places of significance in the immediate vicinity. This search may also provide previously produced reports or studies of relevance to this study.
- A search for items or places of Aboriginal significance on non-statutory heritage databases. These include the Register of the National Estate and the National Trust.
- A search of the Local Environmental Plan for Aboriginal heritage places or issues.
- A search for items or places of Aboriginal significance on statutory heritage databases. These include the National Heritage List and the State Heritage Register.

In addition to these database searches, research into the ethnographic, environmental, archaeological and Aboriginal historical context will also be undertaken. The results of this research will assist in determining the potential for Aboriginal archaeological and cultural material and places to be located within the study area.

The background research will need to be collated and précised into a succinct yet thorough literature review. This written work will form a vital part of subsequent methodological development and production of the final cultural heritage assessment report.

CONSULTATION WITH ABORIGINAL STAKEHOLDERS

The Aboriginal people of Australia are part of the oldest and continuous-living cultures in human history. Aboriginal people's cultural heritage is recognised and valued as a unique and essential component of the identity of all Australian people.

Aboriginal cultural heritage provides the essential links between the past and the present – it is a crucial part of Aboriginal people's cultural identity, connection and sense of belonging to Country.

The objective of community consultation is to ensure Aboriginal people have the opportunity to improve assessment outcomes by:

- Providing relevant information about the cultural significance and values of the Aboriginal objects and/or place.
- Influencing the design of the methodology to assess the cultural and scientific significance of Aboriginal objects and places.
- Actively contributing to the development of cultural heritage management options and recommendations for any Aboriginal objects and/or places within the proposed project area; and,
- Providing feedback and commenting on draft assessment reports before the proponent submits them to Heritage NSW.

This information pack forms part of the ongoing consultation with Aboriginal stakeholders, being Stage 2 of the Consultation Requirements, which requires consultants to present information about the

proposed project to stakeholders. This will also be accompanied by a Stage 3 methodology document, which will thoroughly detail the proposed testing methodology.

Based on this project's size and complexity, information about the project will be disseminated in writing only.

INVESTIGATION OF ABORIGINAL OBJECTS AND / OR PLACES

The field survey was conducted on 11 July 2024 by Lindsay Costigan (Senior Archaeologist) and Zoe Bosevski (Archaeologist), and Aboriginal Representative Duncan Falk of Duncan Falk Consultancy. The archaeological survey of the study area was undertaken in accordance with requirements 5 to 10 of the Code of Practice to identify any previously unknown Aboriginal objects, sites, or places.

An archaeological testing program will need to be completed in accordance with requirements 14 to 17 of the Code of Practice; this program will aim to collect information about the nature and extent of sub-surface Aboriginal objects. The testing program will contribute to an understanding of site characteristics and local and regional prehistory that can be used to inform mitigation measures for the project.

Further information on the methodology to be used for the archaeological survey and test excavation program will be presented as part of the Stage 3 documentation.

REPORTING

Austral will produce an ACHA that will include but not be limited to:

- Introduction
- Planning Framework
- Aboriginal Background
- Site Analysis
- Maps and Site Plans etc.
- Aboriginal Stakeholder Consultation
- Assessment of Archaeological Potential
- Archaeological Testing Analysis and Results
- Impact Assessment
- Conclusions and Management Recommendations

As part of Stage 4 of the Consultation Requirements, Aboriginal stakeholders will be provided with the draft ACHA for review and comment. Any comments and responses received by Austral, or the proponent, will be documented in the final ACHA. Austral will respond to all comments received and will outline how these have been considered and/or implemented as part of the final ACHA (DECCW 2010a, p. 6).

PROJECT SCHEDULE

To meet these objectives Heritage NSW has developed four stages of consultation which must be met for each cultural heritage assessment. There are several mandatory timeframes associated with the Consultation Requirements; these are summarised in Table 1 and Table 2.

Table 1 Statutory timeframes for consultation

Stage	Timeframe
Stage 1: Notification of project proposal and registration of interest	14 days
Stage 2: Presentation of information about the proposed project	-
Stage 3: Gathering information about cultural significance.	28 days
Stage 4: Review of the draft cultural heritage assessment report.	28 days

Table 2 Project Milestones, estimated completion dates and status

Stage	Statutory Timeframe (days)	Completion dates	Status
Background research	-	TBD	In progress
Aboriginal consultation			
<i>Stage 1 - Notification of project proposal and registration of interest</i>	14	17 July 2024	Completed
Archaeological Survey	-	11 July 2024	Completed
<i>Stage 2 - Presentation of information about the proposed project</i>	28	29 July 2024	In progress
<i>Stage 3 - Gathering information about cultural significance</i>	28	29 July 2024	In progress
Archaeological testing	-	-	To be completed
ACHA draft report	-	-	To be completed
<i>Stage 4 - Review of ACHA by stakeholders</i>	28	-	To be completed
ACHA finalisation	-	-	To be completed
Approval of AHIP	60	-	To be completed

ROLES, FUNCTIONS AND RESPONSIBILITIES

Section 5 of the Consultation Requirements outlines the roles and responsibilities of the parties that are typically involved in the consultation process. The roles, functions and responsibilities for this project are summarised in Table 3.

Table 3 Roles, responsibilities and functions of parties involved in the project

Party	Roles, Responsibilities and Functions
RAPs	To provide cultural information and feedback on draft methodologies and the ACHA. To participate in meetings and workshops, and fieldwork, when invited.
Austral, on behalf of the proponent	Will consult with RAPs by supplying suitable project information and providing the opportunity for RAPs to provide input into the heritage management process.

As per the Consultation Requirements, Section 3.4 on page 9 states that “[c]onsultation should not be confused with employment”. In line with this, while Austral will ensure that consultation with all RAPs is

undertaken in accordance with the Consultation Guidelines, the proponent is not obliged employ all registered stakeholders for the fieldwork component of this project.

Table 4 outlines the feedback and input process offered to Aboriginal people for each stage of the consultation process.

Table 4 Feedback and input process for stages of the consultation process to be completed

Stage	Expected Feedback
2	Feedback on the project proposal including nature, scope and methodology. Raise any concerns about cultural perspectives or assessment requirements.
3	Contribute to culturally appropriate information-gathering and the research methodology. Provide information that will enable the cultural significance of Aboriginal objects and/or places within the proposed project area. Have input into the development of any cultural heritage management options.
4	Provide feedback on any aspect of the draft ACHA report.

Should you have any questions or queries regarding the design or methods of construction relating to these works, contact information for the proponent is listed below:

Jonathan Thompson
 Blue Sox Investments
 27 Australia St
 Camperdown NSW 2050

To whom it may concern,

**RE: STAGE 3 – PROJECT METHODOLOGY FOR ABORIGINAL
CULTURAL HERITAGE ASSESSMENT OF BERRIMA GAOL
ADAPTIVE REUSE DEVELOPMENT, 2-4 ARGYLE STREET,
BERRIMA, NEW SOUTH WALES**

You are receiving this letter as a registered Aboriginal party (RAP) for the Berrima Gaol Adaptive Reuse Development project.

The following information is being provided to comply with Stage 3 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (DECCW 2010a) [the Consultation Requirements]. This letter relates explicitly to sections 4.3.1 to 4.3.7 of the Consultation Requirements.

The purpose of this letter is to present the proposed methodology to the RAPs for the preparation of an Aboriginal Cultural Heritage Assessment (ACHA) for the project. You are also requested to supply any cultural information you wish to provide that can assist in the identification of Aboriginal objects or places as part of the assessment process. In accordance with Section 4.3.2 of the Consultation Requirements, RAPs are provided with the opportunity to review and provide feedback on the proposed methodology outlined in this letter. Please supply this feedback to:

Jonathan Thompson

Blue Sox Investments

27 Australia St 1

Camperdown NSW 2050

Email: jthompson@bluesox.com.au

Please provide your feedback, including additional protocols that you wish to be adopted into the information gathering process and assessment methodology by **5pm on 4 September 2024**.

PROPOSED WORKS

The proposed works for this project include a new boutique hotel, multi-level carpark, function centre, café, and other tourism related facilities and amenities on the site of the Berrima Gaol. The location of proposed works is shown on Figure 1.

PRELIMINARY ASSESSMENT

Austral has undertaken a review of documentary sources to understand the Aboriginal heritage values that are likely to occur within the study area.

BACKGROUND

An extensive search of Heritage NSW's Aboriginal Heritage Information Management System (AHIMS) database was conducted on 20 June 2024 (Client service ID: 902654). The search identified

57 Aboriginal archaeological sites within a 5-kilometre search area, centred on the proposed study area (Table 1).

Table 1 AHIMS sites identified within 5 kilometres of the study area

Site Type	Occurrence	Frequency (%)
Artefact	42	73.68%
Potential Archaeological Deposit (PAD)	6	10.53%
Grinding Groove	4	7.02%
Modified Tree	3	5.26%
Artefact, Grinding Groove	1	1.75%
Artefact, Potential Archaeological Deposit (PAD)	1	1.75%
TOTAL	57	100%

The AHIMS search has identified that there are sites located within proximity to the study area; these are identified in Table 2. The location of AHIMS sites in proximity to the study area are outlined in Figure 2.

Table 2 AHIMS sites identified within of in close proximity to the study area

Site Name (AHIMS No.)	Site Features	Site Type	Distance from study area
B 1; (AHIMS No. 52-2-1216)	Artefact	Open Site	165 metres
Wingecarribee Iso Glass; (AHIMS No. 52-1-0389)	Artefact	Open Site	178 metres
WR PAD; (AHIMS No. 52-2-1309)	Artefact	Shelter with Deposit	224 metres
WR 3; (AHIMS No. 52-2-1301)	Artefact	Open Site	498 metres
WR 9; (AHIMS No. 52-2-1307)	Artefact	Open Site	495 metres
WR 4; (AHIMS No. 52-2-1302)	Artefact	Shelter with Deposit	697 metres
WR 8; (AHIMS No. 52-2-1306)	Modified Tree	Open Site	775 metres
WR 5; (AHIMS No. 52-2-1303)	Artefact	Shelter with Deposit	943 metres

PREDICTIVE STATEMENTS

Based upon the AHIMS search results and a preliminary review of ethnographic, soils, geology, landform, disturbance and resource information pertinent to the study area, Austral has prepared a series of site prediction statements that have been used to inform the project methodology, these are outlined in Table 3.

Table 3 **Aboriginal site prediction statements**

Site Type	Predictive Statement
Aboriginal ceremony and dreaming sites	Ceremony and dreaming sites can only be identified by Aboriginal people with the knowledge of such areas. None are currently recorded within the study area.
Aboriginal places	While there are no currently recorded Aboriginal places within the study area, the nature of this site type being in close proximity to water and gently undulating landforms, means Aboriginal places may occur in the area's immediate vicinity. Based on prior studies located in surrounding areas close to the study area, there have been many recorded Aboriginal camp sites in the area, which may increase the potential of the study area to contain locations of Aboriginal places from the prior use of the land by Aboriginal people for their semi/and or permanent camps.
Artefact sites	Many artefact sites have been recorded in proximity to the study area, both being in prior camp sites and shelters of nearby locations. The study area is however largely disturbed, so much of the artefact sites that remained within the grounds may have already been lost/damaged/removed. However, the potential of Aboriginal artefact sites and contact archaeology potentially remain in high levels within the grounds given the initial buildings were erected in 1844. Accessibility of Archaeology may however reduce the likelihood of finding such Archaeological remains before the current proposed works.
Axe grinding grooves	Rock outcrops are common in the gorges throughout the region. Grinding groove sites have been identified in proximity to the study area. They may be present if suitable sandstone outcrops or boulders are present. Several grinding grooves have been recorded in proximity to the study area.
Burials	There are no recorded burials within or near the study area, therefore there is a low chance of this site type being located during works. However, given that executions were carried out very early on within this site, there may be remnants of these executions still located within the grounds of the site. However, this has not been recorded.
Modified trees	Scarred trees have been recorded within proximity to the study area, although during the survey, no remaining trees within the study area were identified as being modified trees.
Potential archaeological deposits (PADs)	The study area is in the immediate vicinity of Wingecarribee River. The area within the study area that is adjacent to the river is an elevated terrace. Due to terraces being understood as high potential landforms, it was determined to have moderate potential and archaeological testing is suggested in this area. Furthermore, close proximity to water also increases the given archaeological potential of a site or study area. Therefore, potential PADs are likely to be present within the study area. Many PADs have been recorded in proximity to the study area.
Rock Shelters with art and/or deposit	Rock outcrops are common in the gorges throughout the region. Rock shelters may be present if suitable sandstone outcrops or boulders are present. However highly unlikely in the study area given it is inland within the flat, cleared land of the Berrima township.
Shell middens	Shell middens may be present due to the proximity of the Wingecarribee River which is a tributary of the larger Nepean and Hawkesbury rivers of the region. No shell middens are currently recorded within the study area.

Site Type	Predictive Statement
Stone quarries	Rock outcrops are common in the escarpment bordering the Wingecarribee shire. The historic Mount Gibraltar Quarries are located within 10 km of the study area. However, no stone quarry is in or within close proximity to the Berrima Gaol site.

ASSESSMENT FRAMEWORK

The following section outlined the assessment methodology to be employed in the preparation of the ACHA.

SURVEY METHODOLOGY

An archaeological survey was conducted on 10 July 2024 by Lindsay Costigan (Senior Archaeologist), Zoe Bosevski (Archaeologist), and one RAP, Duncan Falk of Duncan Falk Consultancy, in attendance.

The survey conformed with requirements 5 to 10 of the *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW 2010b) [the Code of Practice]. The method employed during the survey was aimed at recording all (or a representative sample of all) evidence of Aboriginal land use that was visible on the surface. An assessment of the likelihood of material traces of Aboriginal land use being present under the ground surface (potential archaeological deposits) was also completed. The survey was completed in accordance with a sampling strategy that ensured all landforms that may be impacted by the project were inspected.

Recording during the survey consisted of both photographic and written recording techniques. Representative photographs of survey units and landforms were taken, and all photographs included a graded metric scale. Where Aboriginal objects were identified during the survey, their diagnostic attributes were recorded, and each object was photographed (as per requirements 6 and 7 of the Code of Practice). No Aboriginal objects were recorded during the survey.

Survey units were inspected using pedestrian transects following the methodology set out in Burke and Smith (2004, pp. 74–80). The survey documented the conditions present to assess the effectiveness of the survey. The following aspects of the survey were recorded:

- Visibility and exposure for each survey unit.
- Landform and general soil location for each survey unit.
- Land surface and vegetation conditions encountered during the survey.
- Survey coverage in accordance with Requirement 9 of the Code of Practice.
- Where Aboriginal objects are / were identified, the spatial extent of direct evidence and the physical boundaries of each site were / will be determined.
- The extent of disturbances and an assessment of the integrity of known or likely Aboriginal sites.

All survey data was collected using Global Positioning System (GPS) enabled devices and the Map Grid of Australia (94) coordinate system.

SURVEY RESULTS

The pedestrian survey identified three landforms are present within the study area, these consist of a flat which Berrima Gaol is built upon, adjacent terrace, and southern slope. The flat and its immediate surrounds are considered low potential and are not recommended for archaeological testing. The small terrace located on the western border of the site and the southern garden area slope, however, are recommended for testing due to their undisturbed nature and proximity to the Wingecarribee River.

Areas of archaeological potential are shown on Figure 3.

The site inspection acted to ground-truth the results of a desktop analysis of landforms and disturbance present within the study area and serve as the basis for the differentiation of areas of archaeological potential marked by the low, moderate and high archaeological potential. Areas of PAD identified during the site survey will therefore be the focus for testing in accordance with the Code of Practice for either parts of the PAD that have no visibility or to determine the extent of identified sites.

TEST EXCAVATION SAMPLING STRATEGY

The objectives of the test excavations are to characterise the nature, extent and archaeological significance of Aboriginal objects which may associated with areas of PAD present within the study area.

In accordance with Requirement 15b and based on the methodology outlined in the preceding section for the differentiation of PADs, Austral has developed a sampling strategy that will be utilised for the investigation of those areas identified to have archaeological potential within the study area.

FRAMEWORK FOR SAMPLING

The test excavations will consist of the excavation of 8 test pits, which will be placed in areas identified as moderate potential in order to sample all parts of identified PADs which are at risk of harm from proposed works. An area of moderate potential in the north-west of the site has tested positive for asbestos and benzopyrene contamination, and thus will not include any testing in this area. A copy of the environmental scientist's contamination report is available upon request. As required, the test excavation program may also provide additional information relating to the nature, extent and distribution of sub-surface Aboriginal objects within the study area. The location of the proposed test pits is shown on Figure 4.

Our test excavation methodology is based on the Code of Practice which states that all "test excavations must be excavated using hand tools only" and "the first excavation [pit] must be excavated in 5 [centimetre] spits at each area – either PAD or site – being investigated. Based on the evidence of the first excavation [pit], 10 [centimetre] spits or sediment profile/stratigraphic excavation (whichever is smaller) may then be implemented" (DECCW 2010b, p. 26). The Code of Practice is also clear on how many test pits should be excavated and their placement.

The test excavation will conform with Requirement 16 of the Code of Practice. This will include:

- The hand excavation of 500-millimetre by 500-millimetre test pits in areas considered to have high or moderate archaeological sensitivity. These pits have been placed on an approximate 20-metre grid across landforms with moderate archaeological potential confirmed during site survey.
- All excavation will be conducted by hand, and the excavation of initial test pits will proceed in 50-millimetres spits. Based on the results of the initial test pits, subsequent test pits will be excavated either in 100-millimetre spits or by stratigraphic unit, depending on which unit is smaller.
- Recording of each test pit will be conducted during excavation using either printed pro forma or digital pro forma stored on an electronic tablet.
- 100% of excavated potential artefact bearing deposit will be sieved using 5-millimetre screens. Austral has allowed for dry sieving as part of the excavation program. Dependant on the soils encountered and site conditions, material may need to be wet sieved. Water for the sieving station would be provided by a water tanker and pump.

- A pit will be expanded by excavation of an additional 500-millimetre by 500-millimetre pit at 5- or 10-metre interval in a cardinal direction of, or immediately adjacent to the original pit if a high density of artefacts and/or unique artefact(s) and/or cultural feature is identified. The direction and distance of expansion will be guided by the location of artefact(s) and/or feature(s) identified in the original pit and based on discussion between archaeologists and Aboriginal stakeholders in the field. The total volume of expansion pits is not to exceed 2 metres², and additional expansion pits are not to be excavated outward once the nature of the site has been clearly demonstrated.
- In the event that modern disturbance or contamination is identified to a degree whereby it has likely displaced or wholly removed Aboriginal objects which may have been present, a discussion will be held with Aboriginal stakeholders on site to determine whether the test pit should be moved or abandoned. The overall sampling strategy may be adjusted to remove any such test pits as long as the testing program is able to demonstrate that it has confirmed the nature and extent of the archaeological deposit associated with the relevant PAD.
- Artefacts will be collected from the sieves and bagged according to excavation pit provenance. Each test pit will be backfilled to the best of our ability with the sieved material excavated from the pits at the conclusion of the testing program.

ARTEFACT COLLECTION AND STORAGE

Collection and salvage of all artefacts will be undertaken according to the following methodology.

- Each artefact identified during the subsurface testing will be relocated and temporarily stored at Austral's Yallah office located at 601 Princes Highway, Yallah, NSW 2530. After the submission of the final subsurface testing report, the collected Aboriginal material will be taken to a location within or near to the study area previously agreed upon by the proponent and all registered Aboriginal stakeholders for reburial in accordance with requirements of the Code of Practice.
- The landowner on whose property this area may be located is to be approached for consent to return the Aboriginal archaeological material to site. If the site where the artefacts are to be returned is situated upon Crown Land, then the appropriate authority managing the Local Government Area is to be approached and informed.
- A representative of Austral, all RAPs and Blue Sox Investments Pty Ltd are to be invited to attend/participate in the return of artefacts to Country.
- A GPS recording of the location is to be made and recorded as a new Aboriginal site. A site card will be completed, and the resulting site registered on Heritage NSW's AHIMS database.

Should it be necessary to move these artefacts at a later date, it is a requirement that a Care and Control agreement be completed as part of any AHIP application. This will require the identified Aboriginal stakeholders and Heritage NSW to be consulted over a suitable relocation site. This new site will also require GPS coordinates and all necessary details to be recorded with Heritage NSW's AHIMS database.

CONSULTATION

As part of Stage 3 of the Consultation Requirements, Aboriginal stakeholders are to be provided with a 28-day period to have the opportunity to review and provide feedback on the proposed methodology.

As a registered stakeholder, we ask that you review the above methodology and provide feedback regarding:

- Any known Aboriginal objects or areas of cultural significance that are present within the study area.
- Any information regarding nearby places of cultural significance. This includes places of social, spiritual and cultural value.
- Any culturally relevant information that may affect the archaeological interpretation of the site.
- Any protocols that you wish to be implemented or changed regarding the excavation strategy.
- Any protocols that you wish to be implemented or changed regarding the collection and reburial or conservation of any identified cultural heritage.
- Any management recommendations, such as ways to avoid or mitigate harm to the Aboriginal cultural heritage on site.

The information provided will be used to understand the context and values of Aboriginal objects and / or places located within the study area. The information will be used as the basis of assessment for heritage values and to better inform the archaeological assessment of significance.

CULTURALLY SENSITIVE INFORMATION

Austral would like to take this opportunity to invite RAPs to provide culturally appropriate information. All cultural information that is provided as part of the consultation process will be recorded in the consultation log and will be discussed in the ACHA. RAPs must advise Austral if the information they are providing is to be considered confidential.

When providing this information, RAPs must detail the nature of the sensitivity and how this knowledge is to be restricted. Based on this information, Austral will formulate a methodology to record this information that is consistent with the values communicated. Where culturally sensitive information has been disclosed, the ACHA will identify this on the front cover. Alternatively, the ACHA may be finalised in a restricted and unrestricted format for private and public dissemination. All documentation and recordings will be stored securely.

CARE AND CONTROL OF ABORIGINAL OBJECTS

As stated previously, all cultural material will be temporarily stored at Austral's Yallah office. Once this has been analysed, all cultural material will be subject to one of the following processes:

- The Care and Control of Aboriginal objects will be negotiated with RAPs as part of the consultation process included in the ACHA. This will be enacted into a Care and Control Agreement.
- Aboriginal objects may also be returned to Country and reburied as soon as practicable in accordance with requirements 16b and 26 of Code of Practice.

Austral requests that RAPs provide any preferences they have for the care and control of Aboriginal objects as part of the review of this document.

REPORTING

Austral will complete an ACHA that includes the results of the Aboriginal community consultation undertaken. The ACHA will consist of:

- Introduction
- Planning Framework
- Aboriginal Background
- Site Analysis
- Maps and Site Plans etc.
- Aboriginal Stakeholder Consultation including all submissions received from RAPs and responses to the issues raised.
- Assessment of Archaeological Potential
- Archaeological Testing Analysis and Results
- Impact Assessment
- Conclusions and Management Recommendations

Please take the time to read this letter and feel free to contact me on the number provided below should you wish to raise any concerns or if you require additional information.

Should you have any cultural concerns, perspectives or assessment requirements, please do not hesitate to contact me for further information at the contact details provided below.

Yours sincerely,

Zoe Bosevski

Mon 02-Sep-24 11:07 AM

To: Zoe Bosevski <zoe@australarch.com.au>; Consultation <consultation@australarch.com.au>

Hi Zoe,

Thank you for providing the Illawarra Local Aboriginal Land Council (ILALC) with the draft methodology for review and comment. ILALC notes that a survey was undertaken on the 10th of July with Duncan Falk. The methodology was provided to ILALC in August for review and comment, with a review date of the 3rd of September. This was subsequent to the survey being undertaken.

It should be noted that the consultation requirements state: "The registered Aboriginal parties must be given the opportunity to review and provide feedback to the proponent within a minimum of 28 days of the proponent providing the methodology." It is frustrating that we spend time reviewing the methodology for a survey that has already been completed, which defeats the intention of the consultation guidelines. In the future, it would be appreciated if surveys could be conducted after the review period and with consideration of RAP comments.

We do, however, support the proposed test excavation methodology in this case and look forward to working with you to undertake the test excavations.

Kind regards,
Aara

Good afternoon,

Please find attached the updated Stage 2: Project Information and Stage 3: Project Methodology letters for the Aboriginal Cultural Heritage Assessment (ACHA) being conducted at 2-4 Argyle Street, Berrima, NSW, the site of Berrima Gaol. During testing of the site, asbestos was detected in areas for the proposed archaeological excavation. To avoid the contamination, the proposed test pit locations have been altered. To provide adequate time for your review, please note that the deadline for any feedback has been amended to **COB (5 pm) 4 September 2024**.

Kind regards,

Zoe Bosevski

Re: 24039 Berrima Gaol ACHA | Stager 4: Review of ACHA by Stakeholders

From Felicity Smolenaers <Felicitys@australarch.com.au>

Date Fri 1/10/2025 3:07 PM

To Duncan Falk <DuncanFalk@hotmail.com>

Hi Duncan,

I have followed this up with my fellow consultants and the said that client passed on a geotechnical and environmental testing report after the survey that indicated deep fill deposits with significant asbestos in areas of potential identified during the survey. The call to class the potential as shown in the report was made by one of Austral's directors.

Hope this helps and please let me know if you have any further questions

Dear Felicity,

Regarding this site, I believe there were test pits planned to test for PAD, was that testing conducted and what were the results from it?

With thanks,

Duncan

Subject: 24039 Berrima Gaol ACHA | Stager 4: Review of ACHA by Stakeholders

Good afternoon,

You are receiving this email as a registered stakeholder for the Berrima Goal, 2-4 Argyle Street Berrima NSW, Aboriginal Cultural Heritage Assessment (ACHA) [Austral Ref: 24039].

I've attached the draft ACHA below for you to look over.

 [24039 Berrima Gaol ACHA Draftv2.pdf](#)

Austral notes that the window for comments and feedback on the Stage 4 review of this report will close at 5 p.m. on Wednesday, February 5, 2025.

If you have any questions or concerns, please do not hesitate to reach out.

Kind regards,
Felicity Smolenaers

Graduate Archaeologist

To Felicity Smolenaers <Felicitys@australarch.com.au>

Dear Felicity,

Regarding this site, I believe there were test pits planned to test for PAD, was that testing conducted and what were the results from it?

With thanks,

Duncan
