Dear Secretary,

LIVERPOOL RANGE WIND FARM (SSD 6696)

Following lodgement of the Response to Submissions report Epuron has conducted a thorough design review of the Liverpool Range Wind Farm layout, considering energy yield and concerns raised during ongoing consultation. The review has also considered biodiversity, archaeology, noise and visual impacts. As a result of this review Epuron has removed ten (10) wind turbine locations from the proposed layout, reducing the total number of proposed wind turbines to 272.

The wind turbines removed from the proposal have been identified in the table below and on the attached figure.

<i>Turbine No.</i>	<i>Turbine ID</i>	<i>Easting</i>	<i>Northing</i>	<i>Height (m) (AHD)</i>
177	F4-33	775,913	6,483,306	905
213	F3-4	776,009	6,485,046	860
224	G6-3	780,589	6,472,298	740
234	G8-9	782,495	6,460,832	570
236	G7-12	784,240	6,468,049	730
245	G7-14	784,066	6,467,762	711
273	G8-17	782,273	6,459,982	580
277	F9-3	777,425	6,457,733	610
279	F9-4	777,662	6,457,241	600
286	G8-18	782,275	6,460,354	590

Yours sincerely,

ANDREW DURRAN
Executive Director
