Dear Mr Jones,

RE: LIVERPOOL RANGE WIND FARM PROJECT (SSD-6696 MOD-1) – NOTIFICATION OF PRE-CONSTRUCTION MINOR WORKS COMMENCEMENT

Tilt Renewables Australia Pty Ltd as trustee for Liverpool Range Wind Farm Project (**Tilt Renewables**) note that the State Significant Development Consent (SSD-6696) for the Liverpool Range Wind Farm Project (the **Project**) was initially granted on 27 March 2018. Approval to modify this consent (SSD-6696 Mod-1) was provided on 23 October 2024 (**Development Consent**).

This letter provides notification to the Department regarding our commencement of the pre-construction minor works for the Project as defined under the Development Consent. The actions commenced align with previous correspondence to the Department on 28 November 2024 (SSD-6696-PA-3), identifying the intent to undertake physical commencement of the Project.

The relevant works that have commenced include:

- Geotechnical investigations, including drilling for public road upgrades;
- Geotechnical investigations, including drilling for the accommodation camp, substations and operations and maintenance facility sites;
- Enabling works including a temporary laydown area within the development corridor located within the development corridor near the proposed accommodation camp location;
- Installation of a modular temporary site office on the laydown area;
- Cadastral surveys along property boundaries for a subset of freehold land and Crown land located within the development corridor and along a subset of public roads including Pandora Road; and
- Review of existing groundwater sources and commencing procurement of pump infrastructure for installation pending production licence approval(s) under application.

Tilt Renewables advise that these works commenced during November 2024 and some ongoing activities are planned to be complete in mid-2025. The works form a critical component of the overall delivery of the Project, both assisting with the ongoing design processes of the development and to facilitate the pre-construction minor works of the Project.

We note the works have been undertaken in accordance with the conditions of the Development Consent and it remains the ongoing responsibility of Tilt Renewables to ensure that all relevant approvals, certificates and management plans are approved prior to commencing any relevant stages of the Project.

Should you require further information or wish to review the associated documents for these works, please do not hesitate to contact Lisa Simonsen, Environment and Development Planner on 0424 091 295 or by email to: lisa.simonsen@tiltrenewables.com

Yours sincerely,

A handwritten signature in blue ink that reads "Beckett".
