**Moorebank Intermodal Precinct East Stage 1 (SSD-6766)
Best Practice Progress Review 2025, Condition G6**

Dear Mr Howley

I refer to the Best Practice Progress Review 2025 (annual review report) submitted to the Planning Secretary in accordance with the requirements of the Best Practice Review 2017, which was prepared to satisfy Condition G6 of SSD-6766.

I note that the annual review report:

- was reviewed by the Applicant, and no issues were raised;
- includes minimum performance expectations for air emissions from port shuttle locomotives that enter the Import-Export Terminal Facility (IMEX);
- summarises the international and Australian emission standards and best practice technology available to reduce air emissions from locomotives;
- provides a review of progress against the objectives and targets of available best practice; and
- proposes recommendations including a detailed fleet review.

Accordingly, the Department has filed the Best Practice Progress Review 2025, Revision 002, dated 11 July 2025, prepared by Arcadis Australia Pacific Pty Limited, for our information.

Please ensure that all recommendations are implemented and that an update on the status of all recommendations are provided in the next report.

If you wish to discuss the matter further, please contact Hala Fua, who can be contacted at hala.fua@planning.nsw.gov.au.

Yours sincerely

Matt Wood

Department of Planning, Housing and Infrastructure

Acting Team Leader - Social Infrastructure Projects
Infrastructure Management

As nominee of the Planning Secretary
