

29 October 2021

Mr Jim Betts  
Secretary  
NSW Department of Planning, Industry and Environment  
12 Darcy Street  
Parramatta NSW 2150

To Mr Betts,

**One Sydney Harbour, R4A Building – S4.55 MOD Ecological Sustainable Development (ESD) Assessment**

Integrated Solutions is the ESD consultant for the above project and has reviewed the proposed changes associated with the S4.55 as detailed within the 'R4A Design Report' (June 2021). We can confirm that there are no changes that will affect the project's ability to meet the existing BASIX commitments outlined in certificate **649693M\_05**, or other ESD related planning commitments that have been documented within our report, 'Residential Building R4A Barangaroo South, ESD Report – Development Application', dated 05 July 2019.

While the following changes will have a small impact on thermal performance, these changes will have no negative impact on the existing BASIX commitments or other existing ESD related planning commitments.

- The conversion of one x four bedroom apartment on Level 58 to a three bedroom apartment through an amendments of one bedroom to a walk-in-wardrobe.
- Modification to the entry vestibule design.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Peter Zacharia'.

Peter Zacharia
