

01 July 2021

Mr Jim Betts  
Secretary  
NSW Department of Planning, Industry and Environment  
12 Darcy Street  
Parramatta NSW 2150

To Mr Betts,

**One Sydney Harbour, R4B Building – S4.55 MOD Ecological Sustainable Development (ESD) Assessment**

Integrated Solutions is the ESD consultant for the above project and has reviewed the proposed changes associated with the S4.55 as detailed within the 'R4B Design Report' (June 2021). We can confirm that there are no changes that will affect the project's ability to meet the existing BASIX commitments, or other ESD related planning commitments that have been documented within our report, 'Residential Building R4B Barangaroo South, ESD Report – Development Application', dated 11 November 2020.

While the following changes will have a small impact on thermal performance, these changes will have no negative impact on the existing BASIX commitments or other existing ESD related planning commitments.

- Revised entry vestibule design for ground floor lobby
- Alteration to the secondary exit arrangement for the ground level lobby.
- Minor layout changes to the ancillary communal facilities adjacent to the swimming pool.

Your sincerely,

A handwritten signature in black ink, appearing to read "Peter Zacharia".
