I strongly believe that as a heritage-listed 19th century building within Campbell's Cove it is important that Campbell's Stores is able to be seen and appreciated by Sydneysiders and visitors to our city. The proposed new building will limit the view of the building and harbour area as well as the movement of people through the area and around the building. It needs its space to enable people to fully appreciate it and its historic role in the trade carried out in Sydney harbour. It is incredible that all these years after a long battle to save The Rocks area from developers which has lead to its being a major tourist area of Sydney the NSW government is now seeking to have another go at 'developing' the area and as a consequence destroying or severely undermining the historical nature of this place.

Re: Remediation, Renewal and Adaptive Re-Use of Campbell's Stores, The Rocks. SSD 7056

I strongly object to the four-storey high building included as part of the Campbell's Stores Development Application. It is good to see some plans for the Stores' renewal but NOT if the cost is the long-term loss of the heritage setting for this important heritage-listed building. The grounds for my objection are:

- * Campbell's Stores should be visible from all four sides and not partly obscured.
- * Having a building or any other structure between Campbell's Stores and the Park Hyatt Hotel is entirely inappropriate. It is publicly-owned land and should only be used for landscaping and foreshore access.
- * The design of the proposed building undermines and devalues The Rocks' heritage character.
- * The proposed building interrupts the historic streetscape along this section of Hickson Rd and also the heritage of the Campbell's Cove foreshore
- * The proposed building contravenes the 2014 Campbell's Stores Conservation Management Plan which the Heritage Council endorsed (esp. 7.5.5). The plan clearly outlines the area that needs to be retained around Campbell's Stores. This includes the area now proposed for this completely unsympathetic glass building. Approving it would destroy Campbell's Stores historic setting.
- * The Conservation Management Plan states that the one-storey structure that exists on this land now should be removed (see 7.6.1). This was intended to free up the land NOT to create space for a building four times as high.
- * A building like this is contrary to everything that people value about the 1960s and 70s campaign to save The Rocks.
- * We need to correctly address the problems created by past poor decision-making in The Rocks, NOT compound them by allowing the construction of this unsympathetic glass building right next to one of The Rocks' most significant heritage buildings.
