Re: Landscape Consistency with Burrah Park Masterplan

Dear David

The Landscape design has been reviewed against the Burrah Park Masterplan and updates/deviations noted by Ecological Australia Consulting Ecologists are addressed and acknowledged as below

- Additional tree species added to landscape documentation are consistent with the Aerotropolis DCP list
- Additional species are noted as not requiring ongoing monitoring
- Tree locations have been adjusted based on architectural and civil coordination, overall quantities and canopy coverage are consistent with the masterplan

Kind regards,
