LANDSCAPE ARCHITECTURE

SAINT IGNATIUS' COLLEGE, RIVERVIEW
LANE COVE NSW
STAGE 1 - LANDSCAPE DEVELOPMENT APPLICATION
APRIL 2018

LANDSCAPE COLOUR PLAN | HANDBALL COURTS

DESIGN PRINCIPLES

The proposed extension of Stage 1 landscape works aims to maintain a connection to the heritage handball courts at St Ignatius College through the use of subtle interpretive elements, which will complement the contemporary new school extension.

It is proposed to cut the remaining brick wall down to 2.0m height and enclose a new passive recreation / outdoor learning space with tiered sandstone seating walls, with a backdrop of new planting. An inground sandstone pebble inlay is proposed within the garden beds, to reference the alignment of the old brick walls of the other handball courts.

An interpretive signage element is also proposed to be installed to commemorate the original school layout.

KEY PLAN

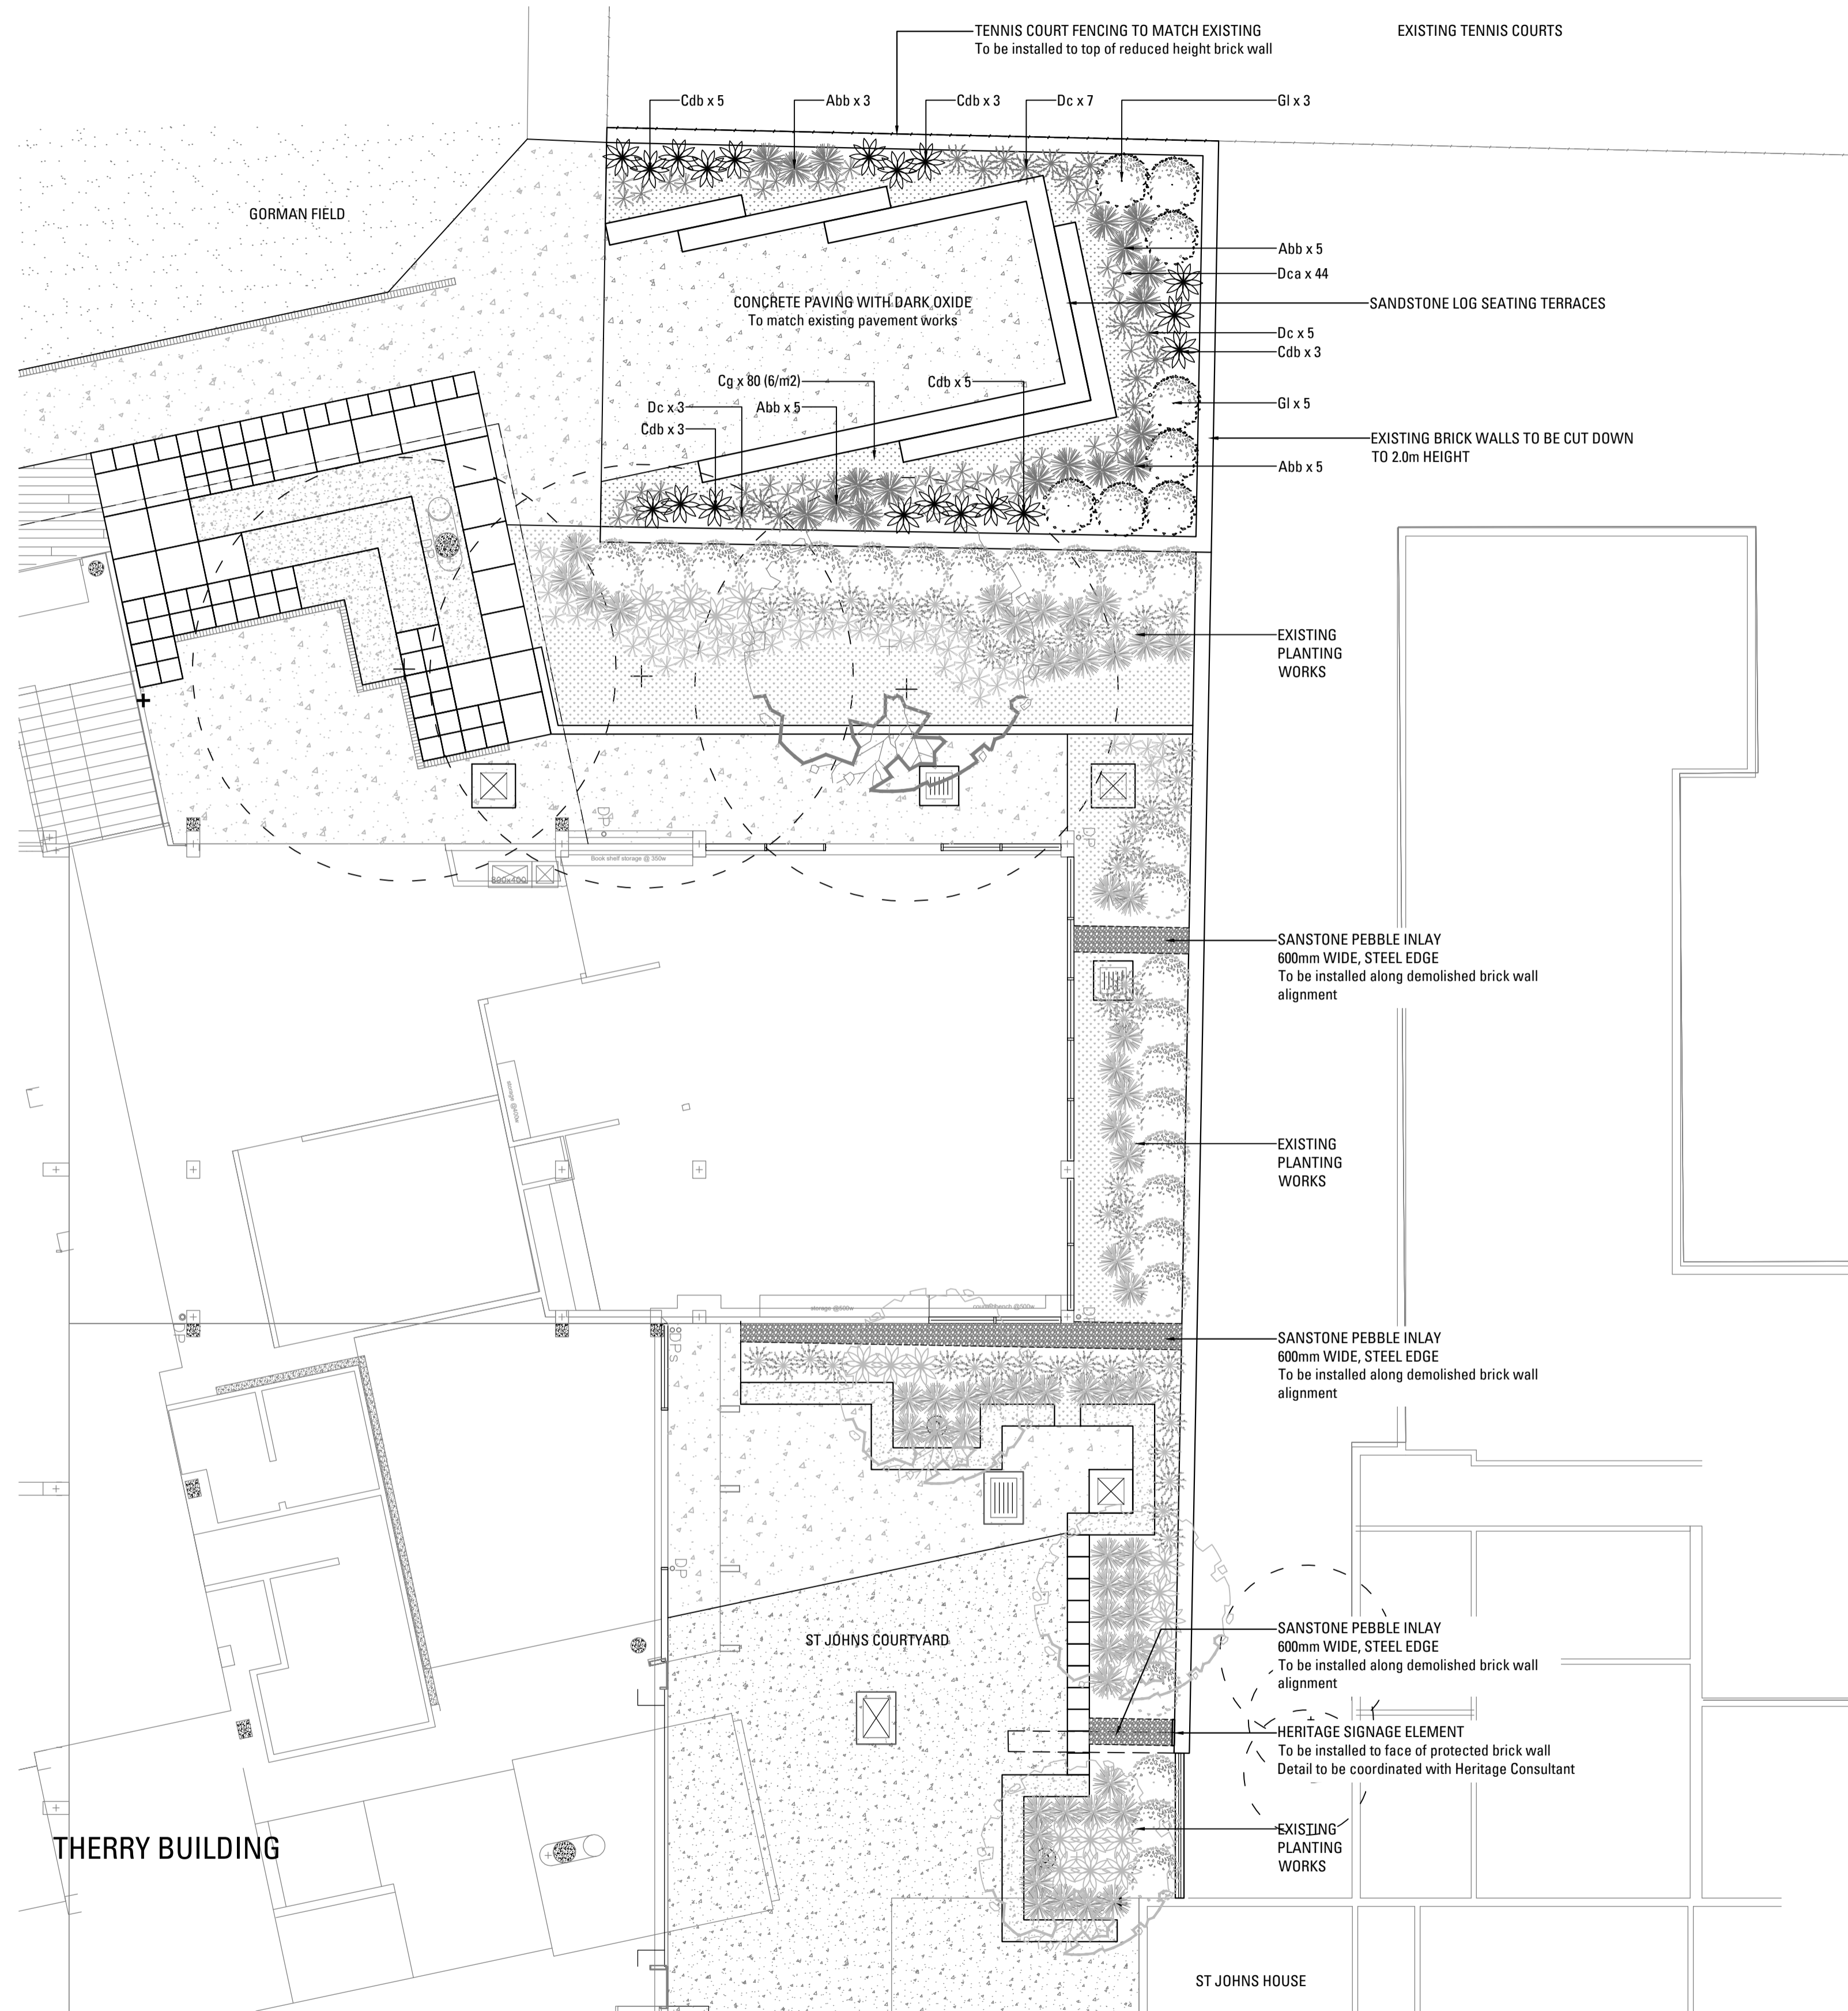

LEGEND

- 01/ Sandstone seating terraces
- 02/ Existing brick walls to be cut down to 2.0m height
- 03/ Garden beds with layered native shrub and groundcover planting
- 04/ Concrete pavement with dark oxide to match new paving works
- 05/ Inground inlay within garden beds along old wall alignments, sandstone pebble between steel edging 600mm wide
- 06/ Interpretive heritage signage element to face of brick wall
- 07/ Tennis court fencing to be installed to top of reduced height brick wall
- 08/ Open interface to Gorman Field
