This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, A Rieber

Address: 5/51 ROBINIA DRIVE
BOWRAL 2576

Date: [redacted] 2017

Attn: Executive Director, Resource Assessments Department of
Planning and Environment
GPO Box 39
Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed,

Blassidy

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

GPO Box 39
Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, M Sturgiou

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road

Attn: Executive Director, Resource Assessments Department of
Planning and Environment
GPO Box 39
Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, Dara Tatray

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed,

Lilian Granada

Name: SUE NOLAN

Address: 221 SPROULES LANE
GLENQUARRY 2576

Date: 10/ 6 /2017

Attn: Executive Director, Resource Assessments Department of
Planning and Environment
GPO Box 39
Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for the following reasons.

1/ The SCOPE of the EIS is inadequate as the Hume Coal Project significantly impacts the Berrima branch line AND the Unanderra to Port Kembla Branch line. Now the Tahmoor mine will operate into the future the extra traffic from Hume will double the amount of coal train traffic on the Unanderra line.

2/ Whilst a GRADE SEPARATION is proposed for the Old Hume Highway, Suttor Road in Moss Vale, Sheepwash Road and Illawarra Highway crossings are completely ignored. These last two crossings experience high levels of traffic in morning, afternoons and weekends. Many of the road users are tourists unfamiliar with the local area and rail level crossings. The Suttor Road crossing is used by both Moss Vale local residents and industrial area traffic. With the increase in heavy rail traffic these crossings pose an unacceptable risk to public safety and to rail staff.

3/ PEDESTRIAN traffic including school children are seriously at risk in Moss Vale and Robertson. Robertson in particular has a number pedestrian crossings and road crossing that are inadequate and poorly fenced.

4/The rail line runs approx. 30 metres behind the 160 STUDENT Robertson Primary School. The children play and spend time on the oval area that runs beside the rail line. Coal dust and noise pose an unacceptable health risk to school children and School staff. *"There may be no safe threshold for fine particulate matter and the effects are linearly related to concentration."*(World Health Organisation & Australian National Pollution Inventory)

I urge the Government to reject this project as it proposes an unreasonable risk to public health and safety.

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, R Natalenko

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Attn: Executive Director, Resource Assessments Department of
Planning and Environment
GPO Box 39
Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed: Georgina Inman-Peters

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed,

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

Name: PATRICK WATKINS

Address: 8 Huxley St

Moss Vale 2575

Date: 3/6/2017

Attn: Executive Director, Resource Assessments Department of Planning and Environment
GPO Box 39
Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, P. Watkins

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, Carole A. Baird

- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, Jeremy Quick

This is a submission to the Hume Coal Project EIS. SSD 7172

I object to this project and believe it should be rejected for the projects impact on WATER - ground and surface.

- 93 Bores on 71 properties will be affected by water drawdown. The impact on bores will remain for between 36 to 65 years, after mining ceases. (ES4.1.2)
- It is expected that some bores affected may never fully recover.
- Treatment and release into Oldbury Creek of surplus onsite mining water in years when above average rain falls. (ES4.1.1)
- Again if there is any discharge into the surface or ground water systems in the Sydney water Catchment, then the applicant must demonstrate that the development has either a neutral or beneficial impact on water quality".
- Water used to wash coal and residual "spoil", which will be pumped back underground into mine voids, which has the potential to impact groundwater systems. ES41.1.1
- The potential impacts of the Hume Coal proposal on water and the Sydney Water Catchment must be considered within the context of the widely accepted 'Precautionary Principle" which is a fundamental principle of ecologically sustainable development and which is a benchmark used in the assessment of planning in NSW.

I urge the Government to reject this project

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed,

Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed,

- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.

Date: 3/4/2017

Attn: Executive Director, Resource Assessments Department of
Planning and Environment
GPO Box 39
Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, Lynne Shaw

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, Sue Scott

- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.

GPO Box 39
Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed,

Blassidy

Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, W.K. Manning

- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, David G Bennetts

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed,

Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed,

- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed,

GPO Box 39
Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for the following reasons.

1/ The SCOPE of the EIS is inadequate as the Hume Coal Project significantly impacts the Berrima branch line AND the Unanderra to Port Kembla Branch line. Now the Tahmoor mine will operate into the future the extra traffic from Hume will double the amount of coal train traffic on the Unanderra line.

2/ Whilst a GRADE SEPARATION is proposed for the Old Hume Highway, Suttor Road in Moss Vale, Sheepwash Road and Illawarra Highway crossings are completely ignored. These last two crossings experience high levels of traffic in morning, afternoons and weekends. Many of the road users are tourists unfamiliar with the local area and rail level crossings. The Suttor Road crossing is used by both Moss Vale local residents and industrial area traffic. With the increase in heavy rail traffic these crossings pose an unacceptable risk to public safety and to rail staff.

3/ PEDESTRIAN traffic including school children are seriously at risk in Moss Vale and Robertson. Robertson in particular has a number pedestrian crossings and road crossing that are inadequate and poorly fenced.

4/The rail line runs approx. 30 metres behind the 160 STUDENT Robertson Primary School. The children play and spend time on the oval area that runs beside the rail line. Coal dust and noise pose an unacceptable health risk to school children and School staff. *"There may be no safe threshold for fine particulate matter and the effects are linearly related to concentration."*(World Health Organisation & Australian National Pollution Inventory)

I urge the Government to reject this project as it proposes an unreasonable risk to public health and safety.

Signed,

- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, madi Shield

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, Michael Davis

- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, R Gibbons

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.

Address: 19 Rose St
Lane Cove

Date: 11 / 6 /2017

Attn: Executive Director, Resource Assessments Department of
Planning and Environment
GPO Box 39
Sydney NSW 2001

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed, Davidson

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

Signed,

Richard

- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
- This will result in daily closures at rail crossings rising from 69 minutes every day to 93 minutes or more than one and a half hours daily.
- Major rail crossings to be impacted include those at Robertson and on Sheepwash Road
- The nearly 30% increase in the total time rail crossings are closed each day as a result of the Hume Coal proposal will present unacceptable impacts on emergency vehicles including fire brigades, ambulances, police and other critical community services.

I urge the Government to reject this project

This is a submission to the Berrima Rail Project EIS. SSD 7171

I object to this project and believe it should be rejected for its impact on community safety which will be put significantly at risk by the project and its impact on road traffic in the Highlands.

- The EIS and DA lodged by Hume Coal in respect of the Berrima Rail Project shows that there will be additional traffic delays at level crossings. (ES3.3)
- The rail route of the 4 daily coal trains from the Hume Coal mine and 4 back to the mine will involve 17 level crossings in the Southern Highlands and down the escarpment on the route to Port Kembla.
- The addition of the Hume Coal trains will add an extra 24 minutes of closures at rail level crossings each and every day
