Re: Foreshore and Public Domain Works at Campbell's Cove,
The Rocks (SSD 7246) - "Objection"

As a resident of 8 Hickson Road, located directly adjacent to the Campbell's Cove area, I would like to object to this application in its present draft form. In as much as the documents which it relies on for its overall justification are in draft form, the application must be considered incomplete.

Also, it should be considered as an application for *works* related to changing the nature of the physical space within Campbell's Cove. A separate application should be required to be submitted for approval of each *specific use* of that physical space. Any such applications should not contain any sound amplification and should be restricted to operational hours between 10.00am and 11.00pm. I look forward to reviewing this application again when it is in a completed form.

Kind regards,
Anthony Plaia
