

Matt Errington  
Principal Environmental Consultant  
Environmental Resources Management Australia  
Locked Bag 3012 Australia Square  
NSW 1215

Dear Mr Errington

**Reissue of State Significant Development - Secretary's Requirements  
Sancrox Quarry Extension Project (SSD 7293)**

I have enclosed updated Secretary's requirements for the preparation of an Environmental Impact Statement (EIS) for the Sancrox Quarry Extension Project which replace the Secretary's requirements issued on 19 October 2015.

These requirements are based on the information you have previously provided, and reflect previous consultation with relevant government agencies.

Your attention is drawn to the environmental planning instruments (EPI), policies and guidelines to be addressed in your EIS (see Attachment 1). Please note that where these EPIs, guidelines and policies have changed or been updated, your EIS will need to address the latest available version.

The agencies' previous comments are attached for your information (see Attachment 2). You must have regard to these comments in the preparation of the EIS.

Please note that the Department may alter these requirements at any time, and that you must consult further with the Department if you do not lodge a development application and EIS for the project within the next two years.

You should establish whether the proposal requires a separate approval under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) as soon as possible. If such an approval is required, please notify the Department immediately, as the Commonwealth approval process is likely to be integrated with the NSW approval process (under the bilateral agreement), and supplementary requirements will need to be issued.

Please contact the Department at least two weeks before you plan to submit the development application and EIS for the project. This will enable the Department to:

- confirm the applicable fee (see Division 1AA, Part 15 of the *Environmental Planning and Assessment Regulation 2000*); and
- determine the required number of copies of the EIS (hard copy and digital).

It is important for you to recognise that the Department will review the EIS for the project carefully before putting it on public exhibition. If it fails to adequately address these requirements, then you will be required to submit an amended EIS.

If you have any enquiries about these requirements, please contact Anthony Barnes on the details listed above.

Yours sincerely

Howard Reed 18.9.17  
**Director**  
**Resource Assessments**  
as the Secretary's delegate

# Secretary's Environmental Assessment Requirements

## State Significant Development

Section 78A(8A) of the *Environmental Planning and Assessment Act 1979*  
Schedule 2 of the *Environmental Planning and Assessment Regulation 2000*

|                             |   |
|-----------------------------|---|
| <b>Application Number</b>   | SSD 7293  |
| <b>Proposal</b>             | <p>The Sancrox Quarry Extension Project, which involves:</p> <ul style="list-style-type: none"> <li>• extending the approved extraction boundary by approximately 52 hectares,</li> <li>• extending the quarry life by ten years (from 20 to 30 years),</li> <li>• increasing the production limit from 455,000 tonnes per annum (tpa) to 750,000 tpa,</li> <li>• constructing and operating a concrete batching plant producing 20,000m<sup>3</sup> per annum (p/a),</li> <li>• constructing and operating a concrete recycling facility processing 20,000 tonnes p/a,</li> <li>• increasing truck movements and equipment loading from 7am–11pm weekdays, and 7am–1pm weekends and public holidays to 24 hours per day 7 days per week,</li> <li>• increasing quarry operations from 7am–5pm weekdays, and 7am–1pm Saturday to 24 hours per day 7 days per week, and</li> <li>• transporting material off-site via public roads.</li> </ul>   |
| <b>Location</b>             | <p>Sancrox Road Sancrox, Lot 2 DP 574308<br/> Lot 353 DP 754434<br/> Lot 1 DP 704890<br/> Lot 1 DP 720807</p>   |
| <b>Applicant</b>            | Mr Matt Errington   |
| <b>Date of Issue</b>        | 18 September 2017   |
| <b>General Requirements</b> | <p>The Environmental Impact Statement (EIS) for the development must comply with the requirements in Clauses 6 and 7 of Schedule 2 of the <i>Environmental Planning and Assessment Regulation 2000</i>.</p> <p>In particular, the EIS must include:</p> <ul style="list-style-type: none"> <li>• a stand-alone executive summary;</li> <li>• a full description of the development, including: <ul style="list-style-type: none"> <li>– the resource to be extracted, including the amount, type and composition;</li> <li>– the site layout and extraction plan, including cross-sectional plans;</li> <li>– the production process and processing activities, including the in-flow and out-flow of materials and points of discharge to the environment;</li> <li>– surface infrastructure and facilities (including any infrastructure that would be required for the development, but the subject of a separate approvals process);</li> <li>– a waste (overburden, rejects, tailings etc) management strategy;</li> <li>– a water management strategy;</li> <li>– a rehabilitation strategy to apply during, and after completion of, extraction operations, and proposed final use of site; and</li> <li>– the likely interactions between the development and any existing, approved or proposed development in the vicinity of the site;</li> </ul> </li> <li>• a strategic justification of the development focusing on site selection and the suitability of the proposed site;</li> <li>• a list of any approvals that must be obtained before the development may commence;</li> <li>• an assessment of the likely impacts of the development on the environment,</li> </ul> |

|                          |   |
|--------------------------|---|
|                          | <p>focussing on the key issues identified below, including:</p> <ul style="list-style-type: none"> <li>- a description of the existing environment likely to be affected by the development, using sufficient baseline data;</li> <li>- an assessment of the likely impacts of all stages of the development, including any cumulative impacts, taking into consideration any relevant laws, environmental planning instruments, guidelines, policies, plans and industry codes of practice;</li> <li>- a description of the measures that would be implemented to avoid, minimise, mitigate and/or offset the likely impacts of the development, and an assessment of: <ul style="list-style-type: none"> <li>o whether these measures are consistent with industry best practice, and represent the full range of reasonable and feasible mitigation measures that could be implemented;</li> <li>o the likely effectiveness of these measures; and</li> <li>o whether contingency measures would be necessary to manage any residual risks; and</li> </ul> </li> <li>- a description of the measures that would be implemented to monitor and report on the environmental performance of the development;</li> </ul> <ul style="list-style-type: none"> <li>• a consolidated summary of all the proposed environmental management and monitoring measures, identifying all the commitments in the EIS;</li> <li>• consideration of the development against all relevant environmental planning instruments (including Part 3 of the <i>State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007</i>);</li> <li>• the reasons why the development should be approved, having regard to: <ul style="list-style-type: none"> <li>- relevant matters for consideration under the <i>Environmental Planning and Assessment Act 1979</i>, including the objects of the Act;</li> <li>- the biophysical, economic and social impacts of the project, including the principles of ecologically sustainable development;</li> <li>- the suitability of the site with respect to potential land use conflicts with existing and future surrounding land uses;</li> <li>- feasible alternatives to the development (and its key components), including the consequences of not carrying out the development;</li> </ul> </li> <li>• a signed declaration from the author of the EIS, certifying that the information contained within the document is neither false nor misleading.</li> </ul> <p>While not exhaustive, Attachment 1 contains a list of some of the environmental planning instruments, guidelines, policies, and plans that may be relevant to the environmental assessment of this development.</p> <p>In addition to the matters set out in Schedule 1 of the <i>Environmental Planning and Assessment Regulation 2000</i>, the development application must be accompanied by a signed report from a suitably qualified expert that includes an accurate estimate of the capital investment value (as defined in Clause 3 of the <i>Environmental Planning and Assessment Regulation 2000</i>) of the development, including details of all the assumptions and components from which the capital investment value calculation is derived.</p> |
| <p><b>Key Issues</b></p> | <p>The EIS must address the following key issues:</p> <ul style="list-style-type: none"> <li>• <b>Noise &amp; Blasting</b> – including: <ul style="list-style-type: none"> <li>- a detailed assessment of the likely construction, operational and off-site transport noise impacts of the development in accordance with the <i>Interim Construction Noise Guideline</i>, <i>NSW Industrial Noise Policy</i> and the <i>NSW Road Noise Policy</i> respectively, and having regard to the <i>Voluntary Land Acquisition and Mitigation Policy</i>;</li> <li>- if a claim is made for specific construction noise criteria for certain activities, then this claim must be justified and accompanied by an assessment of the likely construction noise impacts of these activities under the <i>Interim Construction Noise Guideline</i>;</li> <li>- proposed blasting hours, frequency and methods;</li> <li>- a detailed assessment of the likely blasting impacts of the development (including noise, vibrations, overpressure, visual and odour) on people, animals, buildings, infrastructure and significant natural features, having regard to the relevant ANZEC guidelines;</li> </ul> </li> </ul>   |

- reasonable and feasible mitigation measures to minimise noise emissions; and
- monitoring and management measures, in particular real-time and attended noise monitoring;
- **Air Quality** – including:
  - a detailed assessment of potential construction and operational impacts, in accordance with the *Approved Methods for the Modelling and Assessment of Air Pollutants in NSW*, and with a particular focus on dust emissions including PM<sub>2.5</sub> and PM<sub>10</sub>, and having regard to the *Voluntary Land Acquisition and Mitigation Policy*;
  - an assessment of potential dust and other emissions generated from processing, operational activities and transportation of quarry products;
  - reasonable and feasible mitigation measures to minimise dust and emissions; and
  - monitoring and management measures, in particular, real-time air quality monitoring;
- **Water** – including:
  - a detailed site water balance, including a description of site water demands, water disposal methods (inclusive of volume and frequency of any water discharges), water supply infrastructure and water storage structures;
  - identification of any licensing requirements or other approvals under the *Water Act 1912* and/or *Water Management Act 2000*;
  - demonstration that water for the construction and operation of the development can be obtained from an appropriately authorised and reliable supply in accordance with the operating rules of any relevant Water Sharing Plan (WSP);
  - a description of the measures proposed to ensure the development can operate in accordance with the requirements of any relevant WSP or water source embargo;
  - an assessment of any likely flooding impacts of the development;
  - an assessment of the likely impacts on the quality and quantity of existing surface and ground water resources, including a detailed assessment of proposed water discharge quantities and quality against receiving water quality and flow objectives;
  - an assessment of the likely impacts of the development on aquifers, watercourses, riparian land, water-related infrastructure, and other water users; and
  - a detailed description of the proposed water management system (including sewage), water monitoring program and other measures to mitigate surface and groundwater impacts;
- **Biodiversity** – including:
  - accurate predictions of any vegetation clearing on site;
  - a detailed assessment of the likely biodiversity impacts of the development, paying particular attention to threatened species, populations and ecological communities and groundwater dependent ecosystems, and having regard to the *NSW Biodiversity Offsets Policy for Major Projects* and the *Framework for Biodiversity Assessment*; and
  - a strategy to offset any residual impacts of the development in accordance with the *NSW Biodiversity Offsets Policy for Major Projects*, including evidence that the appropriate type and quantum of offsets will be available;
- **Heritage** – including:
  - an assessment of the potential impacts on Aboriginal heritage (cultural and archaeological), including evidence of appropriate consultation with relevant Aboriginal communities/parties and documentation of the views of these stakeholders regarding the likely impact of the development on their cultural heritage; and
  - identification of historic heritage in the vicinity of the development and an assessment of the likelihood and significance of impacts on heritage items, having regard to the relevant policies and guidelines listed in Attachment 1;
- **Traffic & Transport** – including:

|                     |  |
|---------------------|--|
|                     | <ul style="list-style-type: none"> <li>- accurate predictions of the road traffic generated by the construction and operation of the development, including a description of the types of vehicles likely to be used for transportation of quarry products;</li> <li>- a detailed assessment of potential traffic impacts on the capacity, condition, safety and efficiency of the local and State road network (as identified above), including a road safety audit; and</li> <li>- a description of the measures that would be implemented to mitigate any impacts, including concept plans of any proposed upgrades, developed in consultation with the relevant road and rail authorities (if required);</li> </ul> <ul style="list-style-type: none"> <li>• <b>Land Resources</b> – including a detailed assessment of: <ul style="list-style-type: none"> <li>- potential impacts on soils and land capability (including potential erosion and land contamination) and the proposed mitigation, management and remedial measures (as appropriate);</li> <li>- potential impacts on landforms (topography), paying particular attention to the long term geotechnical stability of any new landforms (such as overburden dumps, bunds etc); and</li> <li>- the compatibility of the development with other land uses in the vicinity of the development in accordance with the requirements in Clause 12 of <i>State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries)</i> 2007, paying particular attention to the agricultural land use in the region;</li> </ul> </li> <li>• <b>Waste</b> – including estimates of the quantity and nature of the waste streams that would be generated or received by the development and any measures that would be implemented to minimise, manage or dispose of these waste streams;</li> <li>• <b>Hazards</b> – including an assessment of the likely risks to public safety, paying particular attention to the transport, handling and use of any hazardous or dangerous goods;</li> <li>• <b>Visual</b> – including a detailed assessment of the likely visual impacts of the development on private landowners in the vicinity of the development and key vantage points in the public domain, paying particular attention to any new landforms, and to minimising the lighting impacts of the development;</li> <li>• <b>Social &amp; Economic</b> – including: <ul style="list-style-type: none"> <li>- a detailed assessment of the likely social impacts of the development on the local and regional community in accordance with the <i>Social impact assessment guideline for State significant mining, petroleum production and extractive industry development</i>; and</li> <li>- a detailed assessment of the likely economic impacts of the development, paying particular attention to: <ul style="list-style-type: none"> <li>o the significance of the resource;</li> <li>o the costs and benefits of the project; identifying whether the development as a whole would result in a net benefit to NSW, including consideration of fluctuation in commodity markets and exchange rates; and</li> <li>o the demand for the provision of local infrastructure and services; and</li> </ul> </li> </ul> </li> <li>• <b>Rehabilitation</b> – including the proposed rehabilitation strategy for the site having regard to the key principles in the <i>Strategic Framework for Mine Closure</i>, including: <ul style="list-style-type: none"> <li>- rehabilitation objectives, progressive rehabilitation commitments, methodology, monitoring programs, performance standards and proposed completion criteria;</li> <li>- nominated final land use, having regard to any relevant strategic land use planning or resource management plans or policies; and</li> <li>- the potential for integrating this strategy with any other rehabilitation and/or offset strategies in the region.</li> </ul> </li> </ul> |
| <b>Consultation</b> | <p>During the preparation of the EIS, you must consult with relevant local, State and Commonwealth Government authorities, service providers, Aboriginal stakeholders, community groups and affected landowners.</p> <p>You must:</p> <ul style="list-style-type: none"> <li>• consult with: <ul style="list-style-type: none"> <li>- affected landowners;</li> <li>- community groups;</li> </ul> </li> </ul>   |

|   |  |
|---|--|
|   | <ul style="list-style-type: none"> <li>- Port Macquarie-Hastings Council;</li> <li>- Office of Environment and Heritage (including the Heritage Branch);</li> <li>- Environment Protection Authority;</li> <li>- Division of Resources and Geoscience within the Department;</li> <li>- Department of Primary Industries (including the DPI Water, NSW Forestry, Agriculture and Fisheries sections and Crown Lands division);</li> <li>- North Coast Local Land Services;</li> <li>- Roads and Maritime Services;</li> <li>- NSW Rural Fire Service; and</li> <li>• establish a Community Consultative Committee for the project in accordance with the <i>Community Consultative Committee Guidelines for State Significant Projects</i>, and consult with the committee during the preparation of the EIS.</li> </ul> |
| <b>Further consultation after 2 years</b> | If you do not lodge a development application and EIS for the development within 2 years of the issue date of these requirements, you must consult further with the Secretary in relation to the preparation of the EIS.   |
