[RE 11579 - Website enquiry from Jonathon Murray.msg](#)

Guy,

As discussed the tree size specified in the DA documents would need considerable lead time and even then most nurseries will not stock these types of species in the specified size. We attached emails and substation recommendations from several large nurseries in the Sydney area which show that no 75L sizes in these species are currently available.

We would seek to have the condition adjusted so that a pot size of 25-45L is permissible for this project given the availability from the Nurseries mentioned. We believe the same outcome will be achieved in doing so, with the over all install heights only varying slightly from the proposed 75L trees.

The average 75L tree size is 1.8-2.5m

The average 45L tree size is 1.4-2.2m

The average 25L tree size is 1.2-1.8m

With this specific project we do not want to substitute the tree species so we can get larger sizes as they form part of the complimentary work to the VMP areas.

As part of the establishment period any trees that are damaged or have died will be replaced by the contractor.

Hope this helps?

Guy,

Attachment and email from one of the bigger plant suppliers saying that they can only get 45L size.

Guy,

Email below regarding trees, I dare say early 2021 is a bit late for your timeline.....I have emailed a few others so waiting to hear back but early thoughts are we may have to seek an approval from Council to lower the conditioned 75L tree size to something more readily available. Typically these native trees are harder to get at this sort of size.

Hi Jon

I hate to be the bearer of bad news but this is going to be difficult to supply in the short term.

I would estimate that it would be early 2021 to get these trees grow in the sizes required, pending the availability of the starter stock.

If you need any further information please don't hesitate to give me a call.

Regards

Marc

Hi Marc,

Working on another project in St Marys and I would like the client to order the trees ASAP as I know it will be hard to get the quantity needed at the size specified.

Could you please let me know availability and lead times if possible.

Thanks again, appreciate all your help.

Afternoon

Hope your well ?

We are in the middle of finalising the weekends stock take and cannot firm up the quote until later this week.
Please find attached comments on sizes that the system says we have...but I need to do a physical inspection.
Can you review and advise if these sizes are acceptable before I action

Hi Jonathon,

I have had a look into these plants for you and have the following results.

Angophora – They have all been sold and my supplier won't have any ready until spring in 45lt size.

Casuarina – I may be able to get now but only in 45lt – just waiting to hear back from my supplier.

Euc Moluccana – I can only get 400lt at the moment, the rest won't be ready until summer.

Euc Tereticornis - I may be able to get now but only in 45lt – just waiting to hear back from my supplier.

Melaleuca – I can get now but only in 45lt.

Let me know your thoughts on the above or if we can substitute any and I can look into that for you also.

Kind Regards,

Heather Andersen

Hi Heather,

Thank you for getting back to me.

I have also attached another list we are looking to get although again I think it will be difficult to get this in the next couple of months.

Hi Jonathon,

Thanks for your email! I have called quite a few of our suppliers and looked onto our national database for the trees you're after and unfortunately I cannot find anything bigger than a 300mm pot, the last one the Exocarpus I have not been able to find at all.

I would be more than happy to help if you have any other plants you would like to substitute for them, please let me know and ill do what I can.

Kind Regards,

Heather Andersen

Hi,

We are working on ALDI Distribution centre and they are struggling to get some of the native trees at the size specified.

Would you happen to have any of the following or close to?

10 x Ceratopetalum Gummiferum 100L

26 x Melaleuca Decora 100L

13 x Exocarpus Cuppressiformis 100L

Regards,
