The MGAC Report v4 dated 6 July 2016 that supported the original Project Application concluded that the accessibility for the Camden Valley Medical Campus will be able to achieve the accessibility design requirements as set out in the DDA Access to Premises Standards.

On this basis, MGAC is of the opinion that the proposed S4.55 (2) drawings do not require any additional supporting information, analysis or commentary at this stage of the design and compliance with DDA Premises Standards and Australian Standards can be achieved.

Yours faithfully,
