

Check all dimensions and site conditions prior to commencement of any work, the purchase or ordering of any materials, fittings, plant, services or equipment and the preparation of shop drawings and of the fabrication of any components.

Do not scale drawings - refer to figured dimensions only. Any discrepancies shall immediately be referred to the architect for clarification.

All drawings may not be reproduced or distributed without prior permission from the architect.

Notes - Construction General (BASIX)

Glazing

- Aluminium windows:
- Aluminium framed single clear glazing to internal windows that open to wintergardens
- U-Value: 6.6 (equal to or lower than)
- SHGC: 0.69 (+ or - 10%)

- Aluminium framed double clear glazing to curtain walls & wintergardens
- U-Value: 4.4 (equal to or lower than)
- SHGC: 0.5 (+ or - 10%)

Given values are NFRC, total window values

Roof / Ceiling Insulation

- Concrete roof - No insulation
- Default Colour modelled

Ceiling:

Plasterboard ceiling - R2.0 bulk insulation to selected units (34.01 and 34.07) with balconies above.

Plasterboard ceiling - R2.0 bulk insulation to all units to top floor, balconies above & sit areas above to all other units.

Note: It has been assumed at DA stage that the area of all ceiling penetrations is less than 0.5% of the total ceiling area. If ceiling penetrations are more than a later stage, BCA loss of insulation calculations will be required.

Wall / floor Insulation

External Wall: Lightweight cladding to all external walls with R1.5 bulk insulation no colour nominated

Internal walls within units: Plasterboard on studs - no insulation

Inter-tenancy walls / corridor: 75mm hebel power panel plasterboard lined with R2.0 acoustic insulation to selected units only (7.01 and 8.03)

75mm hebel power panel plasterboard lined with R1.5 acoustic insulation to all other units.

Floors:

Concrete - R2.1 insulation to all units in level 7 with car park below

Concrete - no insulation required between units

Floor coverings:

1 & 2 bed apartments - tiles to wet areas, carpet to bedrooms and living areas as per plans

All 3 & 4 bed apartments tiled throughout

Central hot water system

Central gas-fired boiler with R1.0 (-38mm) insulation to ringmain and supply risers.

Reticulated alternative water

Alternative water supply available from Sydney Olympic Park Authority to be used for the irrigation of all landscaping & all toilets within the building.

(No rainwater tank required for BASIX compliance)

Alternative energy

Not required by BASIX

|                               | Overshadowing is minimised to the south or downhill by increased upper level setbacks                                                                                                                                                                                                                                                                                                                                                    | The proposed slender tower form is located on half of the podium only so as to minimise extent of overshadowing to the south.                                                                                                                                                                                                                                     | YES        |
|                               | Buildings are orientated at 90 deg to the boundary with neighbouring properties to minimise overshadowing & privacy impacts, particularly where minimum setbacks are used & where buildings are higher than the adjoining development                                                                                                                                                                                                    | The podium is built to the boundary in line with the SOP Masterplan 2030 planning guidelines. The tower is built to northeast boundary in line with the SOPA Masterplan 2030 guidelines. The orientation of the boomerang tower form results in generous setbacks to the southeast and southwest boundaries thereby minimising overshadowing and privacy impacts. | YES        |

| 3D-4<br>p59                                            | <b>Objective:</b> Public open space, where provided, responds to the existing pattern & uses of the neighbourhood.                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | The proposed development is built to the boundary along the Olympic Boulevard frontage and along side streets off Olympic Boulevard as per the SOP Masterplan guidelines, with an activated colonnade alongside retail facilities at ground level. Whilst public open space is limited the colonnade responds to the existing ceremonial axis of Olympic Boulevard. The through-site link provides pedestrian desire paths and view lines to the adjoining P3 carpark to the east / sports facilities to the west. | ✓                |                                 |               |   |   |          |   |                   |   |                                                        |   |  |   |

| 1                                                           | At least 60% of apartments are naturally cross ventilated in the first nine storeys of the building. Apartments at ten storeys or greater are deemed to be cross ventilated only if any enclosure of the balconies at these levels allows adequate natural ventilation and cannot be fully enclosed                                                                                                                                                                                                                                                                                                                                                                                        | The first floor of apartments begins on level 7 and as such we have assumed a tower typology for the cross ventilation approach to the apartments. The corner apartments have been typically designed as enclosed wintergardens to mitigate the regularity of strong wind conditions occurring at these tower corners. The remaining apartments have been designed with open balconies to allow adequate natural ventilation. | NO         |                 |     |                     |     |                   |                                                                                                            |              |                                                      |                                |                                                                     |  |   |

|                | 2 For apartments at ground level or on podium or similar, a private open space is provided instead of a balcony. It must have minimum area of 15sqm & minimum depth of 3m                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                              | N/A                |                   |        |   |   |           |   |   |           |    |   |            |    |     |  |   |
|                | <b>Design Guidance</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                              | Considered         |                   |        |   |   |           |   |   |           |    |   |            |    |     |  |   |
|                | Balcony use may be limited in some proposals where: <ul style="list-style-type: none"><li>consistently high wind speeds at 10 storeys &amp; above</li><li>close proximity to road, rail or other noise sources</li><li>exposure to significant levels of aircraft noise</li><li>heritage &amp; adaptive reuse of existing buildings</li></ul> In these situations, <ul style="list-style-type: none"><li>juliet balconies,</li><li>operable walls,</li><li>enclosed wintergardens</li><li>bay windows</li></ul> are appropriate. Other amenity benefits for occupants are provided in the apartments or in the development or both. Natural ventilation is also demonstrated                                                                                                                                                           | Regular high wind speeds occur at the tower corners. This is mitigated by the provision of enclosed wintergardens to provide a useable balcony space to these apartments.                                                                                                                                                                    | YES                |                   |        |   |   |           |   |   |           |    |   |            |    |     |  |   |
| 4E-2 p93       | <b>Objective:</b> Primary private open space & balconies are appropriately located to enhance liveability for residents                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                              | ✓                  |                   |        |   |   |           |   |   |           |    |   |            |    |     |  |   |

TABLE 2: APARTMENT TYPE AREA + STORAGE SCHEDULE

Carpark storage cages provided: 229  
Number of units achieving SEPP65 storage requirements: 229 (100%)  
SOPA storage requirements are equal to that required by the ADG (SEPP65)

Storage allocations per unit type are located on the following pages.

TYPE 1B-A

|                                                                              |                        |
|------------------------------------------------------------------------------|------------------------|
| Storage volume provided within apartment                                     | 3.00m <sup>3</sup>     |
| Storage cage provided in carpark                                             | Yes (3m <sup>3</sup> ) |
| Total storage volume compliant with SEPP 65 guidelines (6.00m <sup>3</sup> ) | ✓                      |

TYPE 1B-B

|                                                                              |                        |
