File ref G25-ARU-000-CER-CI-000007[01]

Dear David,

## **UNSW G25 Education Building** Confirmation of Consistency – SSDA Stormwater Strategy

This letter refers to the previously issued UNSW G25 Education Building Civil Design Report (UNSW G25-ARP-REP-CI-0004[04]) prepared in support of the State Significant Development Application (SSD-74670005), and the subsequent addendum (G25-ARP-MEM-CI-000001[03]).

Arup has reviewed the updated SSDA landscape layout issued by Architectus titled *20260410\_G25-ARC-LA-SSDA Set for Review*.

Following our review, we confirm that the revised stormwater strategy for the G25 Education Building remains consistent with the design intent of the previously issued State Significant Development application.

The updates within the landscape package and associated stormwater elements are minor in nature and do not alter the underlying stormwater management approach or design philosophy in the SSD submission. All proposed stormwater infrastructure, discharge arrangements, and compliance pathways continue to align with the approved strategy.

Yours sincerely

**Emily Fuller**  
Senior Engineer
