Notes:

Dear Marcus

As previously discussed, City staff met with the applicant's consultants on 10 June 2021 to discuss the proposed modification to relevant conditions. Further information has been requested including the reasonable and assumed mWh/m²/year of the proposed development AND the assumed carbon emissions for all three schemes. The consultant has advised that this information will be provided through DPIE.

Please note that the applicant had not previously discussed this matter with City staff prior to lodgement of the application - no communication in writing or record of discussions could be provided.

Please forward the requested information for review when it is submitted to DPIE.

Regards

David Zabell
