Mr Jeff Bembrick
White Rock Wind Farm Pty Ltd
L23, 201 Elizabeth Street
SYDNEY, NSW 2000

Dear Mr Bembrick

White Rock Solar Farm (SSD 16_7487) Environmental Assessment Requirements

I have attached the Environmental Assessment Requirements for the preparation of an Environmental Impact Statement (EIS) for the White Rock Solar Farm.

The requirements are based on the information you have provided to date, and have been prepared in consultation with the relevant Government agencies.

Please note that the Department may alter these requirements at any time, and that you must consult further with the Department if you do not lodge a development application and EIS for the project within the next two years.

If your proposal contains any actions that could have a significant impact on matters of National Environmental Significance, then it will also require approval under the Commonwealth's *Environment Protection Biodiversity Conservation Act 1999* (EPBC Act).

This approval is in addition to any approvals required under NSW legislation. If you have any questions about the application of the EPBC Act to your proposal, you should contact the Department of the Environment in Canberra (6274 1111 or www.environment.gov.au).

To meet the tight assessment timeframe, selection of an appropriate site is critical. The scoping document indicates several site options are under consideration. The Department strongly recommends that you finalise selection of the site and submit the EIS for that site only.

Please contact the Department at least two weeks before you plan to submit the development application and EIS for the project. This will enable the Department to:

- confirm the applicable fee (see Division 1AA, Part 15 of the *Environmental Planning and Assessment Regulation 2000*); and
- determine the required number of copies of the EIS.

It is important for you to recognise that the Department will review the EIS for the project before putting it on public exhibition. If it fails to adequately address these requirements, you will be required to submit an amended EIS.

Yours sincerely

Mike Young
Director
Resource Assessments
as nominee of the Secretary

Environmental Assessment Requirements

State Significant Development

Section 78A(8A) of the *Environmental Planning and Assessment Act 1979*

Application Number	SSD 16_7487
Proposal	White Rock Solar Farm which includes: - the construction and operation of a 20 MW solar photovoltaic (PV) plant; and - associated infrastructure, including a substation and grid connection.
Location	Approximately 20 kilometres (km) southwest of Glen Innes and 42 km east of Inverell
Applicant	White Rock Wind Farm Pty Ltd
Date of Issue	3 February 2016
General Requirements	The Environmental Impact Statement (EIS) for the development must comply with the requirements in Schedule 2 of the <i>Environmental Planning and Assessment Regulation 2000</i>. In particular, the EIS must include: - a full description of the development, including: - details of construction, operation and decommissioning; - a site plan showing all infrastructure and facilities (including any infrastructure that would be required for the development, but the subject of a separate approvals process); - a detailed constraints map identifying the key environmental and other land use constraints that have informed the final design of the development; - a strategic justification of the development focusing on site selection and the suitability of the proposed site; - an assessment of the likely impacts of the development on the environment, focusing on the specific issues identified below, including: - a description of the existing environment likely to be affected by the development; - an assessment of the likely impacts of all stages of the development (which is commensurate with the level of impact), taking into consideration any relevant legislation, environmental planning instruments, guidelines, policies, plans and industry codes of practice; - a description of the measures that would be implemented to avoid, mitigate and/or offset the impacts of the development (including draft management plans for specific issues as identified below); - a description of the measures that would be implemented to monitor and report on the environmental performance of the development; - a consolidated summary of all the proposed environmental management and monitoring measures, identifying all the commitments in the EIS; and - the reasons why the development should be approved having regard to the biophysical, economic and social costs and benefits of the development. While not exhaustive, Attachment 1 contains a list of some of the environmental planning instruments, guidelines, policies, and plans that may be relevant to the environmental assessment of this development. In addition to the matters set out in Schedule 1 of the <i>Environmental Planning and Assessment Regulation 2000</i>, the development application must be accompanied by a signed report from a suitably qualified person that includes an accurate estimate of the capital investment value of the development (as defined in Clause 3 of the <i>Environmental Planning and Assessment Regulation 2000</i>).

Specific Issues	The EIS must address the following specific issues: • Biodiversity – including an assessment of the likely biodiversity impacts of the development, having regard to the <i>NSW Biodiversity Offsets Policy for Major Projects</i>, and in accordance with the <i>Framework for Biodiversity Assessment</i>, unless otherwise agreed by the Department; • Heritage – including an assessment of the likely Aboriginal and historic heritage (cultural and archaeological) impacts of the development, including adequate consultation with the local Aboriginal community; • Land – including an assessment of the impact of the development on agricultural land and flood prone land, paying particular attention to compatibility of the development with the existing land uses on the site and consistency with the zoning provisions applying to the land; • Visual – including an assessment of the likely visual impacts of the development (including any night lighting) on surrounding landowners and key vantage points in the public domain, and a draft landscaping plan developed in consultation with affected landowners; • Noise – including an assessment of the construction noise impacts of the development in accordance with the <i>Interim Construction Noise Guideline</i> (ICNG) and sub-station noise impacts in accordance with the <i>NSW Industrial Noise Policy</i> (INP), and a draft noise management plan if the assessment shows construction noise is likely to exceed applicable criteria; • Transport – including an assessment of the likely transport impacts of the development on the capacity, condition, safety and efficiency of the local and State road networks, and a draft traffic management plan for the construction phase of the development; • Water – including an assessment of the likely impacts of the development on surface water resources (including any nearby watercourses), details of water supply arrangements, and a draft erosion and sediment control plan prepared in accordance with <i>Managing Urban Stormwater: Soils & Construction</i> (Landcom 2004); and • Electromagnetic Interference – an assessment of the proposed transmission line and substation against the International Commission on Non-Ionizing Radiation Protection (ICNIRP) <i>Guidelines for limiting exposure to Time-varying Electric, Magnetic and Electromagnetic Fields</i>.
Consultation	In preparing the EIS for the development, you should consult with relevant local, State or Commonwealth Government authorities, infrastructure and service providers, community groups and affected landowners. In particular, you must undertake detailed consultation with affected landowners surrounding the development, and relevant local Council(s). The EIS must describe the consultation that was carried out, identify the issues raised during this consultation, and explain how these issues have been addressed in the EIS.
