

5.2 Shadow Diagrams

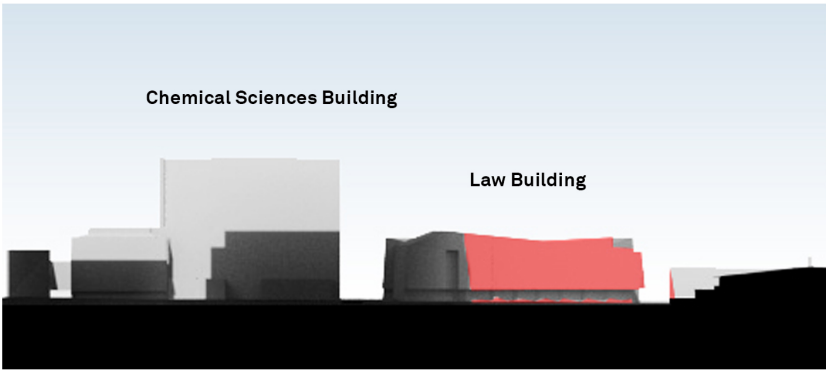

Overshadow by Science and Engineering Building

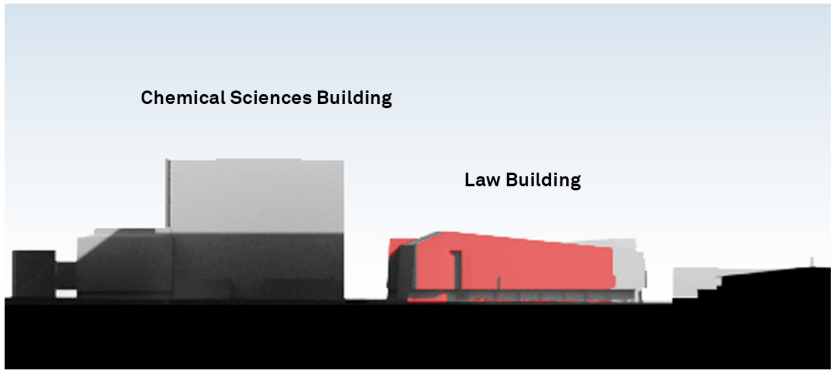

Shadows on the North Elevation of Adjacent Buildings

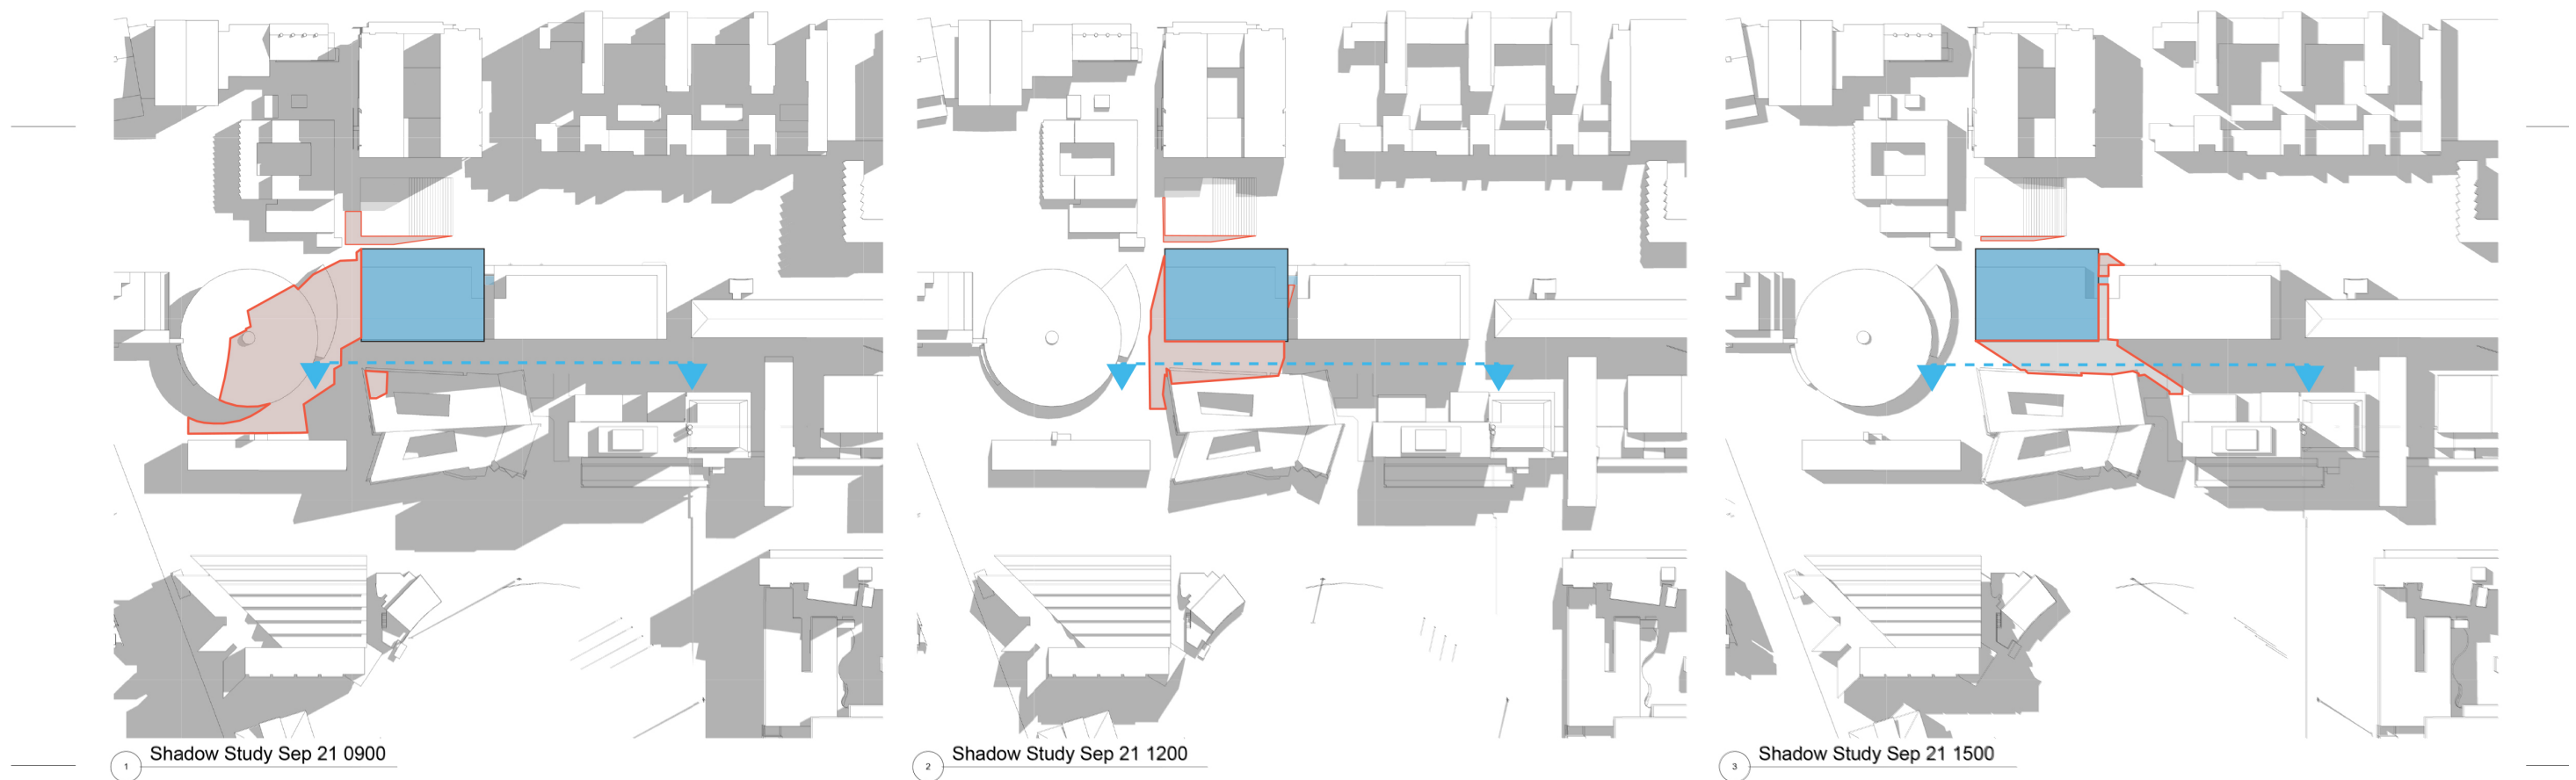

Facade overshadowed by Science and Engineering Building

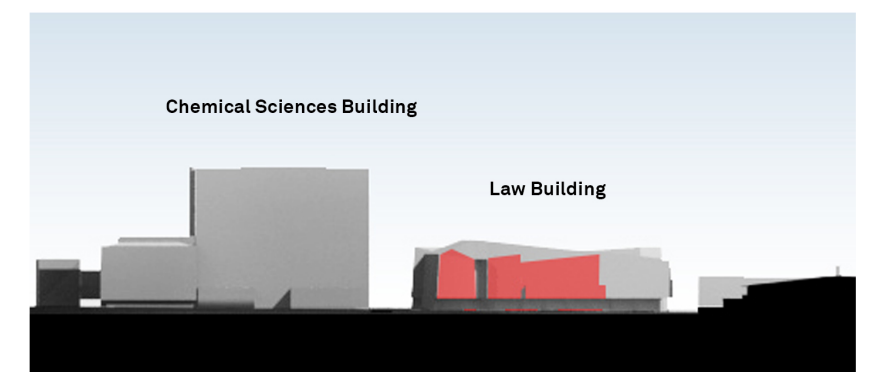

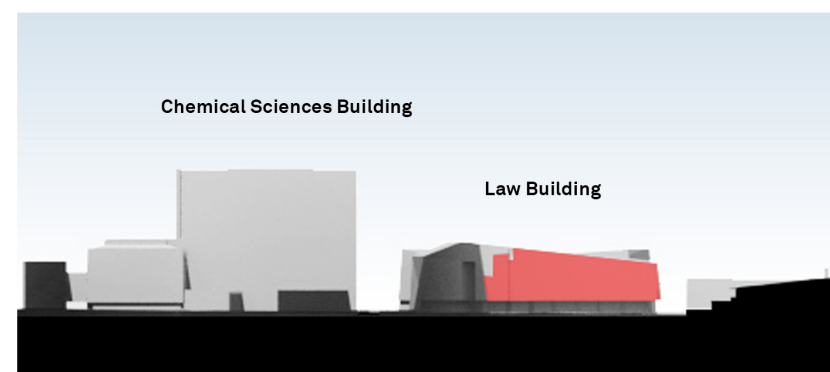

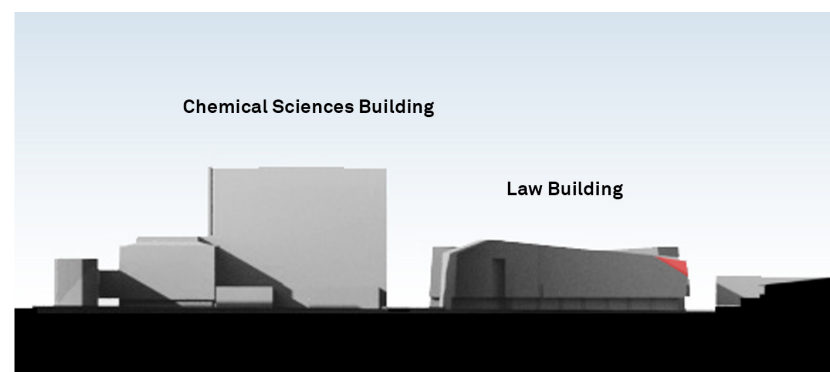

A comprehensive shadow study has been provided to understand impact on surrounding buildings. From the analysis it can be inferred that the proposed building will not adversely impact adjacent public spaces. The diagrams indicate overshadowing of the Law Building to the South in the winter and spring months

in the afternoon. During summer none of the buildings to the North of the SEB will be affected by overshadowing.
