**RE: Existing Street Trees: RHS Northside Clinic Frederick Street ARTARMON NSW**

Dear James,

The five street trees fronting the site are Paper Bark Trees which are native trees. The trees range in heights from approximately 4m to 10m in height. On inspection they appear to be in a poor to fair condition due to continual pruning from over head powerlines and cables. It is my recommendation that they be removed and replaced with a more appropriate smaller street tree to Councils selection.

Regards

Julian Brady
