Management Plan Review

Condition C98 of SSD 7704 – Rushes Creek Poultry Production Farm

Dear,

In accordance with Condition C8(e) of SSD 7704, Management Plans required under the consent are to be reviewed within 3 months of the submission of an issue of a direction of the Planning Secretary under condition A2(b) which requires a review. This review has been undertaken following the reissue of the Secretary's Direction concerning the remediation of the Southern Borrow Pit at Farm2 of Rushes Creek Poultry Production Farm dated 28 July 2023.

Please note, at the time of conducting this review, the NSW Department of Planning and Environment (DPE) granted consent for Modification 4 to SSD-7704. Consequently, this represents an additional basis for necessitating a review in accordance with Condition C8(d). Given the advanced status of the ongoing review, a decision has been made to initiate an additional review associated with the approval of Modification 4. Therefore, a formal request is made to exclude the elements falling under Modification 4 from the scope of this review.

The following Management plans have been reviewed:

1. Operational Environmental Management Plan;
2. Construction Environment Management Plan;
3. Air Quality Management Plan;
4. Community Consultation Plan;
5. Soil and Water Management Plan;
6. Stage 1 Erosion and Sediment Control Plan (Borrow Pit);
7. Waste Management Plan;
8. Emergency Plan;
9. Aboriginal Cultural Heritage Management Plan;
10. Emergency Disposal & Biosecurity Strategy;
11. Pollution Incident Response Management Plan; and
12. Biosecurity Manual.

A summary of changes required under each plan is given below.

1 Operational Environmental Management Plan

Page	Section/Diagram	
17	Table 4	▪ Update Site Contacts
Appendices		▪ Update SSD to Mod 4 ▪ Update Soil and Water Management Plan as revised ProTen WMP Rushes Creek 20220915 REV6.0 ▪ Update PIRMP as revised February 2023 ▪ Update EPL issued 9 February 2023

2 Construction Environmental Management Plan

No Changes recommended

3 Air Quality Management Plan

No changes recommended.

4 Community Consultation Plan

No changes recommended.

5 Soil and Water Management Plan

No changes recommended.
