Introduction

This template must be used and included as supporting documentation for all development applications required, or opting, to address the Recognise Country requirements outlined in the *Western Sydney Aerotropolis Phase 2 Development Control Plan (DCP)* and *Recognise Country: Guidelines for development in the Aerotropolis*. Where a Recognise Country Strategy has been endorsed by the Department of Planning and Environment, the endorsed strategy may be used to build upon the outcomes and inform the completion of a new Recognise Country Response Template.

The purpose of this template is to support applicants to clearly record and outline the process and outcomes in responding to the Recognise Country requirements, as well as empower Aboriginal stakeholders to review and provide a response to outcomes for consideration by the relevant assessment authority. This will also help to reduce potential delays for applicants once with an assessment officer as it clearly outlines the required Recognise Country response information for assessment officers.

Unless stated otherwise, all parts of this template must be completed in full and all required supporting information must accompany the development application or master plan.

One or more additional pages may be attached as a schedule to this response template if there is insufficient space on the form to include all the necessary information.
