

Development consent

Section 89E of the *Environmental Planning and Assessment Act 1979*

As delegate of the Minister for Planning, under delegation dated 16 February 2015, I approve the development referred to in schedule 1, subject to the conditions in schedule 2.

These conditions are required to:

- prevent, minimise, and/or offset adverse environmental impacts including economic and social impacts;
- set standards and performance measures for acceptable environmental performance;
- require regular monitoring and reporting; and
- provide for the ongoing environmental management of the development.

David Gainsford
Executive Director
Priority Projects Assessments

Sydney 13th September 2017

SCHEDULE 1

Application No.:	SSD 7751
Applicant:	Health Administration Corporation
Consent Authority:	Minister for Planning
Land:	22 Hospital Road, Bulli (Lot 1 DP 165903 and part Lot 1 DP 175787)
Approved Development:	Construction and operation of the Bulli Hospital Aged Care Centre of Excellence, including: <ul style="list-style-type: none">• demolition works and removal of 14 trees;• remediation and earthworks;• construction of a part 2, part 3 and part 4 storey building comprising a residential aged care facility and a hospital;• at-grade car park areas providing a total of 50 car spaces and a drop-off area;• signage; and• landscaping, including a courtyard.

DEFINITIONS

Advisory Notes	Advisory information relating to the consent but do not form a part of this consent
Ambulance Station site	Lot 1 DP 175787 or any lot excised or created from this lot that does not form part of the Subject Site
Applicant	Consent holder or person with the benefit of the development consent
Application	The development application and the accompanying drawings plans and documentation described in Condition A2
Construction	All physical work required to construct the development, including but not limited to bulk earthworks, inground works, erection of buildings, landscaping works and other infrastructure covered by this consent
Council	Wollongong Council
Certifying Authority	Professionals that are accredited by the Building Professionals Board to issue construction, occupation, subdivision, strata, compliance and complying development certificates under the EP&A Act, <i>Strata Schemes (Freehold Development) Act 1973</i> and <i>Strata Schemes (Leasehold Development) Act 1986</i>
Day time	The period from 7 am to 6 pm on Monday to Saturday, and 8 am to 6 pm on Sundays and Public Holidays
Department	Department of Planning and Environment
Evening	The period from 6 pm to 10 pm
EIS	<i>Environmental Impact Statement Bulli Hospital Aged Care Centre for Excellence</i> prepared by TCG Planning dated 28 November 2016
EPA	Environment Protection Authority
EP&A Act	<i>Environmental Planning and Assessment Act 1979</i>
EP&A Regulation	<i>Environmental Planning and Assessment Regulation 2000</i>
Feasible	Feasible relates to engineering considerations and what is practical to build
Harm	Harm to the environment includes any direct or indirect alteration of the environment that has the effect of degrading the environment and, without limiting the generality of the above, includes any act or omission that results in pollution, and harm will be material if: a) it involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or b) it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000, (such loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good hard to the environment).
Heritage Division	Heritage Division of the Office of Environment and Heritage
Incident	An occurrence or set of circumstances that: <ul style="list-style-type: none">• causes, or threatens to cause material harm to the environment; or• results in non-compliance with this consent. <i>NOTE: "Harm" is defined in this consent.</i>
Minister	Minister for Planning, or nominee
NCC	National Construction Code
Night time	The period from 10 pm to 7 am on Monday to Saturday, and 10 pm to 8 am on Sundays and Public Holidays
OEH	Office of the Environment and Heritage
PMF	Probable Maximum Flood
Response To Submission (RtS)	<i>Response to Submissions Report Bulli Hospital Aged Care Centre for Excellence</i> prepared by TCG Planning dated 9 June 2017
Reasonable	Reasonable relates to the application of judgement in arriving at a decision, taking into account: mitigation benefits, cost of mitigation versus benefits provided, community views and the nature and extent of potential improvements
Subject Site	22 Hospital Road, Bulli (Lot 1 DP 165903 and part Lot 1 DP 175787)
Secretary	Secretary of Department of Planning and Environment
Secretary's approval, agreement or satisfaction	A written approval from the Secretary (or nominee/delegate)

Sensitive receiver	Residence, education institution (e.g. school, university, TAFE college), health care facility (e.g. nursing home, hospital), religious facility (e.g. church) and children's day care facility
STP	Sustainable Travel Plan
TfNSW	Transport for NSW
Zone of Influence	The horizontal distance from the edge of the excavation site or any construction zone (including on-site haulage routes) to twice the maximum excavation depth

SCHEDULE 2

PART A ADMINISTRATIVE CONDITIONS

Development Description

A1. Except as amended by the conditions of this approval, development approval is granted only to carrying out the development as described in Schedule 1.

Terms of Consent

A2. The Applicant must carry out the development in accordance with the conditions of consent and generally in accordance with the:

- a) State Significant Development Application SSD 7751;
- b) EIS, except where amended by the RtS and additional information submitted on 8 August 2017; and
- c) the following drawings, except for:
 - i) any modifications which are Exempt or Complying Development; or
 - ii) as otherwise provided by the conditions of this consent.

Inconsistency between documents

- A3. If there is any inconsistency between the plans and documentations referred to above, the most recent document shall prevail to the extent of the inconsistency. However, conditions of this consent prevail to the extent of any inconsistency. Where there is an inconsistency between approved elevations and plans, the elevations prevail.
- A4. The Applicant must comply with any requirements of the Secretary arising from the Department's assessment of:
- any strategies, plans, programs, reviews, audits, reports or correspondence that are submitted in accordance with this consent; and
 - the implementation of any actions or measures contained in these documents.

Development Expenses

- A5. It is the responsibility of the Applicant to meet all expenses incurred in undertaking the development, including expenses incurred in complying with conditions imposed under this consent.

Limits on Consent

- A6. This consent will lapse five years from the date of consent unless the works associated with the project have physically commenced.

Prescribed Conditions

- A7. The Applicant must comply with all relevant prescribed conditions of development consent under Part 6, Division 8A of the EP&A Regulation.

Dispute Resolution

A8. In the event of a dispute between the Applicant and a public authority, in relation to an applicable requirement in this consent or relevant matter relating to the Development, either party may refer the matter to the Secretary for resolution. The Secretary's resolution of the matter shall be binding on the parties.

Long Service Levy

A9. For work costing \$25,000 or more, a Long Service Levy must be paid. For further information please contact the Long Service Payments Corporation on their Helpline 13 1441.

Legal Notices

A10. Any advice or notice to the consent authority must be served on the Secretary.

Obligation to Minimise Harm to the Environment

A11. In addition to meeting the specific performance criteria established under this consent, the Applicant must implement all reasonable and feasible measures to prevent and/or minimise any harm to the environment that may result from the construction or operation of the development.

PART B PRIOR TO COMMENCEMENT OF WORKS

Remediation

- B1. Prior to the commencement of works the Applicant must submit to the Certifying Authority a Part B Interim Site Audit Statement prepared by an accredited site auditor verifying that the land can be made suitable for the uses proposed as part of this approval.

Certified Plans

- B2. Plans certified in accordance with section 109R of the EP&A Act are to be submitted to the Certifying Authority and the Department prior to commencement of each stage of the construction works and must include details as required by any of the following conditions.

Notice of Commencement of Works

- B3. The Certifying Authority, Council and the Secretary must be given written notice, at least 48 hours prior to the commencement of building or subdivision works on the Subject Site.

Demolition

- B4. The demolition work must comply with the provisions of Australian Standard AS2601: 2001 *The Demolition of Structures*. The work plans required by AS2601: 2001 must be accompanied by a written statement from a suitably qualified person that the proposals contained in the work plan comply with the safety requirements of the Standard. The work plans and the statement of compliance must be submitted to the satisfaction of the Certifying Authority prior to the commencement of works.

Reflectivity

- B5. The building materials used on the facades of the buildings must have a maximum normal specular reflectivity of visible light of 20 per cent and must be designed so as not to result in glare that causes any discomfort or threatens the safety of pedestrians or drivers. A statement demonstrating compliance with these requirements or where compliance cannot be met a report that demonstrates that the exceedance would not result in glare that causes any discomfort or threatens the safety of pedestrians or drivers is to be submitted to the satisfaction of the Certifying Authority prior to the commencement of above ground works.

Outdoor Lighting

- B6. All outdoor lighting within the Subject Site must comply with AS 1158.3.1:2005 *Lighting for roads and public spaces – Pedestrian area (Category P) lighting – Performance and design requirements* and AS 4282-1997 *Control of the obtrusive effects of outdoor lighting*. Details demonstrating compliance with these requirements are to be submitted to the satisfaction of the Certifying Authority.

Access for People with Disabilities

- B7. The works the subject of this application must be designed and constructed to provide access and facilities for people with a disability in accordance with the NCC. The Certifying Authority must ensure that evidence of compliance with this condition from an appropriately qualified person is provided and that the requirements are referenced on any certified plans.

Erosion and Sedimentation Control

- B8. Soil erosion and sediment control measures must be designed in accordance with the document *Managing Urban Stormwater – Soils & Construction Volume 1* (2004) by Landcom. Details are to be submitted to the satisfaction of the Certifying Authority prior to the commencement of any works.

Pre-Construction Dilapidation Reports

- B9. The Applicant is to engage a qualified structural engineer to prepare a **Pre-Construction Dilapidation Report** detailing the current structural condition of all retained existing and adjoining buildings within the site, infrastructure and roads within the 'zone of influence'. The report must be submitted to the satisfaction of the Certifying Authority prior to the commencement of any works.

Structural Details

- B10. Prior to the commencement of works, the Applicant must submit to the satisfaction of the Certifying Authority structural drawings prepared and signed by a suitably qualified practising Structural Engineer that demonstrates compliance with:
- a) the relevant clauses of the NCC; and
 - b) the development consent.

Car Parking and Service Vehicle Layout

- B11. Plans demonstrating compliance with the following traffic and parking requirements must be submitted to the satisfaction of the Certifying Authority prior to the commencement of relevant above ground works:
- a) all vehicles should enter and leave the Subject Site in a forward direction. In the event that site constraints do not permit heavy rigid vehicles to enter and leave in a forward direction, then all reversing movements should be undertaken under the control of certified traffic controllers to ensure public safety when vehicles are reversing;
 - b) the layout of the proposed car parking areas that form part of this consent (including driveways, grades, turn paths, sight distance requirements, aisle widths, aisle lengths, and parking bay dimensions) should be in accordance with AS/NZS 2890.1:2004 *Parking facilities Part 1: Off-street car parking*, AS/NZS 2890.6:2009 *Parking facilities – Off-street parking for people with disabilities* and AS/NZS 2890.2-2002 *Parking facilities – Off-street commercial vehicle facilities* for heavy vehicle usage;
 - c) all demolition and construction vehicles are to be contained wholly within the site and vehicles must enter the site before stopping;
 - d) appropriate pedestrian advisory signs are to be provided at the egress from the car park;
 - e) all works/ regulatory signposting associated with the proposed development shall be at no cost to the relevant roads authority; and
 - f) the swept path of the longest vehicle entering and exiting the Subject Site in association with the new work, as well as manoeuvrability through the Subject Site, must be in accordance with AUSTROADS.

Number of Car Spaces

- B12. A minimum of 50 car spaces must be provided for the development on the site. Details confirming the parking numbers must be submitted to the satisfaction of the Certifying Authority prior to the commencement of works.

Bicycle Parking

- B13. Plans demonstrating compliance with the following bicycle parking requirements must be submitted to the satisfaction of the Certifying Authority prior to commencement of works:
- a) the provision of a minimum 12 bicycle spaces;
 - b) the layout, design and security of bicycle facilities must comply with the minimum requirements of *Australian Standard AS 2890.3 Bicycle Parking Facilities*, and be located in easy to access, well-lit areas that incorporate passive surveillance;
 - c) appropriate pedestrian and cyclist advisory signs are to be provided; and
 - d) all works/regulatory signposting associated with the proposed developments shall be at no cost to the relevant roads authority.

Groundwater Management Plan

B14. Prior to the commencement of works, a **Groundwater Management Plan (GMP)** must be prepared in consultation with NSW Department of Primary Industries, including undertaking groundwater monitoring prior to construction, to confirm groundwater conditions on site and determine management requirements, including identifying and complying with any applicable licensing requirements.

Flooding

B15. Prior to the commencement of works, the Applicant must ensure that the minimum floor levels for the generator and medical gas store areas are set at the Probable Maximum Flood (PMF) level plus 0.5 metres freeboard.

B16. Any portion of the building or structure below the PMF plus 0.5 metres freeboard level should be built from flood compatible materials. Details must be submitted to the satisfaction of the Certifying Authority prior to the commencement of works.

Noise Management Measures

B17. Prior to commencement of works, the Applicant must incorporate the noise mitigation recommendations in the *DA Acoustic Assessment* prepared by Acoustic Logic, dated 19 October 2016, in the detailed design drawings and submit to the Department documentation demonstrating that the noise impacts have been adequately mitigated to not exceed the noise criteria identified in the report, except the morning shoulder period which shall be set at 40 dB(A). The mechanical must also be designed to not exceed 45 dBL_{Amax} during the night time period and 50 dBL_{Amax} during the morning shoulder period.

Mechanical Ventilation

B18. All mechanical ventilation systems must be installed in accordance with Part F4.5 of the NCC and must comply with the Australian Standards *AS1668.2 Mechanical Ventilation of Buildings* and *AS3666 Microbial Control of Air Handling and Water Systems of Building*, to ensure adequate levels of health and amenity to the occupants of the building and to ensure environment protection. Details must be submitted to the satisfaction of the Certifying Authority prior to the commencement of works.

Stormwater and Drainage Works Design

B19. Final design plans of the stormwater drainage systems, prepared by a qualified practicing professional and in accordance with the requirements of Council must be submitted to the Certifying Authority prior to the commencement of any works. The hydrology and hydraulic calculations must be based on models described in the relevant edition of Australian Rainfall and Runoff.

Storage and Handling of Waste

B20. The building plans and specifications accompanying the relevant plans submitted to the Certifying Authority prior to the commencement of any building works shall demonstrate that an appropriate area will be provided within the premises for the storage of garbage bins and recycling containers and all waste and recyclable material generated by this premises. The storage area(s) must:

- a) ensure all internal walls of the storage area are rendered to a smooth surface, coved at the floor/wall intersection, graded and appropriately drained with a tap in close proximity to facilitate cleaning;
- b) include provision for the separation and storage, in appropriate categories, of material suitable for recycling; and
- c) include provision for separate storage and collection of organic/food waste.

Landscaping

B21. Prior to the commencement of works, the landscaping plan should be revised to replace Wild iris (*Diets grandiflora*) plants with a species suitable for the microclimate created by the development and the proximity of the riparian zone and escarpment forest. Preference should be given to local native species.

Road Design

B22. Kerb and gutter, stormwater drainage, full road width pavement including traffic facilities (vehicle crossings) and paved footpaths must be constructed along the areas where road works are to be undertaken. All roads and traffic facilities (vehicle crossings) must be designed to meet the requirements of Council and the RMS (if applicable) and obtain the necessary permits and approvals from the relevant road authority.

Construction Environmental Management Plan

B23.

- a) Prior to the commencement of works on the Subject Site, a **Construction Environmental Management Plan (CEMP)** that addresses those works must be submitted to the satisfaction of the Certifying Authority. The CEMP must address, but not be limited to, the following matters where relevant:
 - i) hours of work;
 - ii) 24 hour contact details of site manager;
 - iii) traffic management, in consultation with Council;
 - iv) construction noise and vibration management, prepared by a suitable qualified person;
 - v) management of dust to protect the amenity of the neighbourhood;
 - vi) erosion and sediment control;
 - vii) stormwater control and discharge;
 - viii) measures to ensure that sediment and other materials are not tracked onto the roadway by vehicles leaving the Subject Site;
 - ix) external lighting in compliance with *AS4282:1997 Control of the Obtrusive Effects of Outdoor Lighting*;
 - x) an Unexpected Finds Protocol (UFP);
 - xi) fauna management plan;
 - xii) landscape management works, prepared in consultation with NSW Department of Primary Industries, to minimise impacts on the riparian corridor of Whartons Creek and provide rehabilitation works to offset encroachment into the riparian corridor; and
 - xiii) waste classification (for materials to be removed) and validation (for materials to remain) during construction to confirm the contamination status in these areas of the site.
- b) The CEMP must not include works that have not been explicitly approved in the development consent. In the event of any inconsistency between the consent and the CEMP, the consent shall prevail.
- c) The Applicant must submit a copy of the CEMP to the Department and to the Council prior to commencement of works.

Construction Noise and Vibration Management Plan

B24.

- a) Prior to the commencement of works on the Subject Site, a **Construction Noise and Vibration Management Plan (CNVMP)** must be submitted to the satisfaction of the Certifying Authority. The plan must address, but not be limited to, the following matters where relevant:
 - i) be prepared by a suitably qualified expert;
 - ii) be prepared in consultation with all noise sensitive receivers where noise levels exceed the highly affected noise management level, in accordance with EPA guidelines;

- iii) identify works that will exceed the highly affected noise management level, which must be restricted to the standard construction hours in the EPA guidelines;
- iv) describe the measures that would be implemented to ensure:
 - v) best management practice is being employed;
 - vi) compliance with the relevant conditions of this consent;
 - vii) describe the proposed noise and vibration management measures in detail;
 - viii) include strategies that have been developed to address impacts to noise sensitive receivers where noise levels exceed the construction noise management level, for managing high noise generating works;
 - ix) describe the consultation undertaken to develop the strategies in viii) above;
 - x) evaluates and reports on the effectiveness of the noise and vibration management measures; and
 - xi) include a complaints management system that would be implemented for the duration of the project.
- b) The Applicant must submit a copy of the CNVMP to the Department and Council prior to the commencement of work.

Construction Waste Management Plan

B25.

- a) Prior to the commencement of works on the Subject Site, a **Construction Waste Management Plan (CWMP)**, prepared by a suitably qualified person in consultation with Council, must be submitted to the satisfaction of the Certifying Authority. The CWMP must address, but not be limited to, the following matters:
 - i) recycling of demolition materials including concrete; and
 - ii) removal of hazardous materials and disposal at an approved waste disposal facility in accordance with the requirements of the relevant legislation, codes, standards and guidelines, prior to the commencement of any building works.
- b) Details demonstrating compliance with the relevant legislative requirements, associated with the removal of hazardous waste, particularly the method of containment and control of emission of fibres to the air, are to be submitted to the satisfaction of the Certifying Authority prior to the removal of any hazardous materials.
- c) The Applicant must submit a copy of the plan to the Department and Council prior to the commencement of work.
- d) The Applicant must notify the Roads and Maritime Authority's Traffic Management Centre (TMC) of the truck route(s) to be followed by trucks transporting waste material from the Subject Site, prior to the commencement of the removal of any waste material from the Subject Site.

Construction Traffic and Pedestrian Management Plan

B26.

- a) A **Construction Traffic and Pedestrian Management Plan (CTPMP)** must be prepared by a suitably qualified person in consultation with Transport for NSW, RMS and Council. The CTPMP must be submitted to the satisfaction of the Certifying Authority prior to commencement of works. The CTPMP must include, but not limited to, the following:
 - i) locations of the proposed work zone, plant storage and staging area;
 - ii) haulage routes;
 - iii) construction vehicle access arrangements;
 - iv) proposed construction hours;
 - v) estimated number of construction vehicle movements during various times of the day;
 - vi) construction vehicle parking and any temporary additional parking for hospital related use;
 - vii) construction program;

- viii) consultation strategy for liaison with surrounding stakeholders;
 - ix) any potential impacts to general traffic, cyclists, pedestrians, parking and bus services within the vicinity of the site from construction vehicles during the construction of the proposed works; and
 - x) reference to CTPMPs for developments within or around the development site to ensure that coordination of work activities are managed to minimise impacts on the road network.
- b) The Applicant must submit a copy of the CTPMP to the Department and Council prior to the commencement of work.

Geotechnical

- B27. All recommendations of the *Report on Geotechnical Investigation* prepared by Douglas Partners, dated 22 August 2003, and follow up *Geotechnical comment* by Douglas Partners, Project 38227.03 dated 12 April 2016 and Project 38227.03 dated 19 May 2016 must be incorporated in the earthworks plan.
- B28. Prior to the commencement works, excluding site preparation earthworks and remediation works, the geotechnical consultant must prepare a works-as-executed report detailing encountered geotechnical conditions and how the earthworks addressed these conditions so that the residual geotechnical constraints can be accommodated within the structural designs for the proposed development. These structural designs must be confirmed or amended by the structural engineer based on the works-as-executed geotechnical report.

Complaints and Enquiries Procedure

- B29. Prior to the commencement of works, or as otherwise agreed by the Secretary, the following must be made available for community enquiries and complaints for the duration of construction:
- a) a toll-free 24 hour telephone number(s) on which complaints and enquiries about the application may be registered;
 - b) a postal address to which written complaints and enquires may be sent; and
 - c) an email address to which electronic complaints and enquiries may be transmitted.
- B30. A **Complaints Management System** must be prepared before the commencement of any construction works and be implemented and maintained for the duration of these works.

The **Complaints Management System** must include a **Complaints Register** to be maintained recording information on all complaints received about the development during the carrying out of any construction works associated with the development. The **Complaints Register** must record the:

- a) number of complaints received;
- b) number of people affected in relation to a complaint; and
- c) nature of the complaint and means by which the complaint was addressed and whether resolution was reached, with or without mediation.

The **Complaints Register** must be provided to the Secretary upon request, within the timeframe stated in the request.

Pre-Construction Compliance Report

- B31. A **Pre-Construction Compliance Report** must be prepared and submitted to the Secretary for information before the commencement of construction works. The **Pre-Construction Compliance Report** must include:
- a) details of how the terms of this approval that must be addressed before the commencement of construction have been complied with; and

- b) the intended commencement date for the construction works.

Construction must not commence until the **Pre-Construction Compliance Report** has been submitted to the Secretary.

Utility Services

- B32. Prior to the commencement of work the Applicant is to negotiate with the utility authorities (e.g. Ausgrid and Telecommunications Carriers) in connection with the relocation and/or adjustment of the services affected by the construction of the building structure.
- B33. Prior to the commencement of above ground works written advice must be obtained from the electricity supply authority, an approved telecommunications carrier and an approved gas carrier (where relevant) stating that satisfactory arrangements have been made to ensure provisions of adequate services.

PART C DURING CONSTRUCTION

Hours of Work

C1.

- a) The hours of construction, including the delivery of materials to and from the Subject Site, must be restricted as follows:
 - i) between 7 am and 6 pm, Mondays to Fridays inclusive;
 - ii) between 7 am and 5 pm, Saturdays; and
 - iii) no work on Sundays and public holidays.
- b) Works may be undertaken outside these hours where:
 - i) the delivery of materials is required outside these hours by the Police or other authorities; or
 - ii) it is required in an emergency to avoid the loss of life, damage to property and/or to prevent environmental harm; or
 - iii) variation is approved in advance in writing by the Secretary or nominee.

Management Plans

- C2. The CEMP, CNVMP, CWMP, GMP and CTPMP's (as revised from time to time) must be implemented by the Applicant for the duration of the construction works.

Fauna Management

- C3. A pre-clearance survey should be undertaken to identify any additional roosting or nesting fauna (including drays) which are present within all trees proposed for removal or trimming and within the unused building. This work should be completed by a qualified ecologist and should be undertaken one day prior to any scheduled clearance works. Vegetation clearance works should be supervised by a qualified ecologist for any habitat trees identified in the pre-clearance survey to salvage and relocate any encountered fauna. Any salvaged wildlife should be released on site with nocturnal species released after dark and in the instance that an animal is injured on site at any time, work should cease immediately and a wildlife carer contacted to collect the animal.
- C4. Any hollow-bearing trees approved to be removed must be carefully felled in sections. Hollow-bearing sections should be carefully lowered to the ground for inspection by a supervising qualified ecologist.

Erosion and Sediment Control

- C5. All erosion and sediment control measures, are to be effectively implemented and maintained at or above design capacity for the duration of the construction works and until such time as all ground disturbed by the works have been stabilised and rehabilitated so that it no longer acts as a source of sediment.

Disposal of Seepage and Stormwater

- C6. Any seepage or rainwater collected on-site during construction or groundwater must not be pumped to the street stormwater system unless separate prior approval is given in writing by Council.

Approved Plans to be On-site

- C7. A copy of the approved and certified plans, specifications and documents incorporating conditions of approval and certification must be kept on the Subject Site at all times and must be readily available for perusal by any officer of the Department, Council or the Certifying Authority.

Site Notice

C8.

- a) A site notice(s) must be prominently displayed at the boundaries of the Subject Site for the purposes of informing the public of project details including, but not limited to the details of the Builder, Certifying Authority and Structural Engineer.
- b) The site notice(s) is to satisfy all but not be limited to, the following requirements:
 - i) minimum dimensions of the notice are to measure 841 mm x 594 mm (A1) with any text on the notice to be a minimum of 30 point type size,
 - ii) the notice is to be durable and weatherproof and is to be displayed throughout the works period,
 - iii) the approved hours of work, the name of the site/project manager, the responsible managing company (if any), its address and 24 hour contact phone number for any inquiries, including construction/noise complaint are to be displayed on the site notice, and
 - iv) the notice(s) is to be mounted at eye level on the perimeter hoardings/fencing and is to state that unauthorised entry to the Subject Site is not permitted.

Construction Noise Management

- C9. The development must be constructed with the aim of achieving the construction noise management levels detailed in the *Interim Construction Noise Guideline (Department of Environment and Climate Change, 2009)*. All feasible and reasonable noise mitigation measures must be implemented and any activities that could exceed the construction noise management levels must be identified and managed in accordance with the CNVMP, as required by condition B24.
- C10. If the noise from a construction activity is substantially tonal or impulsive in nature (as described in Chapter 4 of the NSW *Industrial Noise Policy*), 5 dB(A) must be added to the measured construction noise level when comparing the measured noise with the construction noise management levels.
- C11. The Applicant shall ensure construction vehicles do not arrive at the Subject Site or surrounding residential precincts outside of the construction hours of work outlined under condition C1.
- C12. The Applicant must schedule rock breaking, rock hammering, sheet piling, pile driving and any similar activity only between the following hours unless otherwise approved by the Secretary:
 - a) 9 am to 12 pm, Monday to Friday;
 - b) 2 pm to 5 pm Monday to Friday; and
 - c) 9 am to 12 pm, Saturday.
- C13. Wherever practical, and where sensitive receivers may be affected, piling activities are completed using augered piling methods. If driven piles are required they must only be installed where outlined in a CNVMP.

- C14. Any noise generated during the construction of the development must not be offensive noise within the meaning of the *Protection of the Environment Operations Act, 1997* or exceed approved noise limits for the Subject Site.

Vibration Criteria

- C15. Vibration caused by construction at any residence or structure outside the Subject Site must be limited to:
- a) for structural damage vibration, *German Standard DIN 4150 Part 3 Structural Vibration in Buildings. Effects on Structures*; and
 - b) for human exposure to vibration, the evaluation criteria presented in *British Standard BS 6472 – Guide to Evaluate Human Exposure to Vibration in Buildings (1 Hz to 80 Hz)* for low probability of adverse comment.
- C16. The above limits apply unless otherwise outlined in a CNVMP, approved by the Certifying Authority.
- C17. Vibratory compactors must not be used closer than 30 metres from residential buildings unless vibration monitoring confirms compliance with the vibration criteria specified above.

Work Cover Requirements

- C18. To protect the safety of work personnel and the public, the work site must be adequately secured to prevent access by unauthorised personnel, and work must be conducted at all times in accordance with relevant Work Cover requirements.

Hoarding Requirements

- C19. The following hoarding requirements must be complied with:
- a) no third party advertising is permitted to be displayed on the subject hoarding/fencing; and
 - b) the construction site manager shall be responsible for the removal of all graffiti from any construction hoardings or the like within the construction area within 48 hours of its application.

Road Occupancy Licence

- C20. A Road Occupancy Licence must be obtained from the Transport Management Centre (RMS) for any works impacting on traffic flows of adjoining roads during construction activities.

Protection of Trees

- C21.
- a) No street trees are to be trimmed or removed unless it forms a part of this development consent or prior written approval from Council is obtained or is required in an emergency to avoid the loss of life or damage to property.
 - b) All street trees shall be protected at all times during construction. Any tree on the footpath, which is damaged or removed during construction due to an emergency, shall be replaced, to the satisfaction of Council.
 - c) All trees on the Subject Site that are not approved for removal and trees on adjoining properties are to be suitably protected by way of tree guards, barriers or other measures as necessary to protect root system, trunk and branches, during construction.
- C22. Proposed underground services such as drainage, electrical and sewerage infrastructure should be located so that they do not adversely impact on the future health of existing trees. To ensure there is no adverse impact on the existing trees any underground services should be located outside the Tree Protection Zones as described by the project arborist.

Waste

- C23. All waste generated by the project must be assessed, classified and managed in accordance with the *Waste Classification Guidelines Part 1: Classifying Waste* (DECCW, 2009).
- C24. The body of any vehicle or trailer used to transport waste or excavation spoil shall be covered before leaving the premises to prevent any spillage or escape of any dust, waste or spoil. Mud, splatter, dust and other material likely to fall from or be cast off the wheels, underside or body of any vehicle, trailer or motorised plant leaving the site shall be removed before leaving the premises.

No obstruction of public way

- C25. The public way (outside of any construction works zone) must not be obstructed by any materials, vehicles, refuse, skips or the like, under and circumstances. Non-compliance with this requirement will result in the issue of a notice by the relevant Authority to stop all works on site.

Impact of Below Ground (sub-surface) Works – Non-Aboriginal Relics

- C26. If any unexpected archaeological relics are uncovered during the course of the work, then all works must cease immediately in that area and the Heritage Division contacted. Depending on the possible significance of the relics, an archaeological assessment and management strategy may be required before further works can continue in that area. Works may only recommence with the written approval of the Heritage Division.

Discovery of Aboriginal Heritage

- C27. In the event that surface disturbance identifies a new Aboriginal object, all works must halt in the immediate area to prevent any further impacts to the object(s). A suitably qualified archaeologist and the registered Aboriginal representatives must be contacted to determine the significance of the objects. The site is to be registered in the Aboriginal Heritage Information Management System (AHIMS) which is managed by OEH and the management outcome for the site included in the information provided to AHIMS. The Applicant must consult with the Aboriginal community representatives, the archaeologists and OEH to develop and implement management strategies for all projects/sites.

Incident Reporting

- C28. Within 24 hours of the occurrence of an incident that causes (or may cause) significant harm to the environment, the Applicant must notify the Secretary and any other relevant agencies of the incident.
- C29. Within seven days of the detection of the incident, the Applicant must provide the Secretary and any relevant agencies with a detailed report on the incident, and such further reports as may be requested.

Compliance Tracking and Reporting

- C30. The Applicant must provide regular (six monthly) reporting on any environmental performance required by the development consent for the development on its project website, in accordance with the reporting arrangements in any plans or other documents approved under the conditions of this consent.

Access to Information

- C31. Within six months of the date of this consent the Applicant must make the following information publicly available on its project website and keep the information up to date:
- a) the EIS;
 - b) current statutory approvals for the development;

- c) approved strategies, plans or other documents required by the conditions of consent;
- d) a complaints register, updated on an annual basis; and
- e) any other matter required by the Secretary.

Note: This condition does not require any confidential information to be made available to the public.

Compliance – General

- C32. The Applicant must ensure that employees, contractors and sub-contractors are aware of, and comply with, the conditions of this consent relevant to their respective activities.

PART D PRIOR TO OCCUPATION OR COMMENCEMENT OF USE

Remediation

- D1. Prior to the occupation, the Applicant must submit to the Certifying Authority a site validation report, notice of completion certificate and a site audit statement prepared by an EPA accredited site auditor verifying that remediation of the site has been completed and that the land is suitable for the uses proposed as part of this approval.

Stormwater

- D2. Prior to occupation, the Applicant must provide to the Department and the Certifying Authority evidence that there are satisfactory arrangements for the lawful disposal of stormwater for the development through any downstream property. Any easements for stormwater drainage for the site over private property must be registered on the respective title and a copy included in any documentation submitted to the Department and the Certifying Authority prior to occupation. Any easement over private property must be of a sufficient width to allow any stormwater infrastructure to be installed and/or maintained.

Consolidation of Lots

- D3. The lots which form the Subject Site are to be consolidated. Evidence of the consolidation must be provided to the satisfaction of the Certifying Authority prior to occupation.

Residential Care Facility

- D4. Prior to occupation of the residential care facility, a restriction must be registered against the subject lot (following boundary adjustment) in accordance with section 88E of the *Conveyancing Act 1919* restricting the occupation of the residential care facility only to:
- a) seniors or people who have a disability,
 - b) people who live within the same household with seniors or people who have a disability, and
 - c) staff employed to assist in the administration of and provision of services to residents of the residential care facility.

Car Parking on Ambulance Station Site

- D5. An agreement for exclusive use of a minimum of 14 car spaces on the Ambulance Station site must be executed and submitted to the Certifying Authority prior to occupation. If the agreement is varied or terminated resulting in access to the spaces being revoked then the Applicant must provide an additional 14 car parking spaces on the site within three months of the spaces becoming unavailable, or as otherwise agreed by the Secretary.

Bush Fire Emergency Management and Evacuation Plan

- D6. A **Bush Fire Emergency Management and Evacuation Plan** must be prepared by a suitably qualified bushfire consultant and must be consistent with *Development Planning - A Guide to Developing a Bush Fire Emergency Management and Evacuation Plan December 2014* and *Australian Standard AS3745 2010 Planning for Emergencies in Facilities*. A copy of the plan must be submitted to the Department, NSW Rural Fire Service, Council and the Certifying Authority prior to occupation.

Sustainable Travel Plan

- D7. The **Sustainable Travel Plan (STP)** for the development must be prepared in consultation with TfNSW and submitted to the Secretary for approval prior to occupation unless otherwise agreed by the Secretary. The STP must identify measures to support sustainable transport modes, target a reduction in private vehicle travel and include provision for review and monitoring.

Terrace/Balcony Treatment

- D8. Prior to occupation, privacy screening must be provided to terrace/balcony areas.

Bicycle Spaces

- D9. The layout, design and security of bicycle facilities either on-street or off-street must comply with the minimum requirements of *Australian Standard AS 2890.3 – 1993 Parking Facilities Part 3: Bicycle Parking Facilities*.

Fences

- D10. Any new fences constructed on the site and located in the flood plain should be of a type that will not obstruct the free flow of floodwaters and not cause damage to surrounding land in the event of a flood.

Mechanical Ventilation

- D11. Following completion, installation and testing of all the mechanical ventilation systems, the Applicant must provide evidence to the satisfaction of the Certifying Authority, prior to occupation, that the installation and performance of the mechanical systems complies with:
- a) the NCC;
 - b) *Australian Standard AS1668 The use of ventilation and air-conditioning in buildings* and other relevant codes;
 - c) the development consent and any relevant modifications; and
 - d) any dispensation granted by the New South Wales Fire Brigade.

Public Domain

- D12. The Applicant must construct a new broom finished concrete footpath for the entire frontage of the development, which must meet relevant access standards, prior to occupation.
- D13. The Applicant must prior to occupation, design in consultation with Council and undertake street tree planting including mulched edged tree planting area, 100L tree and tree stakes.
- D14. Any redundant vehicular crossovers rendered unnecessary by this development should be reconstructed to normal kerbing

Road Damage

- D15. The cost of repairing any damage caused to Council or other Public Authority's assets in the vicinity of the Subject Site as a result of construction works associated with the approved development is to be met in full by the Applicant prior to occupation.

Compliance Certificate

- D16. A Section 73 Compliance Certificate under the *Sydney Water Act 1994* must be obtained from Sydney Water Corporation.

Application must be made through an authorised Water Servicing Coordinator. Please refer to the "Your Business" section of the web site www.sydneywater.com.au then follow the "e-Developer" icon or telephone 13 20 92 for assistance.

The Section 73 Certificate must be submitted to the Certifying Authority prior to occupation.

Post-construction Dilapidation Report

- D17. Prior to occupation:
- a) the Applicant must engage a suitably qualified person to prepare a **Post-Construction Dilapidation Report** at the completion of the construction works. This report is to ascertain whether the construction works created any structural damage to adjoining hospital buildings, infrastructure and roads;

- b) the report is to be submitted to the satisfaction of the Certifying Authority. In ascertaining whether adverse structural damage has occurred to adjoining hospital buildings, infrastructure and roads, the Certifying Authority must:
 - i) compare the post-construction dilapidation report with the pre-construction dilapidation report required by these conditions; and
 - ii) have written confirmation from the relevant authority that there is no adverse structural damage to their infrastructure and roads;
- c) a copy of this report is to be forwarded to the Council.

Fire Safety Certification

D18. Prior to occupation, a **Fire Safety Certificate** must be obtained for all the Essential Fire or Other Safety Measures forming part of this consent. A copy of the Fire Safety Certificate must be submitted to the relevant authority and Council. The Fire Safety Certificate must be prominently displayed on the premises.

Structural Inspection Certificate

D19. A **Structural Inspection Certificate** or a **Compliance Certificate** must be submitted to the satisfaction of the Certifying Authority prior to occupation. A copy of the relevant Certificate with an electronic set of final drawings (contact approval authority for specific electronic format) must be submitted to the approval authority and the Council after:

- a) the site has been periodically inspected and the Certifier is satisfied that the structural works is deemed to comply with the final design drawings; and
- b) the drawings listed on the Certificate have been checked with those listed on the final Design Certificate/s.

Signage

D20. Way finding signage for pedestrians and cyclists must be installed prior to occupation.

Registration of Easements

D21. Prior to occupation, the Applicant must provide to the Certifying Authority evidence that all matters required to be registered on title including easements required by this consent, approvals, and other consents have been lodged for registration or registered at the NSW Land and Property Information.

Food Preparation Areas

D22. All food premises must be designed and constructed to comply with Food Safety Standard 3.2.3 *Food Premises and Equipment* of the Food Standards Code.

D23. The Applicant is to obtain a certificate from a suitably qualified tradesperson, certifying that the kitchen, food storage and food preparation areas have been fitted in accordance with *Australian Standard AS4674 Design, construction and fit-out of food premises*. The Applicant must provide evidence of receipt of the certificate to the satisfaction of the Certifying Authority prior to the occupation.

PART E POST OCCUPATION

Bush Fire Safety

- E1. The Subject Site must be managed as an inner protection area (IPA) as outlined within section 4.1.3 and Appendix 5 of 'Planning for Bush Fire Protection 2006' and the NSW Rural Fire Service's document 'Standards for asset protection zones'.
- E2. The Bushfire Fuel Management Plan prepared by Travers bushfire & ecology, dated 31 May 2017, must be implemented and the bushfire management measures revised to address any revised bushfire risk, if necessary.
- E3. The **Bush Fire Emergency Management and Evacuation Plan** as required by condition D6 must be implemented accordingly.

Sustainable Travel Plan

- E4. The STP as required by condition D7 must be updated annually and must be implemented accordingly.

Unobstructed Driveways and Parking Areas

- E5. All driveways and parking areas must be unobstructed at all times. Driveways and car spaces must not be used for the manufacture, storage or display of goods, materials or any other equipment and shall be used solely for vehicular access and for the parking of vehicles associated with the use of the premises.

Noise Control – Plant and Machinery

- E6. Noise associated with the operation of any plant, machinery or other equipment on the Subject Site, must not exceed 5 dB(A) above the rating background noise level when measured at the boundary of the sensitive receiver.
- E7. The Applicant must carry out a noise monitoring program for a minimum period of one week where valid data is collected following occupation. The monitoring program must be carried out by an appropriately qualified person and a monitoring report must be submitted to the Secretary within two months of occupation to verify that operational noise levels do not exceed the noise criteria identified in the *DA Acoustic Assessment* prepared by Acoustic Logic, dated 19 October 2016, except the morning shoulder period which shall be set at 40 dB(A). The mechanical must also not exceed 45 dBL_{Amax} during the night time period and 50 dBL_{Amax} during the morning shoulder period.

Should the noise monitoring program identify any exceedance of the noise criteria referred to above, the Applicant is required to implement appropriate noise attenuation measures so that operational noise levels do not exceed the project specific criteria or provide attenuation measures at the affected noise sensitive receivers.

Storage of Hazardous or Toxic Material

- E8. Any hazardous or toxic materials must be stored in accordance with Workcover Authority requirements and all tanks, drums and containers of toxic and hazardous materials must be stored in a bunded area. The bund walls and floors must be constructed of impervious materials and must be of sufficient size to contain 110 per cent of the volume of the largest tank plus the volume displaced by any additional tanks within the bunded area.
- E9. The storage and handling of medical liquid oxygen, must be in accordance with *AS 1894 The storage and handling of non-flammable cryogenic and refrigerated liquids*.
- E10. The quantities of dangerous goods present at any time on the site or transported from and to the development must be kept below the screening threshold quantities listed in the Department's *Hazardous and Offensive Development Guidelines Applying SEPP 33*,

January 2011 or a Preliminary Hazard Analysis must be undertaken prior to increasing the storage or transported quantities.

Public Way to be Unobstructed

E11. The public way must not be obstructed by any materials, vehicles, refuse, skips or the like under any circumstances.

External Lighting

E12. External Lighting must comply with *AS/NZ1158.3: 1999 Pedestrian Area (Category P) Lighting* and *AS4282: 1997 Control of the Obtrusive Effects of Outdoor Lighting*. Upon installation of lighting, but before it is finally commissioned, the Applicant must submit to the consent authority evidence from a qualified practitioner demonstrating compliance in accordance with this condition.

ADVISORY NOTES

Appeals

AN1 The Applicant has the right to appeal to the Land and Environment Court in the manner set out in the *Environmental Planning and Assessment Act 1979* and the *Environmental Planning and Assessment Regulation 2000 (as amended)*.

Other Approvals and Permits

AN2 The Applicant must apply to the relevant authority for all necessary permits including crane permits, road opening permits, hoarding or scaffolding permits, footpath occupation permits and/or any other approvals under Section 68 (Approvals) of the *Local Government Act, 1993* or Section 138 of the *Roads Act, 1993*.

Responsibility for other consents/agreements

AN3 The Applicant is solely responsible for ensuring that all additional consents and agreements are obtained from other authorities, as relevant.

Use of Mobile Cranes

AN4 The Applicant must obtain all necessary permits required for the use of mobile cranes on or surrounding the site, prior to the commencement of works. In particular, the following matters must be complied with:

- a) For special operations including the delivery of materials, hoisting of plant and equipment and erection and dismantling of on-site tower cranes which warrant the on street use of mobile cranes, permits must be obtained from Council:
 - i) at least 48 hours prior to the works for partial road closures which, in the opinion of Council will create minimal traffic disruptions, and
 - ii) at least four weeks prior to the works for full road closures and partial road closures which, in the opinion of Council, will create significant traffic disruptions.
- b) The use of mobile cranes must comply with the approved hours of construction and must not be delivered to the site prior to 7.30 am without the prior approval of Council.
- c) The use of mobile cranes must have consideration for existing helicopter flight paths.

Temporary Structures

AN5

- a) An approval under State Environmental Planning Policy (Temporary Structures) 2007 must be obtained from Council for the erection of the temporary structures. The application must be supported by a report detailing compliance with the provisions of the NCC.
- b) Structural certification from an appropriately qualified practicing structural engineer must be submitted to the Council with the application under State Environmental Planning Policy (Temporary Structures) 2007 to certify the structural adequacy of the design of the temporary structures.

Disability Discrimination Act

AN6 This application has been assessed in accordance with the *Environmental Planning and Assessment Act 1979*. No guarantee is given that the proposal complies with the *Disability Discrimination Act 1992*. The Applicant/owner is responsible to ensure compliance with this and other anti-discrimination legislation. The *Disability Discrimination Act 1992* covers disabilities not catered for in the minimum standards called up in the NCC which references *AS 1428.1 - Design for Access and Mobility*. AS1428 Parts 2, 3 & 4 provides the most comprehensive technical guidance under the *Disability Discrimination Act 1992* currently available in Australia.

Commonwealth *Environment Protection and Biodiversity Conservation Act 1999*

AN7

- a) The *Commonwealth Environment Protection and Biodiversity Conservation Act 1999* provides that a person must not take an action which has, will have, or is likely to have a significant impact on a matter of national environmental significance (NES) matter; or Commonwealth land, without an approval from the Commonwealth Environment Minister.
- b) This application has been assessed in accordance with the *New South Wales Environmental Planning & Assessment Act 1979*. The determination of this assessment has not involved any assessment of the application of the Commonwealth legislation. It is the Applicant's responsibility to consult the Department of Sustainability, Environment, Water, Population and Communities to determine the need or otherwise for Commonwealth approval and you should not construe this grant of approval as notification to you that the Commonwealth Act does not have application. The Commonwealth Act may have application and you should obtain advice about this matter. There are severe penalties for non-compliance with the Commonwealth legislation.

Asbestos Removal

AN8 All excavation and demolition works involving the removal and disposal of asbestos must only be undertaken by contractors who hold a current WorkCover Asbestos or "Demolition Licence" and a current WorkCover "Class 2 (Restricted) Asbestos Licence and removal must be carried out in accordance with NOHSC: "Code of Practice for the Safe Removal of Asbestos".

Site contamination issues during construction

AN9 Should any new information come to light during demolition or construction works which has the potential to alter previous conclusions about site contamination then the Applicant must be immediately notified and works must cease. Works must not recommence on site until the consultation is made with the Department.
