Hi Penny and Chris,

Thanks for the update today, it's good to see progress on the topics we have been discussing;

- rationalization of the roof plant to a more compact arrangement makes a lot of sense and claws back a bit of the skyline view
- the layered and louvered screen design also looks to offer a sensible approach to addressing the visual impact of the plant
- further reflective glare off the ducting looks like it will be pretty well blocked by the inverted louver arrangement. I'm guessing that the screen itself will be some sort of powder coated aluminum to reduce reflective glare off the screen itself? Can you please clarify.
- Acoustic testing on or around the 6th of July is noted
- Confirming access to our property can be arranged for your third party view assessment – Urbis. Just drop me a note and we can arrange this at an agreeable time.

We look forward to seeing this come to finalization in the coming weeks and months.

Best Regards  
Sabine & Russell

Hi Russell

Penny, myself and a colleague of Penny's, Matthew Richardson, will be meeting with you to run through the design of roof works.

Regards

Chris O'Brien
