RE: 9-21 Beaconsfield Parade, Linfield NSW

To Whom It May Concern,

This letter has been prepared to address the planned modification to the development application at 9-21 Beaconsfield Parade, Linfield NSW. One of the main focuses of the modification is to square up the basement shoring alignment. In terms of waste, the following changes are also proposed:

- Introduction of Food Organics and Garden Organics (FOGO) bins for residents to use
- Re-design of the bin collection room

In addition, the number of bins and waste room sizes remain consistent with the approved development. Elephants Foot Consulting will continue to work with the client to develop the waste strategy for this site and are of the opinion that the changes proposed will improve the overall waste strategy.

If further information or clarification is required, please do not hesitate to contact the undersigned.

Kind Regards,

Sharnee Lee
