

Festival Overlay

Given the proximity to the Parramatta CBD, the western Sydney public transport network, high capacity car parking, the parklands and Parramatta River this precinct provides significant opportunity for festival type events where there are multiple places of interest. Attendees are able to utilise the facilities within the stadium, such as food and beverage outlets, toilets, and the premium facilities.

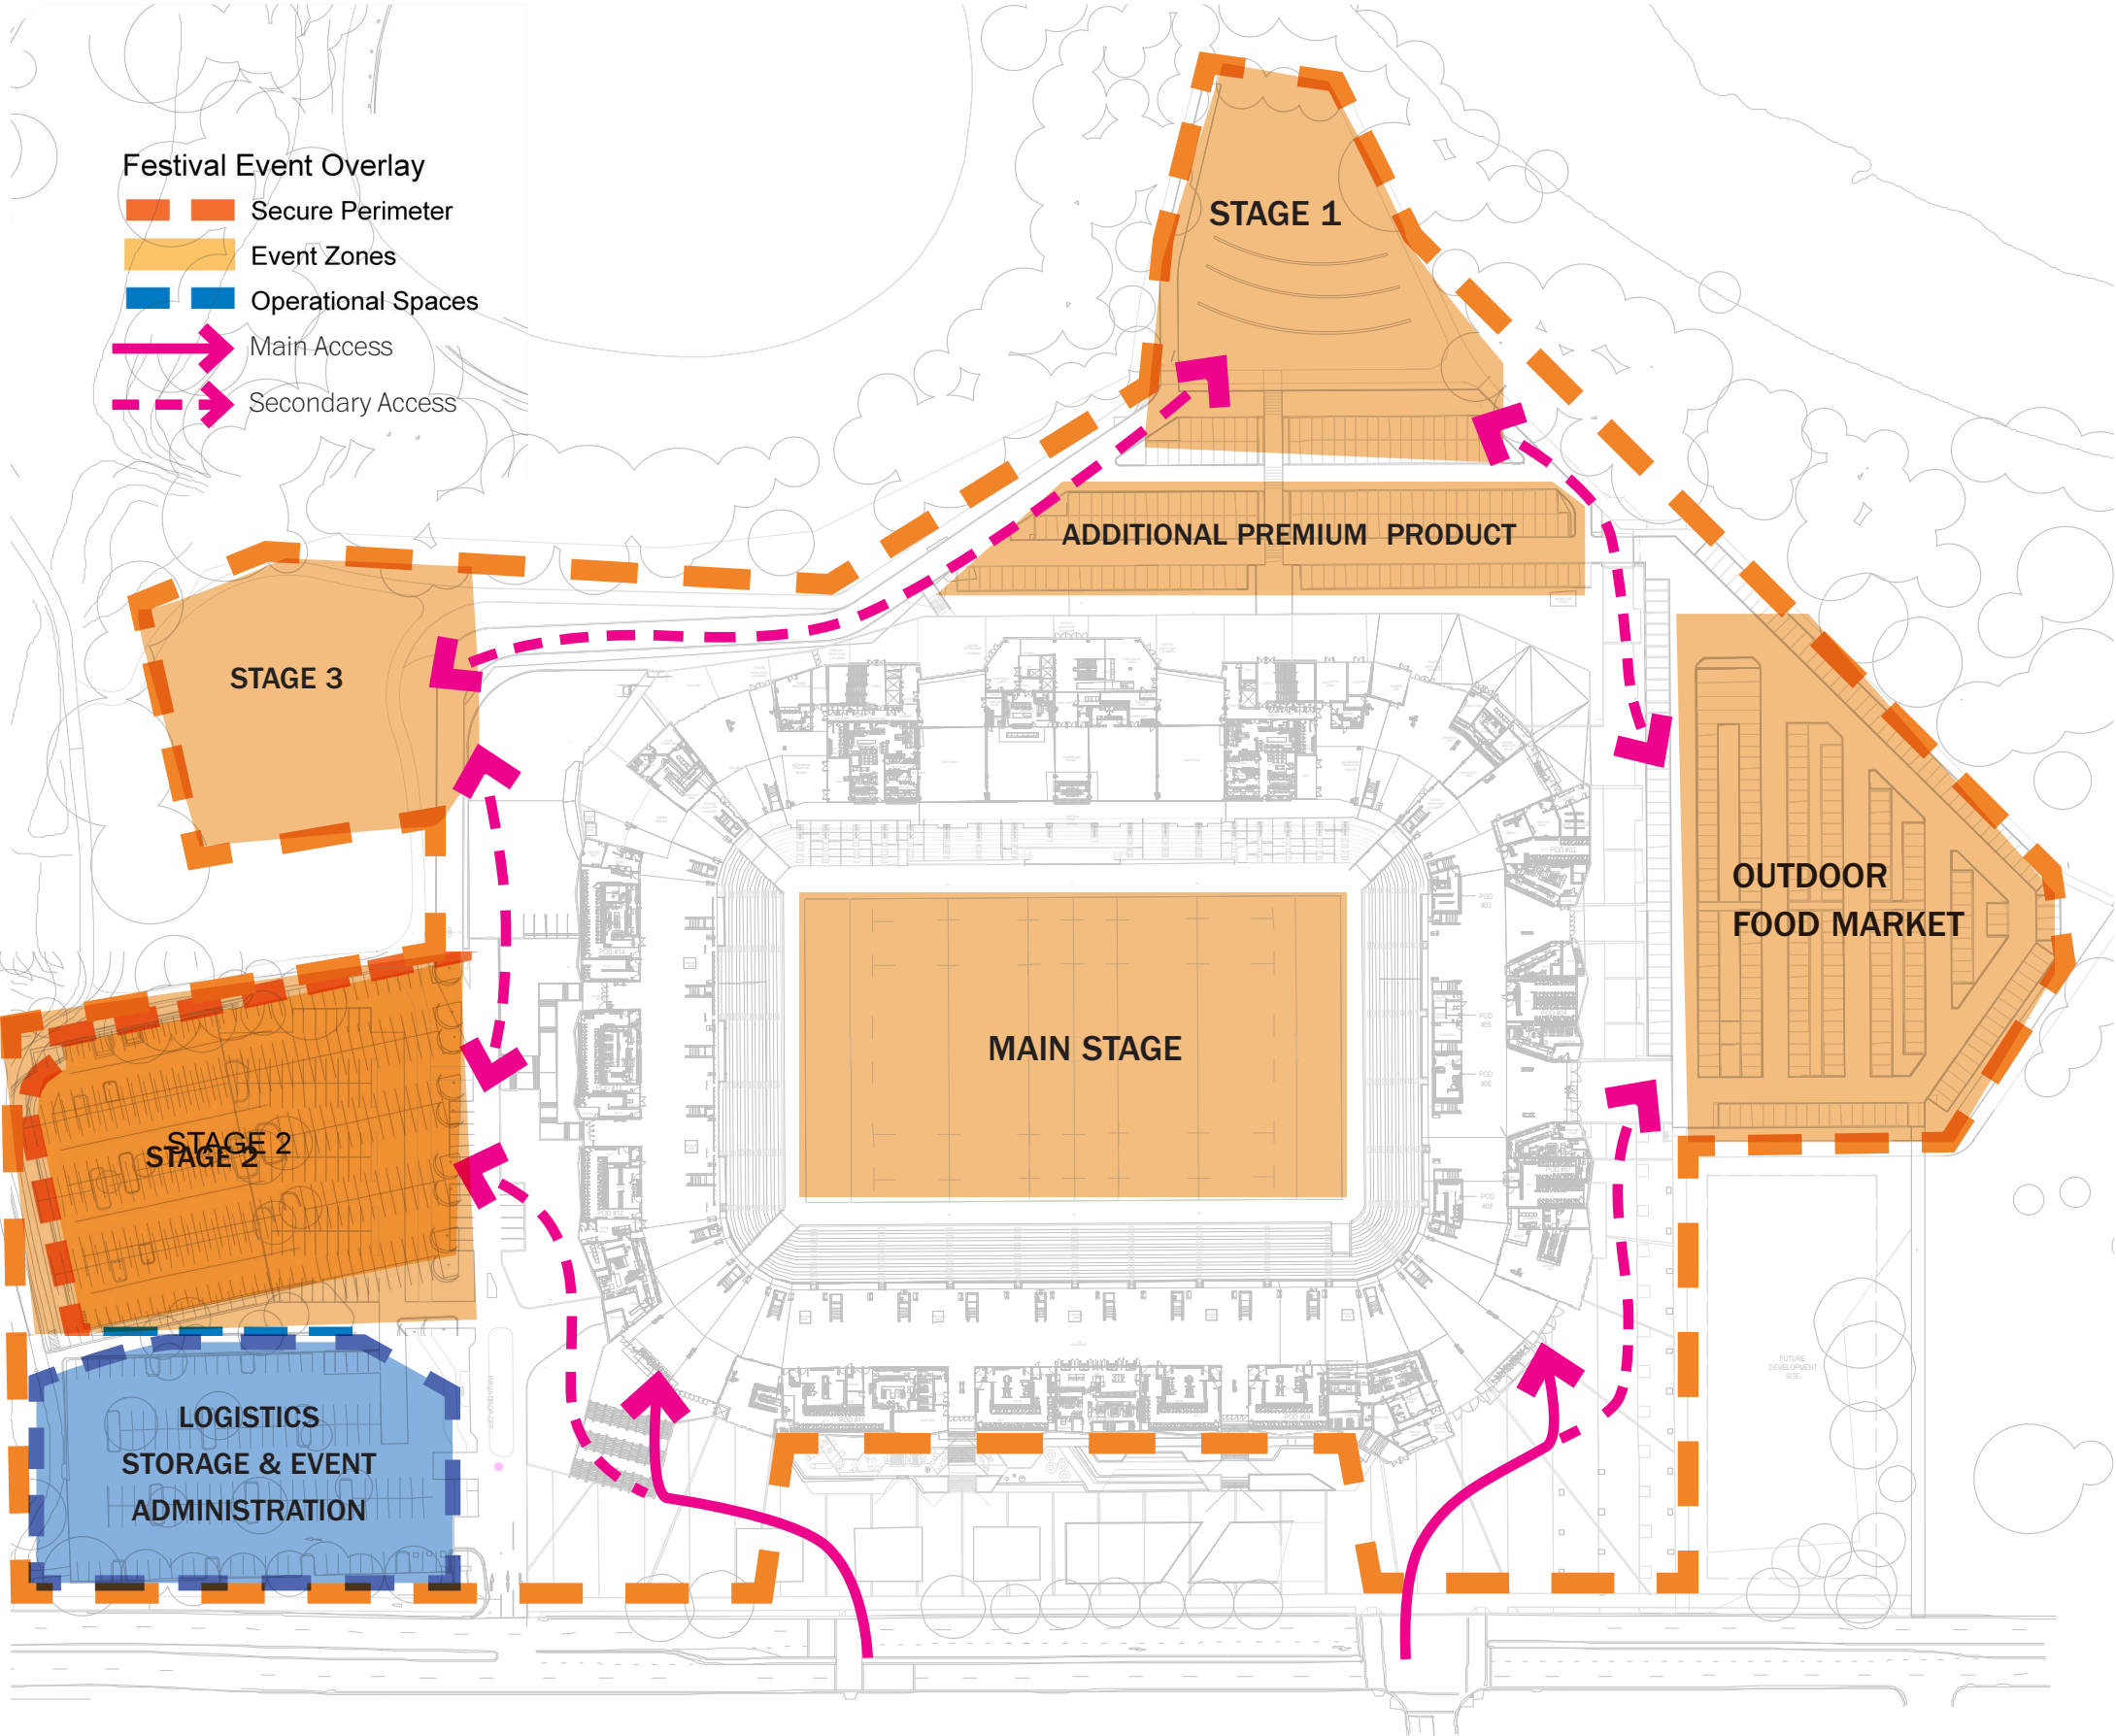

A temporary secure perimeter can be established to provide:

- Greater footprint area for the event;
- Stage/screen areas:
 - To the west looking out to the west over the river and park;
 - Southern car park; and
 - Old training field site;
- Outdoor food market on the northern car park; and
- Potential for additional PP in marquees on the west car park.

Festival Event Access

During a Concert Event the access is per the main access strategy.

- Pedestrian access is via the two main connections on O'Connell street;
- The outer stages are connected via pathways external to the stadium as well as the main concourse
