

Sharyn Clarke, of **Ryde NSW**, made the following submission on the project:
New Smalls Road Public School

Objects to this project

“

Good Morning,

Please provide all relevant data as to how to propose to control and ensure traffic flow within this area ie Smalls Road. As a resident it is extremely difficult at present to exit/enter our street during the hours of 7.30am through to 9.00am each morning and again from approximately 3.00pm through to 6.00pm during the afternoon/evening peak hours. I can only conclude that if and when the school is operational this will only impact the current situation with an increased high risk of potential car accidents and injury to residents/children
