existing site conditions

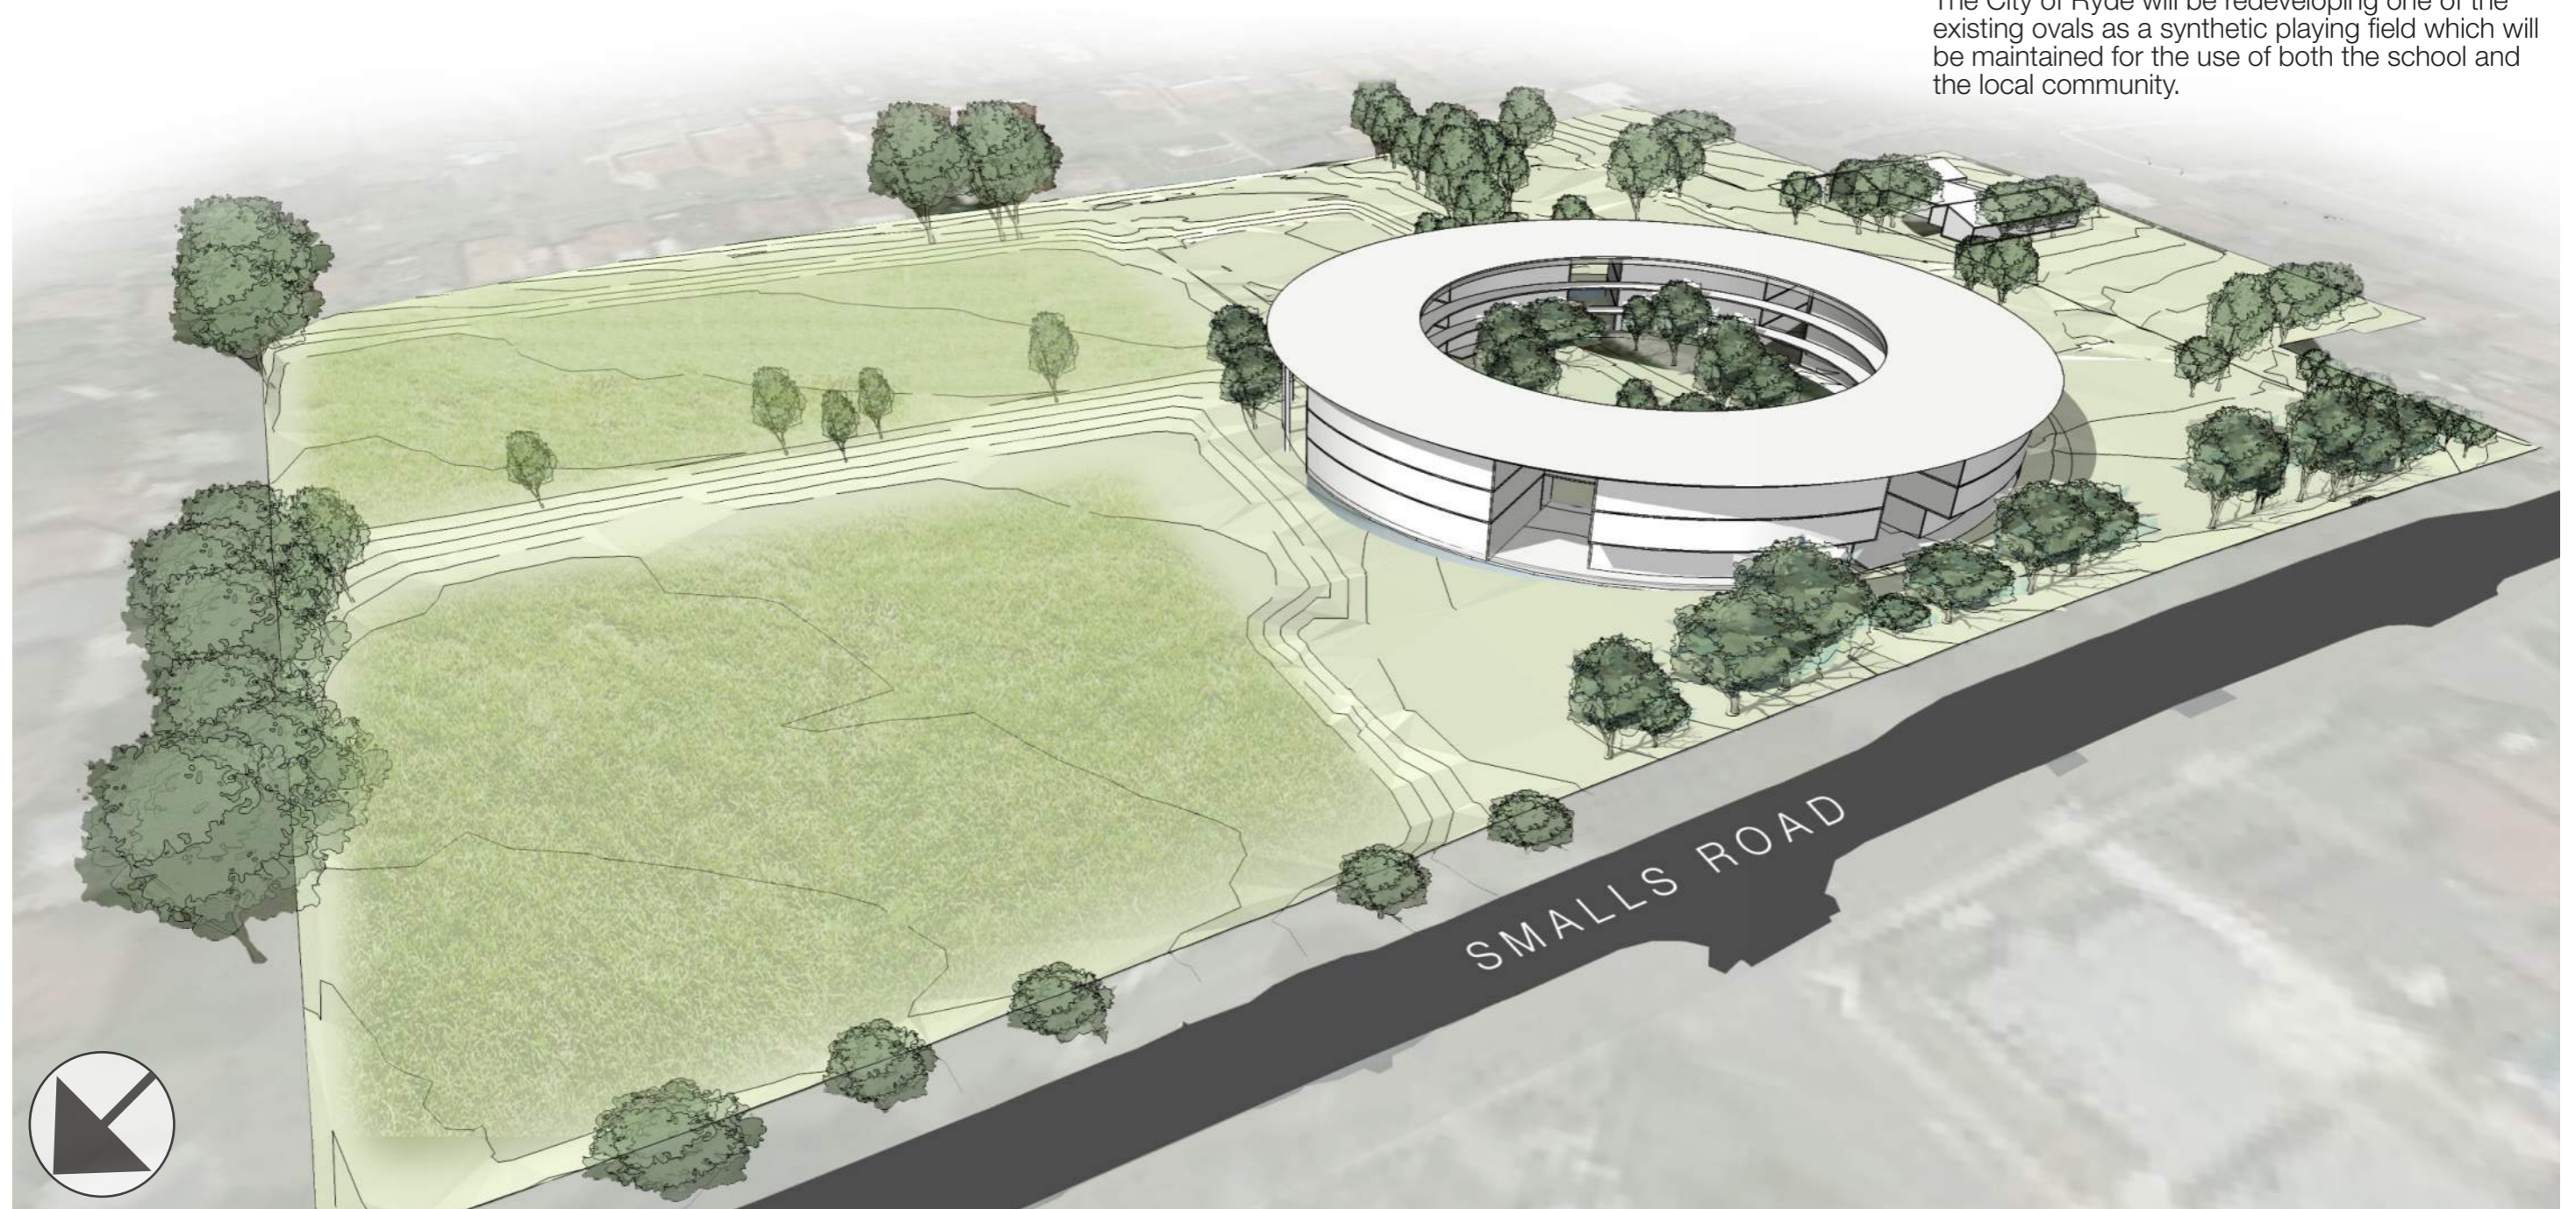

demolition

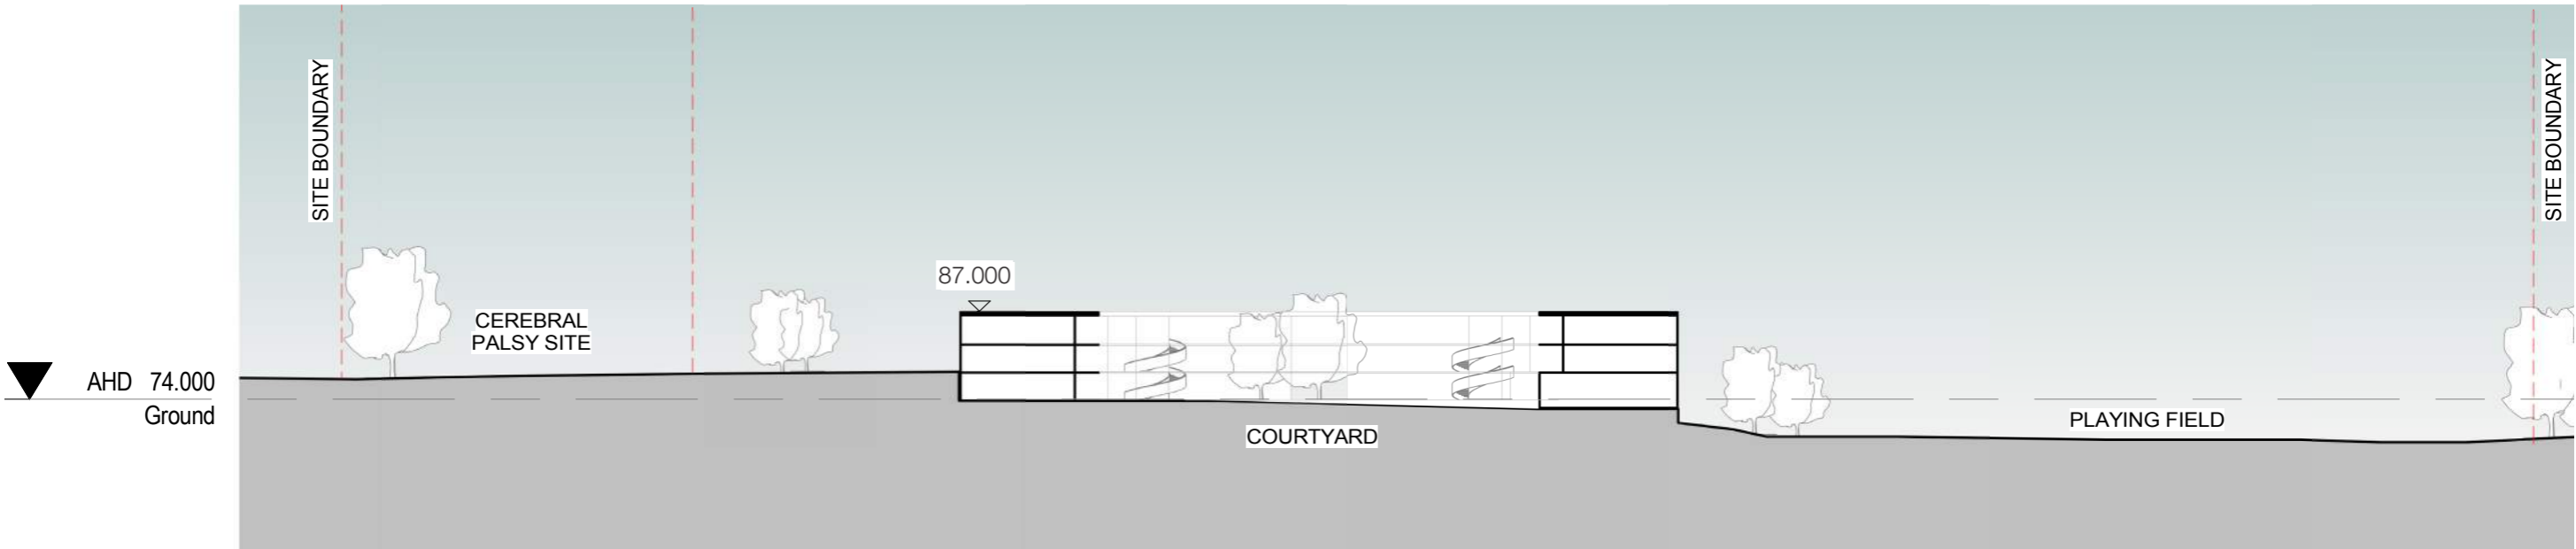

concept massing

The new Public School at Smalls Rd, Ryde will provide accommodation for up to 1000 students on the site of the former Ryde High School. The new facility set within the mature landscape of the existing campus will deliver 21st century learning in a picturesque setting. The new building is planned around a central courtyard that forms the heart of the school.

The planning arrangement takes advantage of the established landscape on the site and provides generous access to natural light, ventilation and open space for the students. Clusters of flexible classrooms will provide diverse learning settings for individuals, small groups and whole class activities. The City of Ryde will be redeveloping one of the existing ovals as a synthetic playing field which will be maintained for the use of both the school and the local community.
