Dear Sir / Madam,

57-69 Tattersall Road, Kings Park (lot 11 DP 792731) – Environmental Assessment Requirements

Barker Ryan Stewart is assisting Auto-recyclers Pty Ltd with the preparation of an Environmental Impact Statement (EIS) for the operation of a metal recovery and recycling facility, located at 57-69 Tattersall Road, Kings Park.

In accordance with the EIS requirements, we have been instructed by the NSW Department of Planning & Environment to consult with Environmental Protection Authority and address any issues raised.

Project Summary

Auto-recyclers Pty Ltd have identified additional demand to recycle car bodies, structural metal and white goods to meet the identified market demand. The expansion will facilitate a far greater efficiency in the utilisation of equipment, enabling the operator to respond to market supply and demand volumes and safeguard the long term economic viability of the business.

The State Significant Development Application will seek to utilise existing improvements within the site and consolidate all existing consents pertaining to current activities on the site. The proposed development includes:

- The operation of a metal recovery and recycling facility comprising with a processing capacity of 130,000 tonnes of scrap metal per year. Hours of operation being 24 hours, 7 days a week. The machinery will operate from 6am to 6pm, with a maintenance crew working from 6pm to 6am.
- The sale of motor vehicle parts, and associated vehicle storage yard, operating from Monday to Sunday, 8am – 5pm.
