Sally

Further to my email last week, I have discussed with the proposal with the Commonwealth Dept of Infrastructure, who I understand will be providing comments in relation to the SEARs. I have reviewed the Airspace Operation matters discussed in the Scoping Report and note that the applicant proposes to prepare and Airspace Operations Assessment. The Scoping Report makes reference to previous studies and whilst they may be relevant, new report(s) should be prepared to assess the new proposal.

The EIS should include a detailed assessment of the proposal's potential impacts on Western Sydney Airport operations as outlined in Section 8.2.1 of the Scoping Report. This should also consider the cumulative impacts of this proposal and facilities operating in the vicinity of this proposal. In addition, the assessment should also address other relevant matters in the National Airports Safeguarding Framework as well as relevant matters in the Western Sydney Aerotropolis Plan and the Discussion Paper on the proposed State Environmental Planning Policy (Western Sydney Aerotropolis).

If have any questions please give me a call.

Regards

Kirk Osborne
