Dear Martin,

**Re: Aboriginal and Historical Heritage Letter of Advice for 200 Aldington Road (Lot E),  
Kemps Creek, New South Wales**

**Our Ref: Matter: 43155**

Biosis Pty Ltd (Biosis) has been commissioned by Stockland Fife Kemps Creek Pty Ltd (SFKC), to provide a Letter of Advice (LoA) for Lot E, 200 Aldington Road, Kemps Creek, New South Wales (NSW) (the study area) (Figure 1). Biosis completed an Aboriginal Cultural Heritage Assessment (ACHA) and Historical Heritage Assessment (HHA) in response to the Planning Secretary's Environmental Assessment Requirements (SEARs) for the proposed development of the site. The ACHA and HHA were completed in 2021 for the Kemps Creek Industrial Estate, which incorporated 106–228 Aldington Road (Lot 200 DP1285691) in Kemps Creek, NSW.

The ACHA and HHA were prepared to inform a State Significant Development (SSD) application (SSD-10479), as per the Secretary's Environmental Assessment Requirements (SEARs). The proposed works in the SSD application included a Concept Master Plan with infrastructure layout, and Stage 1 details of site preparation including demolition, bulk earthworks and the construction and operation of one warehouse (Lot F). The SSD application was approved by the Department of Planning and Environment (DPE) and works have commenced on site.

There are several components to the proposed development, both classified as SSD:

- The construction and operation of warehouses on Lot E, at Kemps Creek Industrial Estate, 200 Aldington Road, Kemps Creek.
- Car parking spaces and loading/unloading spaces.
- Consent for installation of signage.
- Landscaping embellishments.

An Environmental Impact Statement (EIS) has been prepared as required by SEARs issued for SSD-85510213 on 12 June 2025. This LoA will support the SSD application (SSD-85510213) and satisfy the SEARs by outlining the previous Aboriginal and historical heritage assessments completed for the study area which are appropriate to rely upon for the subject development;

*Aboriginal Cultural Heritage – an Aboriginal Cultural Heritage assessment or justification for reliance upon any previous  
Aboriginal Cultural Heritage Assessment undertaken for SSD-10479 (page 5 of 10, SSD-85510213 SEARs).*

The applicant, SFKC, is a joint venture between Stockland and Fife Capital.

**Sydney**

This LoA has been prepared for the SSD application, SSD-85510213. This LoA was prepared by Bronte Baonza (Heritage Consultant) and reviewed by Mathew Smith (Senior Heritage Consultant).

### Lot E development

The proposed Lot E development includes a single industrial building featuring two warehouses with hardstand areas located towards the eastern portion of the lot. One of the warehouses will be used for cold storage purposes and includes cold rooms for storage and hibernation. Building 2 will be constructed as a cold shell and will be fit out separately. Shared entry/exit points for trucks and light vehicles will be provided from Road 03 and Road 04. Each warehouse will have their own ancillary office space, and Building 1 will contain an additional dock office. The ancillary office spaces are located adjoining the respective car park and the dock office is located at the northern portion of Warehouse Building 1 adjoining the hardstand area. Landscaping will be provided around the periphery of the lot.

The development is classified as SSD due to the estimated development cost which is greater than \$50 million, as prescribed under Section 12 of Schedule 1 to the *State Environmental Planning Policy (Planning Systems) 2021*.

### Aboriginal Cultural Heritage Assessment

The SEARs were issued for the proposed development in response to SSD-10479 in July 2020. The SEARs requested that an ACHA be undertaken to identify Aboriginal heritage values within the study area and to determine whether the proposed development has the potential to impact upon these sites. The ACHA and associated Archaeological Report (AR), documented the findings of the desktop assessment, Aboriginal community consultation, archaeological survey, test excavations and impact assessment conducted as part of the project. As required under Section 2.3 of the *Code of Practice for Archaeological Investigation of Aboriginal Objects in NSW* (DECCW 2010a) (the Code), the AR provides evidence about the material traces of Aboriginal land use to support the conclusions and management recommendations in the ACHA.

The Aboriginal community was consulted regarding the heritage management of the project throughout its lifespan. Consultation was undertaken as per the process outlined in the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (DECCW 2010b) (consultation requirements). The consultation undertaken for the project is included in the ACHA (Biosis 2021).

An extensive search of the Aboriginal Heritage Information Management System (AHIMS) was conducted on 27 May 2020 (Client Service ID: 508437), to identify any known Aboriginal heritage values within or in proximity to the study area. A second search was conducted on 22 November 2023 (Client Service ID: 842249), and a third undertaken on 23 July 2025 (Client Service ID: 1026307) to ensure no additional sites have been registered within the study area. The updated search of the AHIMS database conducted in July 2025 identified 117 Aboriginal archaeological sites within a 2-kilometre search area, centred on the study area. None of these registered sites are located within the study area.

The field investigation undertaken for the ACHA identified the Lot E study area as low potential. Test excavations which occurred within AHIMS 45-5-5467/ARKC Area 1, AHIMS 45-5-5469/ARKC Area 2 and AHIMS 45-5-5468/ARKC Area 3 are not within the current Biosis study area.

The proposed works were permitted to proceed with caution in these areas in line with an approved Cultural Heritage Management Plan (CHMP) to be developed in consultation with the Registered Aboriginal Parties (RAPs). A CHMP was prepared by EMM Consulting (2023), the purpose of which was to provide management and mitigation measures for the cultural heritage values identified within the study area.

## Historic Heritage Assessment

The SEARs issued for the proposed development in response to SSD-10479 in July 2020 requested that an assessment of historical heritage values be undertaken for the study area. The HHA presented the findings of the desktop assessment and field investigation conducted as part of the assessment and provided an assessment of impacts to historical heritage values identified by the assessment and mitigation measures.

A search of heritage databases was conducted in 2021 to identify any heritage listings within the study area. This included a search of the State Heritage Register, Commonwealth Heritage List, National Heritage List, Section 170 heritage registers and the *Penrith Local Environmental Plan 2010*. These searches did not reveal any heritage listed items within the study area. An updated search of the above registers, lists and legislation was conducted to ensure no additional sites had been registered within or in proximity to the study area. The results of this search did not identify any new sites in relation to the current study area.

As part of the HHA, background research and a physical inspection of the site was undertaken. The results of the background research and physical inspection determined that the study area appeared to have been used throughout its history primarily for grazing and agricultural practices. This was evident in the historic maps and aerials and sheep livestock, orcharding and market gardening observed during the physical inspection. Several structures and elements of the built environment were present within the study area. The background research and field survey identified that these structures were constructed post-1970s and were a common element still present throughout the Western Sydney region. The potential archaeological remains identified within the study area would be associated with agriculture. Archaeological evidence within the study area associated with agriculture may have included agricultural marks, such as plough lines and post holes. The physical inspection determined that the high level of disturbance evident within the study area indicated the deposit integrity of the potential remains was low.

The data collected in the assessment suggested that there is unlikely to be significance regarding the research potential, aesthetic, technical or social aspects of any potential archaeological remains within the study area. The potential archaeological remains are considered common resources that are typical in form and nature to similar resources throughout the local region and NSW during this time. It was determined that the items within the study area, and the study area itself, were unlikely to be able to provide information not already available in the existing literature. As such, any potential archaeological remains were deemed unlikely to possess any historical heritage significance. It was recommended that the works within the study area proceed with caution, with an unexpected finds protocol in place.

## Summary of potential harm

The activities under SSD-10479 included demolition and clearing of all existing built form structures, clearing of any vegetation, and bulk earthworks including 'cut and fill' to create flat development platforms for the warehouse buildings, and site stabilisation works. An Aboriginal Site Impact Recording Form was submitted for AHIMS 45-5-5467/ARKE Area 1, and the site card was updated to indicate that its status as destroyed.

The proposed works within Lot E under SSD-80264236 include the construction of two warehouses with hardstand areas located towards the eastern portion of the lot. These works will not adversely impact any valid Aboriginal and historical archaeological values within the current Biosis study area (Figure 1).

## Heritage Advice

The results of the ACHA and HHA assessments previously conducted within 106–228 Aldington Road (Lot 200 DP1285691) in Kemps Creek, NSW have been summarised above. The results and recommendations of the

assessments have been considered regarding the current Biosis study area, which incorporates Lot E, 200 Aldington Road, Kemps Creek, NSW.

The proposed works within Lot E are located in areas of low Aboriginal and historical archaeological potential. The proposed works are permitted to proceed with caution in these areas in line with the CHMP prepared by EMM Consulting (2023), namely the unexpected finds protocols.

The proposed works within Lot E will not impact any Aboriginal and historical archaeological values and are able to proceed within the bounds of the current Biosis study area, with the below recommendations in place.

### Provide copy of LoA to RAPs

It is recommended as best practice and for consistency with the Biosis (2021) ACHA that a copy of this letter of be provided to the RAPs for the ACHA conducted by Biosis. This LoA will keep RAPs updated on the works continuing within the study area and will continue to inform these groups about the management of Aboriginal cultural heritage sites in the vicinity of the study area throughout the life of the project.

### Adhere to the CHMP

All Aboriginal objects and Places are protected under the *National Parks and Wildlife Act 1974* (NPW Act). While the SSD pathway negates the need to obtain Aboriginal Heritage Impact Permits (AHIP), Aboriginal cultural heritage is managed in the Conditions of Approval (CoA) provided in an SSD approval.

Where Aboriginal cultural heritage is concerned within the study area, the mitigation and management strategies outlined in the CHMP produced by EMM Consulting (2023) should be adhered to. This CHMP was formed in line with the CoA provided in the SSD (SSD-10479) approval. Failure to comply with the CHMP and the CoA could result in a breach of the NPW Act.

**Table 1 Lot 200 CHMP management and mitigation measures EMM (2023)**

CHMP section	Recommendation	Summary
4.2.2	<i>Future site project</i>	<i>An update to the planning certificate of the property should be undertaken following construction to highlight to future users/owners the presence of an Aboriginal site within the project area</i>
4.3.1	<i>Cultural heritage inductions</i>	<i>All employees, contractors, sub-contractors and visitors involved in ground and non-ground disturbing activities will undergo an Aboriginal cultural heritage induction.</i>
4.3.2	<i>Unexpected finds protocols</i>	<i>All works within the location of the unexpected find must stop until properly assessed by a suitable qualified heritage Consultant and suitable management measures developed in consultation with Aboriginal representatives and Heritage NSW.</i>
4.3.3	<i>Changing heritage professional</i>	<i>Where the heritage consultant changes through the project, suitable hand over will be undertaken to minimise loss or mistranslation of the intent of the information, findings and future steps in relation to Aboriginal heritage.</i>
4.5	<i>Any proposed activity outside approved project area</i>	<p><i>Any activity that may cause ground disturbance outside of the approved project area, or outside other existing approved areas under the development consent, will not occur without prior Aboriginal heritage assessment and other relevant legislative and internal approvals sought as required.</i></p> <p><i>Depending on the scope, nature and approval pathway of the proposed ground disturbance, the following may apply:</i></p> <ul style="list-style-type: none"> <li><i>If the proposed activity requires additional environmental assessment, such as a modification to the existing development consent, an Aboriginal heritage assessment will be completed in accordance with relevant assessment requirements as specified by Heritage NSW/DPE</i></li> </ul>

CHMP section	Recommendation	Summary
		<ul style="list-style-type: none"> <li>• <i>If the proposed activity is permissible under the existing SSDA (ie an Aboriginal heritage impact permit (AHIP) not required), an Aboriginal heritage assessment must initially be completed to a level consistent with the Due Diligence Code of Practice for the Protection of Aboriginal Objects in New South Wales (DECCW 2010b) guidelines. Any potential impacts to known or newly identified Aboriginal objects will be managed in accordance with the unexpected finds procedures set out in Section 4.4</i></li> <li>• <i>If the proposed activity requires a separate approval pathway not permissible as part of the existing SSDA, then an Aboriginal heritage assessment must initially be completed to a level consistent with the Due Diligence Code of Practice for the Protection of Aboriginal Objects in New South Wales (DECCW 2010b) guidelines. Depending on the outcomes of the due diligence assessment, further investigation may be required in accordance with the Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in New South Wales (DECCW 2010c) and/or other relevant guidelines. If Aboriginal objects are likely to be impacted, further approvals under the National Parks and Wildlife Act 1974 and/or Environmental Planning and Assessment Act 1979 as required may be required prior to work being permissible.</i></li> </ul>

### Discovery of Aboriginal ancestral remains

Aboriginal ancestral remains may be found in a variety of landscapes in NSW, including middens and sandy or soft sedimentary soils. If any suspected human remains are discovered during any activity, you must:

1. Immediately cease all work at that location and not further move or disturb the remains.
2. Notify the NSW Police and Heritage NSW's Environmental Line on 131 555 as soon as practicable and provide details of the remains and their location.
3. Not recommence work at that location unless authorised in writing by NSW Police and/or Heritage NSW.

### Discovery of unanticipated historical relics

Relics are historical archaeological resources of local or State significance and are protected in NSW under the *Heritage Act 1977* (Heritage Act). Relics cannot be disturbed except with a permit or exception/exemption notification. Should unanticipated historical archaeology be discovered during the course of the project, work in the vicinity must cease and an archaeologist contacted to make a preliminary assessment of the find. The Heritage Council will require notification if the find is assessed as a relic.

Please contact me on 0456 625 253 if you have any enquiries.

Yours sincerely,

Crystal Garabedian  
Senior Heritage Consultant

### \*\* Site Status

**Valid** - The site has been recorded and accepted onto the system as valid

**Destroyed** - The site has been completely impacted or harmed usually as consequence of permit activity but sometimes also after natural events. There is nothing left of the site on the ground but proponents should proceed with caution.

**Partially Destroyed** - The site has been only partially impacted or harmed usually as consequence of permit activity but sometimes also after natural events. There might be parts or sections of the original site still present on the ground

**Not a site** - The site has been originally entered and accepted onto AHIMS as a valid site but after further investigations it was decided it is NOT an aboriginal site. Impact of this type of site does not require permit but Heritage NSW should be notified

Report generated by AHIMS Web Service on 23/07/2025 for Samantha Keats for the following area at Datum :GDA, Zone : 56, Eastings : 294327.0 - 298665.0, Northings : 6250765.0 - 6255183.0  
with a Buffer of 0 meters.. Number of Aboriginal sites and Aboriginal objects found is 117
