EDGES

CONCRETE EDGE  
150mm x 150mm

The hardscape palette is predominately designed to pick up on hues from the surrounding landscape. The design aims to create a strong universal character with the integration of the concrete to bring the outside in and inside out. The colours in the landscape should be able to bring out the green vegetation character. Differing colour in the concrete will help soften the large expanse of concrete and pavers required for large areas such as the assembly court, outdoor learning and areas under the building.

The selection & images are for the purpose of indicating the Landscape Design Intent only. Final selections will be equal to or similar to those nominated.
