Carica papaya
PAWPAW
1.5m max.H x 1.2m spread

Castanea sativa
CHESTNUT
3.5m max.H x 1.2m spread

The softscape palette is predominately designed to pick up on hues from the surrounding landscape.

The feature trees and understorey will contribute to the universal character which is mainly agricultural.

The integration of robust green plants will be both iconic and will provide a strong planting palette to help soften the expanse of concrete and provide a relaxing atmosphere.

Several planting will be used to serve as a buffer for strong winds.

The selection & images are for the purpose of indicating the Landscape Design Intent only. Final selections will be equal to or similar to those nominated.

TREES

Casuarina glauca
SWAMP OAK
3.5m max.H x 1.5m spread
