

OFFICIAL

Thank you for the opportunity to comment on the proposed SEARs for the Bondo Wind Farm.

The Department of Defence understands that the proposed Bondo Wind Farm will consist of the construction and operation of up to 149 wind turbine generators (WTGs) with a maximum height of up to 300 metres above ground level. The subject site is located approximately 50 kilometres west of Canberra.

No reference that Defence would be formally consulted could be identified in the scoping report. **Defence would like to be consulted** for assessment on the proposed Bondo Wind Farm and would also like to be consulted when an Aviation Impact Assessment is created.
