**Importance:** High

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Scott, Paul,

We have confirmed availability of tree stock with a number of nurseries including Tree Impact and Andreasen's (and others). See below – the species in red text are the ones that we can't get in 400L. Please include this in your submission as evidence to support the modification.

Thanks,

**Luke Hoy**

**Importance:** High

**CAUTION - This email was sent from outside Laing O'Rourke**

Good afternoon Luke,

As requested we went out to several suppliers regarding the procurement of the 400 litre tree sizes as requested on the planting schedule. As expected not all of the 400 litre sizes are available at this time of year due to the growing season being largely over.

However that said, we have surprisingly been able to procure the following or alternative substitutions as follows:

SPECIES	SIZE	QTY	RE
Archontophoenix cunninghamiana	400L	8	Supply 200L largest in the market 2.5m tall
Backhousia citriodora	400L	11	Supply 200L ready now

Cupaniopsis anacardioides	400L	7	Ready now
Elaeocarpus reticulatus	400L	5	Ready now
Jacaranda mimosifolia	400L	9	Supply 200L ready now
Syzygium leuhmannii	400L	2	Ready now

**Please note All stock quoted is subject to availability at time of order placement.**

We have gone to our primary supplier who has gone as far as QLD to source / procure the stock required, additionally Trees Impact had only 2 x species in 200 litre available.

Please review the plant schedule and provide feedback, this plant material is not secured and we need to really move quickly in order to have some certainty regarding securing this material.

If you require any additional information please contact me directly to discuss further.

Regards

**Mark Kennedy**
