Dear Ms Matthews

Concrush Resource Recovery Facility Expansion (SSD 8753) Response to Submissions

I refer to your email of 1 May 2019 to the Department of Industry (DoI) about the above matter.

The following advice for you to consider is from relevant branches of Lands & Water and Department of Primary Industries.

DoI – Water and Natural Resources Access Regulator

- A test hole should be constructed at both the leachate pond and artificial wetland to determine water table depth. The results should be compared against the intended excavation depths of the leachate pond and artificial wetland. If excavation depths are to be within 0.5m of the measured water table, an Acid Sulfate Soil Management Plan should be developed prior to excavation works.

Please send any further referrals to Department of Industry by email to landuse.enquiries@dpi.nsw.gov.au.

Yours sincerely

Liz Rogers
