

16 February 2022

Chief Executive Officer
Lake Macquarie City Council
Box 1906
Hunter Region Mail Centre NSW 2310

Attention: Greg P Jones
Senior Development Engineer

Dear Greg

Subject: SSD 8753 – S138 Roadworks at 21 Racecourse Road Teralba

I refer to your email of 1 December 2021 and our response of 20 December 2021 regarding approval of engineering design plans at 21 Racecourse Road, Teralba for SSD 8753 and submit the following:

- Final plan set Document No.16015-LD-DR-C-10000 to 10700 (inclusive of endorsement of our client's geotechnical engineer RCA Australia).
- Design Certification Report and Design Checklists.

We note the following:

- Our client has prepared a Construction Environmental Management Plan for the project. The CEMP includes an Acid Sulphate Soils Management Plan.
- We have included installation of a safety barrier along the eastern side of Racecourse Road to shield road users from roadside hazards. This provision is based on advice from Council that no reduction in the speed zone is proposed on Racecourse Road and Transport for NSW requirement to use the clear zone principle for assessment of the need to install safety barriers. We understand that this is consistent with Council's approach for the upgrading of Racecourse Road.

Electronic copies of the final plan set will be submitted to Council following receipt of notification of approval of the plans

Please telephone me on 0409 657567 or email Craig.Garner@hatch.com if you have any questions regarding the final plans.

Yours faithfully,

C Garner
