Concept Design Strategy

05.6

Learning Spaces

1. Purposeful
- purposefully designed spaces that meet specific learning needs such as:

size: large/medium/small group, independent learning

types of activities: practical activities, presentation, performance, group collaboration, independent studies, project based learning, team teaching and direct instruction.
 - purposeful spaces that support easy and ready movement between different learning activities and settings, so that valuable learning time is spent learning, not constantly setting up spaces.
2. Adaptable
- easily adapted to create various settings
 - to support different learning behaviour
 - adaptable spaces that are not only direct instruction or future focused, but also future proofed for any change in pedagogical needs
3. Seamless and easy to use
- smart design that is easy to use by all, including educators and learners
 - simple, uncomplicated systems that allow fast conversion of space, & design which facilitates team teaching, collaborative learning, project based learning and other pedagogical needs

To ensure optimal design of learning settings that is suitable for the school’s needs, there will be continued research and development of furniture setting options in the next phase — during Schematic Design in the PMO flow chart. The furniture setting options will be developed through a collaborative process with the school.

Type 01 - South Block : Kindergarten- Primary School

- Shared Common
- Large Learning Space
- Outdoor Learning
- Presentation / Readiness to learn space
- Practical Activities Area
- Toilets / Shower / Change/ laundry/cleaners
- Quiet Space , small group room, nook
- Staff, therapies, large group Pod
- Store rooms
- building services
- Sliding walls
