**For Attention of Diana Mitchell**

Dear Sirs,

**Gregadoo Solar Farm Pty Ltd**

As discussed with you, Gregadoo Solar Farm Pty Ltd considers a potential benefit to the project in being provided some flexibility in the final height of the panels. The project currently envisages a maximum panel height of 2.2m above ground level. However, potential technological changes and the ability for operational flexibility may result in panels being up to 2.8m above ground height.

We ask the Department to consider providing for this flexibility in its Approval of the project.

Yours sincerely,

Symon Grasby

Gregadoo Solar Farm
