Subject: Request to stage management plans for Liddell Battery and Bayswater Ancillary Works
(SSD-8889679)

Dear Ms Brady,

I refer to your letter dated 12 October 2022, requesting approval for the staging of management plans for the project under Condition A7 of Schedule of the development consent.

I note that on the 23 September 2022 the Department approved a request to stage the preparation of management plans in two stages (Stage 1 comprising decoupling works and Stage 2 comprising other elements of the project). The Department has approved the relevant management plans required for Stage 1.

I note that it is requested to now stage the preparation of management plans in three stages, due to the battery energy storage system component being required earlier than anticipated.

I note that the letter:

- outlines three stages for the implementation of management plans including:
 - Stage 1 comprising decoupling works (management plans approved);
 - Stage 2 comprising the battery energy storage system and associated works; and
 - Stage 3 comprising Bayswater Ancillary Works and consolidated consents; and
- describes the approach to staging relevant management plans, strategies and studies for Stage 2 and Stage 3.

As nominee of the Planning Secretary I approve the staging of management plans as described in the letter.

I note that apart from the staging of management plans, strategies and studies permitted by this approval, all other relevant conditions of consent under SSD-8889679 apply to all stages of the project.

If you wish to discuss the matter further, please contact Jack Turner on 9995 5387.

Yours sincerely
