**Subject:** RE: New Request for Advice on SEARs - Burrendong Wind Farm (SSD-8950984)

OFFICIAL

Hi Natasha,

Similar to our previous responses for this wind farm proposal, our advice for all wind farm applications is that we require an Aviation Impact Statement (AIS) report be submitted along with the application. Please see [Developments at and around airports - Airservices \(airservicesaustralia.com\)](#) for guidelines on Wind Farm development applications and information we require for an Airservices aviation assessment.

Please have the proponent follow the guidelines and submit the information to the Airport Developments mailbox [airport.developments@airservicesaustralia.com](mailto:airport.developments@airservicesaustralia.com), together with any supporting documents, spreadsheet, drawings and CAD files which will assist us with the assessment.

Please note that we cannot commence the assessment process until we have received the AIS and normally our process takes approximately 6 weeks to complete.

A copy of Airservices response will be forwarded to CASA.

Kind regards,

**Richard Tomlinson**  
**Airport Development & Engagement Advisor**
