**Loreto Normanhurst School Redevelopment (SSD-8996)
Revised Electrical Substation Plans, Conditions A37 and B4**

Dear Ms Tuck

I refer to your revised Electrical substation plans for Loreto Normanhurst School Redevelopment submitted to the Planning Secretary under condition A37 of SSD-8996. I also acknowledge and thank you for your response to the request for additional information.

The Electrical substation plans for the school were previously developed as per condition B4 of the consent.

I note the revised Kiosk Electrical substation plans have removed 'Preliminary Not Certified' as advised by the Department in its approval letter for condition B4, dated 22 December 2022 under PA-35. I also note that there are no material changes to the revised Kiosk Electrical substation plans except for the above edit and minor changes to address Ausgrid comments, as confirmed by the Applicant via email on 30 May 2024.

Accordingly, the Department has filed the revised installation of Kiosk Electrical substation plans, Sheets 1 to 6, prepared by Shelmerdines Consulting Engineers, for our information under condition A37 of SSD-8996.

Please note that if there are any inconsistencies between the submitted revised plans and the conditions of consent, the conditions will prevail.

Also, please make the revised Electrical substation plans available for public access on the project website as per condition A29.

If you have any questions, please contact Jeremy Martin at jeremy.martin@dpie.nsw.gov.au.

Yours sincerely

Shiraz Ahmed
