1. Introduction

This Plan of Management (PoM) has been prepared for the proposed Mixed-Use Development located at 35 Honeysuckle Drive, Newcastle NSW 2300. The POM relates to the commercial component of the development only. Doma Holdings (Honeysuckle) Pty Ltd recognise the need to ensure the safety and security of guests, staff, workers, residents and the greater community in which the proposed development will exist. Safety and security issues of the proposal have been considered carefully to ensure the utmost safety of staff and guests.

2. Purpose of Plan of Management

The PoM is consistent with the principles of Crime Prevention through Environmental Design (CPTED) as described in the *Crime Prevention and the Assessment of Development Applications* guideline prepared by the former NSW Department of Urban Affairs and Planning (now Department of Planning and Environment).

The policies and procedures outlined in this PoM will help to make the premises a safe, efficient and pleasant environment in which to work and visit. Additionally, the safety and security issues addressed in this PoM have been devised to ensure the amenity of neighbouring properties is maintained at all times during the operation of the premises.

All staff on site, as part of the induction process, will be required to be familiar with this Management Plan.

3. The Site

The site is described as 35 Honeysuckle Drive Newcastle, situated within the Local Government Area of Newcastle. The site is legally described as Lot 1 on DP1236735.

4. Operation

The POM is a dynamic document which can be updated to respond to changing procedures and practices.

All staff and management will be provided with a copy of the POM and be briefed on the requirements as part of the employment induction process. A copy of the POM will be help on site at all times.

5. Operational Hours

The retail component of the development will operate 24 hours a day, 7 days a week.

6. Staff Training

All staff will be trained in relevant security measures. Staff training days will be held on a regular basis to reinforce safety and security procedures for each of the businesses. Training will ensure that in the event of a robbery, theft or anti-social behaviour, staff acts in a manner to best protect themselves. Employees will be encouraged to report any suspicious activity or persons in and around the area to the Management and / or Local Police.

7. Incident Report

An incident register will be held on site. This will monitor any complaints and will be made available to police when requested. All incidents including vandalism and graffiti will be recorded, together with the response time taken to repair or remove the property affected or offending material. The frequency of incidents together with the respective response will be included in the regular site performance reviews to ensure the maintenance of acceptable standards.

Staff must not resist a robbery and are required call the police after the person(s) has left the building, at which time doors are locked. Retail operations must stop until emergency services arrive.

After a security incident, staff will complete the appropriate incident form with copies of the CCTV footage of the security incident.

Management will supervise all of the above practices and make sure all measures are adhered to.

8. Delivery and Service Vehicles

The loading and unloading of service and delivery vehicles will occur within the designated loading bay within the car parking area.

The majority of goods delivered, as well as waste collection will occur during off-peak periods, where possible. This will limit any disturbance to guests on the premises or the amenity of the surrounding area.

Access for deliveries and waste collection will not cause any interruption to the flow of external traffic. It will be desirable for all loading and unloading to be undertaken wholly within the premises with no deliveries, loading or unloading occurring on the street.

9. Noise Management

Staff will be encouraged to minimise noise whilst on site and always report any negative behaviour. Reports of all noise complaints will be documented in a register and kept on site. Staff will be encouraged to ensure that customers behave in an appropriate manner whilst on the site and do not disturb the neighbourhood when exiting the premises late at night.

10. State Health & Safety Regulatory Authority

Any Notice / document / request that are raised by a State Health & Safety Regulatory Authority Inspector must be immediately communicated to the OHS Manager who will then ensure that all other appropriate personnel are informed. The OHS Manager will then develop an Action Plan / Actions with responsibilities to address the issue raised.

11. First Aid Staff Training

At all times a staff member proficient and appropriately certified in first aid qualification will be on duty to respond to a medical incident on the premises. Appropriate equipment such as Automated External Defibrillator devices and first aid kits will be available with staff trained in their use.

12. Cleaning

Staff will ensure as far as practical that the premises is kept in a clean and tidy condition both internally and externally to the extent of the building that is managed. Cleaning of both internal and external areas of the buildings will be undertaken by cleaning staff. It should be noted that this is generally limited to the ground floor level and that the management and clearing of the upper floors will be managed by the residential apartment component of the building.

13. Dealing with Graffiti

The premises will comply with common policy in relation to all Graffiti. Any damage to property by way of Graffiti will be removed from the site within 24 hours of being noticed.

14. Antisocial Behavior

The premises will adopt a zero-tolerance approach to antisocial behavior on-site.

Below are the safety measures which are to be put into place:

- Having a well illuminated common areas and car park areas; and
- Deterrent signage alerting patrons that the area is under video surveillance;

15. Security and Safety

The security and safety of employees and the general public are highly valued by management and staff on site.

All staff will be trained in safe operating procedures and be supplied this Plan of Management as part of their initial training.

16. Surveillance

The building will have a surveillance system installed so that the car park and internal areas of the premises can be viewed if required.

A sign will be placed in a prominent locations advising 24-hour camera surveillance is active and that any anti-social behavior will be reported to the NSW Police Service.

Additionally, the managers of the retail tenancies have the authority to refuse service to any patrons not behaving in an acceptable manner. If situations were ever to escalate, the policy is to call the Police.

17. CCTV Camera

Management will install CCTV surveillance cameras in and around the premises in strategic locations. All cameras will operate 24 hours a day. CCTV Cameras will remain in working condition at all times. If damage to CCTV Cameras occurs repairs will be undertaken as soon as practicable. CCTV footage of any security incident on the site will be copied and made available to NSW Police Service as required.

Management will also ensure that the coverage will be operated with due regard to the privacy and civil liberties of all persons within the development.

Staff will be encouraged to assist with passive surveillance of all areas of the development by providing efficient reporting systems for any security or safety concerns on a 24-hour basis.

18. Lighting

External lighting will be provided around the building and building entries to enable clear vision and will be designed in such a manner so as to prevent concealment and shadowing. The standard of lighting will not only reduce the fear of crime in accordance with Australian lighting standards, but also serves to provide clear identification of activity using the high technology CCTV cameras proposed.

Broken light fixtures and bulbs within the premises and car park will be replaced within 24 hours.

19. Clear Sight Lines

The building has been designed to take into account the need to maximise clear sight lines. The building incorporates the maximum use of natural surveillance and minimises potential obstructions such as physical barriers to ensure clear sight lines.

20. Access Control

The building will utilise an intruder alarm, access control and CCTV system to monitor access within the site and building.

21. Signage

Clearly identifiable signage will be installed in and around the building to indicate which areas are open to patrons and members of the public and which areas are restricted.

Signage and clear sight lines will assist with the anticipated vehicle and pedestrian flows within the car park and other areas.

22. Space Management

Routine maintenance checks and reporting will be carried out by personnel employed of each tenancy to ensure the property is maintained and to reduce the likelihood of crime or vandalism. Landscaping will be maintained in a manner that communicates an alert and active presence.

Furthermore, robust materials are proposed to be used where possible to mitigate against potential malicious damage. Any vandalism or graffiti should be repaired and removed promptly by staff or contractors.

23. Toilets

Common toilets for staff and customer use will be clearly sign posted.

24. Landscaping

The site landscaping is designed not to create pockets or enclosures whereby victims could be entrapped but to help integrate the built form into the site and surrounds. The proposed landscaping scheme avoids vegetation that impedes the effectiveness of outdoor lighting. It will be maintained regularly to communicate an alert and active presence.

25. Waste Management

Staff will separate operational waste and recyclables where possible; this will occur within the each retail tenancy. Waste and recycling bins will be clearly labelled and identifiable.

26. Complaints Handling

All staff members will undergo complaints training to ensure that they are skilled in being able to appropriately manage complaints or when they are required to be elevated to a Manager. Generally, all complaints will be dealt with by Managers.

Staff will be trained to handle complaints by teaching them the LAST process – Listen, Apologise, Solve and Thank.

Staff are trained to know how and when to turn over complaints to Managers.

As a basic course of procedure if a member of the public becomes irate and threatens someone, the following actions should be followed:

1. A Manager will be requested to address the guests concerns and take appropriate action to resolve the situation.
2. If the guest continues to behave in an unsatisfactory or threatening way the person will be asked to leave the premises.
3. If the person refuses, as a last resort, consider calling the police;
4. This incident or complaint would be required to be noted in the complaints register.

Complaints will be handled by management and staff. Guests will also have the opportunity to escalate issues to head office.

27. Incident/ Complaints Register

A register is to be kept, which identifies any incidents that may have occurred or complaints that are considered to be worth noting. The day, time and details of the incident/complaint are to be noted within the register. A copy of the register will be made available to the Police within 48 hours upon request if requested.

The entries within the Incident/complaints register will be used as a basis for the review and amendment to this plan of management as required.

A review of the incident/complaints register will be undertaken annually.

28. Consultation

Doma are committed to ongoing consultation with adjoining property owners, Police and Council to foster a better understanding of relevant operational issues that may arise at the site and would be available to be contacted to discuss potential issues as they may arise.

Ongoing review of this document may be undertaken to ensure that the Plan of Management remains relevant to the operation and that issues that arise can be managed into the future.
