**SYDNEY METRO MARTIN PLACE INTEGRATED STATION DEVELOPMENT SOUTH TOWER –
CONSTRUCTION CERTIFICATE 4**
CONDITION B10 – STATEMENT OF COMPLIANCE

To whom it may concern at McKenzie Group,

With reference to the below document, dated 13th August 2019 and issued to us by Lendlease Building on 26th August 2019:

Development Consent (SSD9326) 39-49 Martin Place, Schedule 2
Part B – Prior to Issue of Construction Certificate
Materials and Finishes, Item B10

With reference to Item B10, we provide the following South Tower finishes and materials architectural documentation:

(a) Specifications and sample boards for all external finishes, colours and glazing including annotated drawings and computer-generated imagery of their application.

- Refer to sample board provided [CSWSMP-MAC-SMS-AT-DRG-939910 (A)] which includes details of selected finishes.

(b) Confirmation of the process and methods in arriving at the final choice for all materials and finishes.

- The materials outlined on the samples board have been selected via a sampling process specific for this project. The façade prototype visual mock-up is currently being prepared by the façade subcontractor, Yuanda, with matching samples provided for inclusion on the sample board. The façade stone sample has been provided by Palin Granite following a sample review process with the client and contractor. Lendlease provided a range of stone samples to match the existing 50 Martin Place stone and the selected stone is deemed an acceptable visual match for colour and consistency.

Yours sincerely

Alec Tzannes
Director
Nominated Architect 4714
