Subject: Baiada Integrated Poultry Processing Facility – Condition B62

Dear Mr White

I refer to your recent submission in accordance with Schedule 2, Condition B62 of SSD-9394, which states that the external materials and finishes of the buildings for the development must be non-reflective to the satisfaction of the Planning Secretary, to avoid distraction to air crews travelling to/from Tamworth Regional Airport.

In support of your request, you have submitted a document titled *Glare Assessment of Façade/Roof Cladding*, prepared by SLR Consulting Australia and dated 8 October 2024, which was forwarded to the Civil Aviation and Safety Authority (CASA) for comment. CASA did not raise any issues and agreed with the conclusion of the report that the choice of roof cladding for the Main Processing Building eliminates the potential glare from the facility, resulting in nil impact on Tamworth Regional Airport operations.

The Department has considered CASA's advice and is of the view that the report meets the requirements of the condition. Accordingly, as nominee of the Planning Secretary, I am satisfied that the requirements in Condition B62 have been addressed.

If you wish to discuss the matter further, please contact Pamela Morales on (02) 9274 6386 or via email at pamela.morales@planning.nsw.gov.au.

Yours sincerely

Shaun Williams
